

Convict Labor.

Radical talkers and Radical writers moan about the wickedness of putting penitentiary convict labor in competition with honest labor, and about Democrats "taking away the chance of the mechanic to earn an honest penny by doing all contract work with convict labor." and it ought not to be. But who is responsible for it?

How came there to be a penitentiary in North Carolina? Turn to Article XI, Canby Constitution of 1868, and read—

"Section 2. The General Assembly shall, at its first meeting, make provision for the erection and conduct of a State Prison or Penitentiary."

The Legislature of 1868 '69 obeyed orders, for a marvel, and provided for building a penitentiary. Once filled, and kept filled, the question was what to do with the convicts. We cannot think with patience of convict labor being made to compete with honest labor in any measure; and by employing it on railroad work the Democratic party has avoided that competition as far as possible. But why does it ever, in the smallest particular, compete with the labor of honest men? Turn once more to Article XI, Canby Constitution of 1868, and read—

"Section 11. It shall be steadily kept in view by the Legislature, and the Board of Public Charities, that all penal and charitable institutions should be made as nearly self-supporting as it is consistent with the purposes of their creation."

That is the reason, and the Radicals are responsible for it.

CUTTING TIRES

I desire to say to my many patrons and the public generally that I found it so difficult to please my customers in shrinking tires, that I have purchased a NEW GREEN RIVER UPRIGHT Tire Shrinker, a machine with which I can shrink tires of any thickness, without cutting. Heretofore the great difficulty has been in the fact that the tire would break where it was wadded or had been burnt by the blacksmith, and with the machine all this is avoided, time is saved, and our customers much benefited. I only make the tire cherry red, and in cutting a tire, instead of doing as other blacksmiths do, that is cutting it in a thick place, we are enabled by the use of this machine to upset it in the very thinnest place, thereby strengthening it. I have all come and give me a trial, and I will guarantee satisfaction in every particular. Respectfully,
Louisburg, N. C. ANTHONY NEAL
