THIS PAPER IS PUBLISHED FOR GEO. P. CURTIS, PROPRIETOR.

DROPPING INTO POETRY

The Exchange Editor Does it Naturally.

Brooklyn Eagle. "If you please," said the young lady timidly...

She was a handsome creature with beautiful blue eyes, and a brow of gold...

May I show you the poetry? continued the ripe, red mouth. You will see that I couldn't get the last lines of the verses...

How softly sweet the autumn air! The dying woodland fills. And nature turns from restful care...

The anti-billious pills added the exchange editor with a jerk. Just the thing. It rhymes, and it's so...

"I suppose you know best," interrupted the young girl. I hadn't thought of it in that way...

The dove eyed him upon the moon. Look tender, meek, and sad. While from the valley comes the roar...

"Of the matchless liver pad!" roared the exchange editor. There you get it. That finishes the second...

"Think so?" asked the fair young lady. "It don't strike me as keeping up the theme."

"You don't want to. You want to break the love and there the reader likes it better. O yes! where you keep up the theme it gets monotonous."

Perhaps that's so, rejoined the beauty, brightening up. "I didn't think of that. Now I'll read the third verse."

"Well, I'll leave it to you," said the editor with a smile that pined the exchange editor's heart to his spine. "This is the fourth verse."

The merry milkmaid's soulful song. Red cheeks from the rocks. As silently she trips along...

I DON'T SEEM TO LOOK AT IT AS YOU DO

but of course you are the best judge.

As silently she trips along. In autumn's yellow tracks. "Wouldn't that do?"

"Do! Just look at it. Does tracks rhyme to rocks? Not in the Brooklyn Eagle it don't."

"And splits his pants loons!" Done it myself. Know I see exactly how it is. Why bless you heart you...

Snip, snip, snip. Paste, paste! But it's with saddened heart that he snips and pastes among his exchanges...

The Law Concerning Them in Different Countries. Australians.—Divorces have never been sanctioned in Australia.

Jews.—In other times the Jews had a discretionary power of divorcing their wives.

Moore.—If the wife does not become the mother of a boy, she may be divorced with the consent of the tribe, and she can marry again.

Corean.—The husband can divorce his wife and treasure, and leave her the charge of maintaining the children.

Siamese.—The first wife may be divorced, not sold, as the others may be. She then may claim the first, third and fifth child, and the alternate children are yielded to the husband.

Arctic Region.—When a man desires a divorce he leaves the house in anger, and does not return for several days. The wife understands the hint, packs her clothes and leaves.

Druse, and Turkoman.—Among these people if a wife asks her husband's permission to go out, and he says "go," without adding "but come back again," she is divorced.

Cochin China.—If the parties wish to separate they break a pair of chopsticks or a copper coin in the presence of witnesses, by which action the union dissolved.

American Indians.—Among some tribes the beds of the givers, the witnesses of the marriage are broken as a sign of divorce.

TO DIVORCE HIS WIFE IF SHE DISPLEASES HIS PARENTS

is allowed the parties can immediately marry again.

Greenians.—A settlement was usually given to a wife at marriage for support in case of a divorce.

Hindoo.—Either party for a slight cause may leave the other and marry. When both desire it, there is not the least trouble.

Romans.—In olden times a man might divorce his wife if she were unfaithful, if she counterfeited his private keys or drank without his knowledge.

Professor Wells, of the Massachusetts institute of technology, has invented a machine for heating railroad cars without the use of fire.

It consists of an iron cylinder, two feet long and one foot in diameter, having a fixed plate of hardened iron in one end, and a second plate attached to a revolving shaft.

The construction of the machine is such that it is easily adapted to every place where there is waste power, as in mills, factories, public buildings and cars.

The power being taken directly from the wheels, so that in case of accident all danger from fire is eliminated.

This machine has been in practical operation for some months, and it is claimed that with thirty-six inches of friction surface, a room of 10,000 cubic feet can be heated more uniformly and quicker than by the use of coal.

The dramatic career of Sarah Bernhardt in this country we should probably not notice if the woman were to come before the public merely as an actress.

It is said that in England even Mr. Gladstone disgraced himself by visiting this woman. For her character of actor's people as a rule, care nothing for society, excuses its ignorance or its neglect to obtain knowledge on the ground that it does not assist.

WITH ACTORS

will be asked to indorse a woman who has children and has no husband.

From an acre weighing a few grains, a tree will grow for a hundred years or more, not only throwing off many pounds of leaves every year, but itself weighing several tons.
