

DEMOCRATIC TICKET

For Congress—All District, IION. BENJ. H. BUNN, of Nash. For Senator, JOHN E. WOODARD, of Nash. For the House, P. A. DAVIS, of Nash. For the House, G. G. GILL, of Nash. For the House, H. C. KEARNEY, of Nash. For the House, B. P. MASSENBURG, of Nash. For the House, M. J. DAVIS, of Nash. For the House, W. K. MARTIN, Jr., of Nash. For the House, B. J. BLACKLEY, of Nash.

POLITICS.

Gathered From Here, There and Everywhere. Mr. McKinley gives the farmer a choice between working in a protected mill or going to the county poor house. The theory of returning Republican Congressmen: 'We have spent the surplus and increased taxation; now send us back again. The McKinley Tariff bill is a law and the mill owner is the 'Massa'. The farmer must go where? To a protected mill or the poor house. He has no choice. Ask your tailor, dry-goods dealer, grocer, tobacconist, wine merchant, hardware and glass store, if you have any doubt as to whether the tariff is a tax, and who pays it. The Dry Goods Economist says: 'Prices are now about 10 per cent higher than they were in August for all goods in which wool predominates. The McKinley tariff forbids its exchange for mill goods; reciprocity prevents its exchange for tropical products. The mill owners invested their money wisely when they bought the last Presidential election.—Ex.

THE ALLIANCE.

Notes and Comments Regarding the Alliance. Mr. E. C. Daddogfield, the State Secretary of the Farmers' Alliance, made a speech at the recent meeting of Democratic clubs of Raleigh, and the sentiments he expressed regarding the Alliance and the Democratic party were of a most patriotic nature. As the State Chronicle says, he declared that there is a feeling among the patriotic farmers against a man because of his profession or calling, whatever has seemed like it has been a temporary ebullition, and cannot last; and it has been caused by incorrect information and hasty action. It is no more a part of Democratic principle, it is a flame which quickly burns out. The real position of the Alliance is one of antagonism and hatred of evil conditions and unjust laws and men who are responsible for them, and not of distrust or hatred of a class. If a farmer seeks to perpetuate the evils under which they suffer, they are as much his enemy as if he were a lawyer or a doctor or a banker or a politician. Books beyond a man's profession into his principles and acts. There are the tests. Whenever any of its members have failed to do this and have opposed a man because of his profession, they have gone contrary to their confessed aims and been guilty of injustice. In a speech accepting the nomination of a prominent Alliance man of Winston county, who was nominated by the Democrats for the State Senate on Tuesday, he gave expression to the same view when he said that 'a man should be supported not because of the class to which he belonged, but for principles he might follow, but for principles he advocated. The chronicle would lay stress upon these articles, because they are good and true men in the State who have a deep prejudice against the Alliance because they believe it intends to ostracize all except farmers, and because some extreme Alliance men have given expression to sentiments which were calculated to arouse prejudice upon the part of all who did not belong to the Alliance. We have never believed, that the extremists who would exclude any who do not follow in their way, spoke for the Alliance. We have known that they were unrepresentative of the Alliance and its liberal views. For all have not known this, and these loud talkers have afflicted their names upon the Alliance by the r. mouthings. It is well that in a community of patriots and liberal men, Mr. Daddogfield has stated the position of the Alliance, and administered a rebuke to those who have misrepresented the Alliance by words which do good, doing about more cordial and friendly feelings—and promote harmony and concord.

AGRICULTURAL.

The Value of Cotton Seed. The surplus cotton seed from the cotton crop was thrown away as worthless. Afterwards they were used as a fertilizer on the coming crop or in the compost heap. To a limited extent they were then fed to stock without crushing. The next and greatest advance was in separating the hull and kernel and in expressing the oil. The oil cake when ground, known as meal, became to be used as a stock food and as a fertilizer. The hulls were first used for fuel—the ash being used for a strong fertilizer—but afterwards were used for stock food. The combination of meal and hulls furnishes a complete food and is becoming to be used extensively for fattening purposes. The oil is used as a component of compound lard, for cooking, for lubricating and for other purposes, and when refined is sold as 'pure' olive oil. The lower grade is used for soap making. A small quantity of hull is recovered from the seed by improved plans. The following shows the value of the product made from the cotton seed by the most improved process, giving the average selling prices: 40 lbs. Oil, weighing 302 lbs., at \$12.00. Meal, weighing 675 lbs. at \$24.00. Hulls, 1,000 ' " at \$ 3.00. List " " 27 " " 4 c a 1.28. Care they bow it comes about? 'I must 'em Custom made the law 'Wesley, royal grip you da-sa! 'docu! 'Margarita! 'I here on earth 'Did you ever from croakers blue? 'Don't your dams down your birth? 'But they don't they think they do. Don't the duffers judge the world? 'Don't they think (twixt me and you) 'Middle-aged hair and curl'd 'M's acue is the scepter's touz 'Which is 'ears 'Russia and 'Stoutard while the world was new 'In the land 'regions cold 'Where the best toe 'big jaws chew 'Like they suck the small cane poles? 'Don't they ain't bow your knee? 'If they don't they think they do.

AGRICULTURAL.

Is it necessary to move here the relative advantages of being and planning. The autumn is here, and if we are not careful of our own health, we must mind now. In making choice of land, above all else it is of importance to choose land not infested with weeds and wild seeds. The methods by which strawberries must be cultivated are not favorable for the propagation of weeds, and a bed where weeds and fruit are struggling for supremacy is not fit for a garden. If a spot can be found that has been cultivated with some kind of crop, such as potatoes, for a season or two, it is preferred to even richer lands that have not been so handled. If they are once well started, strawberry plants will thrive and pick up a living where most anything else can, but the richer the ground is made, the more fruit they will produce. While some varieties flourish best upon a heavy soil, and others upon a lighter one, it will not be wise for the beginner to attempt to adapt each to its special need in this line. A knowledge of soils and acquaintance with the land, which can only be had by experience, is what must be had before technicalities such as this can be dealt with successfully.—Ed. N. C. D. A.

Highest of all in Leavening Power.—U. S. Govt. Report, Aug. 17, 1889.

Royal Baking Powder ABSOLUTELY PURE Nothing Succeeds Like Success! The reason Endam's Microbe Killer is the most wonderful medicine, is because it has never failed to cure any disease known to the human system. The scientific men of today claim and prove that every disease is CAUSED BY MICROBES, and that the only way to cure them is by RADAM'S MICROBE KILLER. RADAM'S MICROBE KILLER Exterminates the Microbes and drives them out of the system, and when that done you cannot have an ache or pain. No matter what the disease, whether a simple case of Malaria Fever, or a combination of diseases, we cure them all at the same time, as we treat all diseases constitutionally.

NOTICE. By Virtue of an execution Venditoris process issued from the Superior Court of Franklin County, on proceedings in attachment, in favor of Perry & Perry, against J. B. Chamblee, Esq., I shall on Monday the 10th day of October 1890, at the Court House in Louisa County, Va., offer for sale at public auction, for cash, all the interest that J. B. Chamblee has in lot No 3 in the division of the lands of John Chamblee containing 80 acres. Also all the interest that said J. B. Chamblee has in the dower of Francis Chamblee, widow of John Chamblee, containing 125 acres, all of said lands situated in Harris Township, Franklin County, Va. The scientific men of today claim and prove that every disease is CAUSED BY MICROBES, and that the only way to cure them is by RADAM'S MICROBE KILLER. RADAM'S MICROBE KILLER Exterminates the Microbes and drives them out of the system, and when that done you cannot have an ache or pain. No matter what the disease, whether a simple case of Malaria Fever, or a combination of diseases, we cure them all at the same time, as we treat all diseases constitutionally.

Notice.

Having and unlimited order for wool I will pay the highest market price delivered at any depot or wharf, thereby saving the shipper freight, drays and commission's. Remittance always on day wool received. Sacks furnished free of cost. MILES F. MASON'S SON, No. 3 S. 15th Street, Richmond, Va.

THE GOURD VINE. All the former patrons of the "Gourd Vine" are cordially invited to call in when in Louisa County. They will always find us open, and they will be furnished with first-class liquors, beer, wine, &c. All the latest ke-drinks served to suit my customers. Respectfully, WELDON G. PERRY, LOUISBURG

In the pocket book of the Hon. Stephen Allen, who was dropped from the lead of the H. Clay, was found a newspaper, apparently out from a newspaper, of which the following is a copy. It is worthily to be engraved on every young man's heart. Make few promises. Always speak the truth. Never speak evil of any one. Keep your mind as clear as crystal. Live up to our engagements as just before you are generous. Never play a mean game of chance. Think no kind of intoxicating liquor. Good character is a rare and precious thing. Keep your own secrets. If you have any. Never borrow if you can't pay help. Do not marry until you are able to support a wife. Keep yourself immaculate, if you would be happy. When you speak to a person, look him in the face. Make haste to be rich, if you would prosper. Live in moderation, if you would prosper. Save when you are young, to spend when you are old. Avoid temptation, through fear you may not understand it. Never run to a debt unless you see a way to get out of it. Small and steady gains give competency, with a tranquil mind. Good company and good conversation are the signs of virtue. Your character cannot be essentially improved except by your own deeds. If any one speaks evil of you, let your life be so that you will believe him. When you retire to bed, think over what you have been doing during the day. Never be idle, if your hands can't be employed usefully, attend to the cultivation of your mind. Read over the above maxims carefully and thoughtfully, at least once every week. To Restore the Freshness of Worn Clothing.

Down in Georgia the Farmers' Alliance men made almost a clean sweep in the State election yesterday. As a diversion from the old ways of the old party, it is highly interesting. Now let the jolly farmers of Georgia go ahead and show the country how a commonwealth ought to be governed.—Phil. Record.

TO RESTORE THE FRESHNESS OF WORN CLOTHING.

The mystery to many people who have the science of cleaning clothes that makes them almost as good as new is explained in the American Analyst as follows:—Take for instance, a shiny old coat, wet or tear of parts of broadcloth, calicoes or diagonals. The scourer makes a strong, warm suds, and plunges the garment into it, sores it up and down, rubs the dirty places, in a cessary, runs it through several waters, and hangs it up to dry, he uses it, roll sit up for an hour or two and then presses it. An old cotton cloth is laid on the outside of the coat, and the iron passes over that until the wrinkles are out; but the iron is removed before the steam rises from the cloth, and they would be shiny. Wrinkles, however, are obliterated, but a red mark remains. A cloth over them and causing the iron to mark all sorts of shining places, are what they are treated as the wrinkles are. The iron is lifted while the red cloud of steam rises and brings the iron up with it. Cloth should always have a good steam especially in the case of white cloth. It will not be left in the water, and to the cloth. In this manner it is to be treated, the same care and attention to be rendered in the case of new and old cloth, and to be treated in the same way. God through love and a fellow of the mill, tear many wrinkles and look better every time because of it.—Scientific American.
