Western Front Aflame as Nazis Strive to Hold Allied Advance; Congress Shapes Postwar Aid

Released by Western Newspaper Union.

(EDITOR'S NOTE: When cpinions are expressed in these columns, they are these of Western Newspaper Union's news analysis and not necessarily of this newspaper.)

As war comes to their soil, German civilians pack belongings and move from battered villages in war zone to safety.

EUROPE:

Battles Rage

In some of the bloodiest fighting since D-Day, the whole western front from Holland down to Switzerland was aflame, with Allied forces slugging through stubborn enemy de-fenses and then holding their own against German counter-attacks.

Especially bitter fighting occurred on Lieut. Gen. George S. Patton's Third army front, where U. S. tanks spearheaded a drive on Germany's famed coal and industrial Saar basin, and the enemy lashed back with strong armored forces. As Patton's men edged forward, the enemy fell back on the rugged and wooded slopes of the Vosges mountains, where they were expected to make a stand before retiring to the Siegfried line to their rear.

Stiff German resistance and repeated armored counter-attacks also slowed progress of Lieut. Gen. Courtney Hodges' First army to the north of Pat-ton's Third. In this sector, enemy strength concentrated about Trier and Stolberg in an effort to throttle Hodges' drives to the great Rhineland industrial cities of Cologne and Coblenz.

In Holland, an estimated 100,000 Germans fought against entrapment by Allied ground forces driving up the eastern border of the country to-ward the Zuider Zee, and paratroop-ers dropped in their rear.

Effect of the Allies' drive not only was to threaten the pocketing of these six divisions in western Holland, but also to put them into position to drive around the Siegfried line ending to the south of this sector and burst out into the Ruhr velley.

Clawing through the battered "Gothie line" under the cover of the rolling barrage of their massed artillery, Allied forces looked out onto the rich Po valley in northern Italy, as German armored formations sought to stem their rolling advance in this great agricultural and in-

Russ Break-Through

Heaviest fighting on the eastern front centered in the north, where the Germans claimed more than 600,000 Russian troops were attack-ing to clear out the Baltic states of Estonia, Latvia and Lithuania.

Despite the Germans' hard de-fense of their lines, built up in the swampy lake country of Estonia and Latvia, the Reds punched out size

The old Polish capital of Warsaw was a flery inferno as the Reds pumped shells into the German de-fenses of the city, and Red troops surging across the Vistula river came to grips with enemy units.

Armistice Terms

Calling on the nation to ". . . stick to reality and try to build up . . . existence with the opportunities that are left to us," Finnish Acting Prime Minister Ernst von Born disclosed Russian armistice terms to a heavy-

Russian armission of the 1940 Russo - Finnish border; cession of Petsamo to the Reds; leasing of the Porkkala peninsula on the Gulf of Finland for a Russian naval base, and reparations payments of \$300,-000,000, the armistice terms were described as "the hardest . . in our history" by Von Born. Restoration of the 1940 border

meant Finland's surrender of its most highly developed industrial region containing 10 per cent of its population, and cession of Petsamo meant the country's surrender of rich nickel mines.

PACIFIC: No Pause

Even as U. S. marines and dough-boys cleaned up resistance in the Pala islands, 600 miles east of the Philippines, American airmen were on the go softening up other enemy

Again the Philippines were the principal targets. Hopping off from New Guinea, army bombers blasted the southern port of Davao, shuttle point for enemy troops and supplies in the area, and carrier planes op-erating in the Third fleet hammered shipping, airfields and military in-stallations around Manila bay, nerve center of the islands.

In striking the southern Palaus, whose conquest placed U. S. forces closer to the vital enemy water route from the Indies to Japan, American troops encountered fanatical resistance, more than 7,000 Nipponese sol-diers out of a force of 10,500 fighting to the death on the main island of Peleliu.

FIGHTING SHIPS:

Allied Might

Recognized naval manual of the world, the 1943-'44 edition of "Jane's Fighting Ships" noted the increasing strength of Allied might on the high seas and the continued decline of

Axis strength.

Indicative of the growing power of the U. S. navy, "Jane's" revealed that it numbered 4,167 ships last January, exclusive of thousands of landing craft, with high watermarks including the scheduled launching of two new 45,000-ton battleships this year, the development of a fleet of 100 aircraft carriers, and the con-struction of new 2,200-ton flotilla

Referring to Axis naval strength, "Jane's" reported that disablement of Germany's Tirpitz and Gneisenau removed its last big capital ships from service, and despite the launch-ing of two new 45,000-ton battleships, Japanese shipbuilding facilities were

CONGRESS:

Charts Reconversion

With the fall elections rapidly appresent to assemble sufficient quorums, the house and senate made preparations for handling the postwar economic crisis and then moved

toward a recess until November. First bill to get an O.K. and be sent up to the White House for the President's signature was the one providing for a three-man administrative board to supervise the dis-posal of an estimated 100 billion dolars of surplus war goods, with no

As the first major step to enable the automobile industry to prepare for peacetime manufacture, the War Production Board authorized Chrysler, Ford and General Motors to permit technicians to plan correction of weaknesses in 1942 models; bring material specifications to date; map plant layout, and design minor changes in 1942 models. None of the companies are permitted to spend more than \$25,000 monthly for labor or material in this

discrimination to be shown against little business and sale of all war plants over \$5,000,000 subject to con-

gressional approval.

The second bill passed called for establishment of an office of reconversion, which would coordinate the work of all government agen-cies in the switch-back to peace-time conditions, and also authorized time conditions, and also authorized the lending of funds to states if needed to meet unemployment compen-sation payments.

GREAT BRITAIN:

Building Needs

That rebuilding will provide the base for Great Britain's postwar economy was indicated by the government's recent announcement that 1,250,000 workers would be needed in the construction industry to repair

Contributing to the tremendous Contributing to the tremendous damage wrought by the war have been the deadly German robots, some of which have individually wrecked as many as 1,500 houses, with the average being 400. About 200,000 square yards of board, 500,000 window frames and 400,000 doors have been ordered to help repair buildings damaged by the flying bombs.

At the present time, 380,000 people are engaged in the construction industry, it was revealed, with many

Postwar Wages

That British labor will put up a battle to retain its wartime wage increases in the postwar world was indicated by the strike of 14,000 auto workers in Birmingham, England, over assignment of employees to the assembly of a reputed peacetime product at lower wages than those being paid in the munitions depart-

Under the stimulus of wartime conditions, with manufacturers bid-ding for labor, British wages shot up from about \$15 a week to \$25 for men, and from about \$6.50 weekly

Because of the competition be tween themselves and foreign countries, however, British industrialists are expected to resist present high wages unless production costs are chopped through an increase in la-bor efficiency or greater use of ma-

AMERICAN LEGION:

Wants Strong U.S.

American cooperation with other nations to keep the peace, forceful occupation of Germany and Italy to bring the lessons of war home to their populations, and compulsory military training for youth, were among the resolutions adopted by the American Legion at its 26th annual convention in Chicago.

Also advocated was retention of

navy at full strength; preservation stoppage of all immigration until unemployment should fall to around 1,000,000, and deportation of all sub-

Active in Legion affairs in his home state, where he was credited with bringing Legion membership up to 85,000, Edward N. Scheiberling up to 85,000, Edward N. Scheiberling of Albany, N. Y., was elected na-tional commander. Mrs. Charles B. Gilbert of Norwich, Conn., mother of two sons in service, was elected president of the Legion Auxiliary.

RAIL TRAFFIC:

Safety Problem

Answering Sen. Burton K. Wheelfailed to heed congress' direction for the installation of safety equipment which might prevent fatal train wrecks, company officials declared that many wartime accidents could be attributed to inexperienced help. Because human failings more often Because human failings more often than not have been shown to be the cause of many accidents, a large number of the roads have broad educational programs, it was said.

In addition to a reliance on new help and inability to obtain materi-als for safety devices because of priority restrictions, rail officials said, the vast increase in wartime freight and passanger traffic has multiplied the chances of mishaps.

Pointing out that congress empowered the Interstate Commerce commission to order the railroads to commission to order the railroads to install safety equipment 24 years ago, Senator Wheeler said the gov-ernment may be compelled to force such action if the ICC failed to press

Memos of a Newspaperman:
Time echoed the oddity-in-thenews about the soldier overseas who was hit by a shell fragment which contained the number on his own dog-tag . . . The newspapers fell for it, too, a week earlier when a Canadian Press dispatch said an RCAF batman was named as the one it actually happened to in Normand. mandy . . . The report stated that his name was George McMillan of Nova Scotia. The number on the fragment was 26750—the number on fragment was 26750—the number on the fragment was 26750—the number on his identity card . . The Herald Tribune carried it, too, a week after it published an article (Aug. 13th) in its magazine section titled: "Lucky Shot" by Gen. Patton's wife. She said it happened in the last war!

Lou Holtz and some others were reminiscing about Ziegfeld and how the master-showman always "had class" even when he couldn't afford

There was the time, frixample, er squaidering another fortune on a failure in New York. He wired his old friend Ed Wynn . . . "I know I owe you \$65,000," it said, "but I need \$7,500 desperately. Will you help me out again?"

Wynn instructed his harkers to

Wynn instructed his bankers to rush Ziegfeld the \$7,500 . . . Zieg-feld used it to return to N. Y. in

Max Herzberg, who collected a bookful of anecdotes which he christened: "Insults," considers this his favorite. . . Once Disrael and Gladstone collided verbally in the House and as Gladstone came out after adjournment he was still shaking with rage. . . . He glimpsed Disraeli chatting with other members and he shouted: "Sir, you will come to your end either on the gal-

lows or by some terrible plague!"
Disraeli adjusted his monocle and softly intoned: "I should say, Mr. Gladstone, that depends upon whether I embrace your principles or your mistres:"

The G-Men follow through on every tip, of course. . . You never can tell. . . . Several of them were assigned to a real hot one last week.
. . . A woman, reported the informant, had many signs in her bathroom reading: "Good morning, Mein Fuehrer." . "Heil Hitler!" and "What have you done today to improve the Master Race?" . FBI agents, disguised as plumbers, investigated and confirmed the tip. . "You bet I put them up!" she boasted. "But I'm not a Nazi!" . It took hours before they broke her

It took hours before they broke her down. . . . She was fed up with her husband's dictatorial attitude, and he had stopped speaking to her. . . . She hoped to insult him by comparing him with Hitler!

Add capsule criticisms that will live: Don Herold's: "The dogs in 'Uncle Tom's Cabin' are poorly supported by the cast." . . . Robert Benchley: "'Perfectly Scandalous' was one of those plays in which all of the actors unfortunately enunciated very clearly." . . Anon:
"The trouble with Katharine Hepburn in "The Lake' is that she didn't
throw herself into it enough."

Notes of an Innocent Bystander:

The Magazines: Newsweek's good scribing a singer portraying a ham-my actress, wrote: "She plays the role of a Mae Westphalian prima donna." . . . The same mag reminds Russian-balters that the Soviet casualties are almost five times greater than the U. S. and British combined. . . . "Seventeen," a new mag for the junior-miss set, has a refreshing slant. . . Earl Wilson is represented in Everybody's Digest, a mag with zing. . . . Pic rolls out the silver lining for scientists who insist civilization can attain Utopia. Meanwhile we'll be content Utopia. Meanwhile we'll be content with the closest thing to it—America. . . . American Mercury's circulation is climbing steadily and for good reason. It makes sense. . . . John Roy Carlson, the "Under Cover" author, does another excellent job in The Woman magazine. . . In a few weeks the same mag offers his "Daughters of Dissension and Defeat," which undresses the various phony "Mother Patriotic Clubs."

Navy See'y Forrestal got a huge howl at the Waldorf dinner in his honor with this: "There are two wars. We are winning the first one and we are going to win the second. But there are too many experts! That reminds me of the expert engineer who knew what it was all about. You know what an expert is. He's a mechanic away from home!

Hotel Caters Exclusively to Servicemen and Their Families

One of the most unusual hotels m the nation is located in Washington, D. C., where, despite nightly sellouts, accommoda-tions are provided far below

OPA ceiling prices!

It is the United Nations Service
Center, formerly the Capitol Park
hotel, now under the exclusive management of the Recreation Services of the War Hospitality committee. The only hotel in the United States taken over completely for this pur-pose, it is perhaps the largest Can-

has everything—from its own news-paper, Flags Abreast, to a free nursery for children of traveling service-men. Washington, D. C., is such a hub for the armed services that the Canteen, despite the hotel's size, was forced to take over an adjoining school house, converting it into room fer 345 more beds, a total of 570 available sleeping accommodation

nightly.

The huge center was officially opened October 27, 1943, and there has been a virtual sell-out of accommodations since. It is the only Canteen that accepts the wives and families of servicemen, as well as those in uniform. No reservations are accepted—first come, first served. This is true of both officers and enlisted men.

Just recently, the 1,000,000th visiting serviceman was honored. He was Petty Officer 3/c Stanley Wicklund, of Boston, Mass., stationed at the naval air base, Patuxent River,

Actually it looks like the head-quarters of the general staff, except that 74 former employees of the Capitol Park hotel are still working there as members of the Canteen staff. Everything that occurs at the Canteen must be approved by the military district of Washington and the Potomac River naval command. A 24-hour duty is maintained by the Shore Patrol—the Canteen's own police force!

Though much of the Canteen's varied accommodations are free, some services are rendered on a cost ba-sis, which astounds the average

Typical guests at the Center are Petty Officer 3/e Stanley Wie Boston, and his wife. When Wicklund came in the door he was told that he was the one-millionth serviceman to register at the hotel. The Wicklunds are shown resting in a corner of the nursery, where they have put seven-months-old Bobby to bed.

The cafeterias are tremendous projects in themselves. There are two—one each for officers and enlisted men. Miss Rochelle Z. Kendall of Dallas, Texas, is the Canteen's food expert and nutritionist. Pointing out that the most modern and sanitary methods of food catering had been employed there, she said: "Every governmental stress on basic, nutritious foods has been observed by us, as has the general governmental theme of utmost sanigovernmental theme of utmost sani-tation during this wartime crisis. We have, for example, employed single-service paper eating and drinking utensils almost exclusively, in place of obsolete and sanitarily inadequate dishwashing equipment, thus avoid-ing the possible danger of transmis-sion of disease from mouth-to-mouth via poorly washed common eating and drinking utensils. More than 50,000 paper cups weekly are used." Nursery Is 'God-Send to Mothers.'

The free nursery at the Canteen, according to Mrs. Luther Gulick, the

Washington civilian. This is true of laundry service, clothes dryers, washing machines, valet shops, harber shops and the impressive cafeterias.

The cafeterias are tremendous projects in themselves. There are for volunteers in this denursery operates 24 hours a day. There are 60 volunteers in this department alone, all having passed an intensive course in child care before acceptance. Since its opening, 2,568 children have been cared for, with the average between 9 and 12 months of age. The youngest guest of the nursery was a 16-day-old infant!

But most unusual is the nursery's "Baby Ferry Command." This is a group of uniformed AWVS women who roam the city's Union station a who roam the city's official states block away, and route weary mothers and children to the Canteen. Should a child or mother be ill, both army and navy dispensaries in the city are on call for emergencies.

city are on call for emergencies.

Apparently nothing has been left to chance in this greatest of all Canteens. It is a mighty institution that has grown out of this war, and is a living testimonial of the home front's contribution to the war effort in general, and to the serviceman and his family in particular.

Land-Lubbers Become Seamen In Six Months

"All right fellows. Line up on either side of the walk and open up your gear for inspection. No knives, guns, cameras or radios permitted aboard the base."

That's the first order "boots" en-tering the U. S. Maritime Service training station at Sheepshead Bay in Brooklyn, N. Y., hear when they "land" at the world's largest merchant marine training station. Taken in tow by an MA (Master at arms), within 24 hours the new recruits are processed through the station and their equipment issued.

From three to six months later these same "boots" emerge as thor-oughly trained merchant seamen, to take their place as radio operators, deck or engine seamen, cooks, or assistant purser-hospital corpsmen aboard one of Uncle Sam's modern merchant vessels. Recruits from Nebraska, Indiana, Alabama, Michigan-all across the country re port in six days a week at U. S. Maritime Service training stations to learn to sail aboard a wartime cargo vessel to "Deliver the Goods."

For his first few days at Sheepshead Bay, the new trainee is under the supervision of the indoctrination officer. His orientation includes reasons for and proper method of saluting, proper stowing of gear and instructions in rules and regulations of the station. A section instructor assigned to each 50-man section then takes over and continues with the newly formed section through the first four weeks of preliminary or

In "boot" training, the new trainee receives instruction in 20 subjects ranging from gunnery to mental hy-giene. He attends classes eight hours day, five days a week.

During his "boot" period, the new recruit uses a wide variety of train-ing aids. He sees motion pictures, practical demonstrations of fire equipment, breathing devices, breeches buoys and line-throwing guns. Wall charts on a variety of

Outdoor steering trainers are used to teach apprentice seamen the proper method of standing a wheel watch, relieving the helmsman, and following a course. The trainers are circular metal platforms floating in concrete basins. They are equipped with a ship's wheel, binnacle, and compass. As the trainee turns the wheel in accordance with directions of the instructor, the platform rotates.

topics are kept in view on classcom "bulkheads."
Completing four weeks of boot

training, the new recruits move into work week. A variety of duty including "kp" is assigned each individual to teach discipline and to attend to necessary station tasks.

Next the apprentice is ready to move into the course of advanced in-struction for which his preference and tested capabilities qualify him.

Deck trainees, at the end of their training, receive three final weeks of U. S. Maritime Service training ships which operate on Long Island sound and Chesapeake bay. Ashore they use ingenious equipment to learn. In one of the large indoor gs a mockup of a complete ship's bridge is constructed so that men may see the equipment and un-derstand the inter-relation. Engine trainees receive instruc-

tion in a wide variety of technical subjects in addition to continuing courses in boats, gunnery, physical training and swimming. In the sta-tion powerhouse which provides steam for cooking and heating, a Liberty ship engine is installed. Men for the cooks and bakers

special examinations. In addition to standard seamanship courses these men learn butchering, cooking and baking. They are provided with two Liberty ship galleys and two Victory ship galleys exact to the final pot and pan.

Fifty men are admitted to the Maritima Service hospital corps school each week, selected by competitive examination. Trained to double as pursers and hospital corps-men aboard merchant vessels, this is one of the hardest courses of instruction. The men are not do but skilled and competent me men able to treat ordinary ails of seamen and, most important, how to utilize most modern medical methods and drugs to keep alive and comfortable a dangerously ill man until the services of a medical officer become available.

cer become available.

Founded by a provision of the Merchant Marine Act of 1936, the U. S. Maritime Service came into being as the training organization for men to man America's merchant marine. In addition to the Maritime Service which trains both apprentice seamen and men for officers who have had 14 months sea time, the Merchant Marine Cadet Corps trains young cadet-midshipmen for duty in young cadet-midshipmen for duty in the merchant marine. The parent organization, the War Shipping adorganization, the War Shipping ministration, comes under the i diction of the U. S. Maritime

Under recent age limit changes Under recent age limit changes youths 16 to 17½ can enroll for merchant seaman training by the U. S. Maritime Service provided they have their parents' consent. Menbetween 26 to 35½ can atili younteer for all branches of Maritime Service training, provided they secure a referral card from the U. S. Employment Service. Men up to 50 years of age can volunteer for cooks and bakers training only.

Expenses of recruits are paid to

cooks and bakers training only.

Expenses of recruits are paid to one of the four major training stations of the Maritime Service. In addition to a 10,000-man station at Sheepshead Bay are schools at Hoffman Island, N. Y., St. Petersburg, Fla., and Avalon, Calif.

Pay during training is \$50 per month with increases for the more advanced schools, Uniforms and quarters are furnished trainees. Upon completing training, the men are assigned aboard a merchant vessel to begin "Delivering the Goods" all over the world.
