Work of the R. R. Commission. The Railroad Commissioners are hard at work, trying to make such alterations and amendments to the present system of treight and passenger service in the State, as will benefit the people without crippling the roads. This is no casy task as they have already found out. One of their first acts was a reduction in passenger rates of from 35 to 31 cents per mile for first class and We sang the good old war songs and weate from 3 to 27 cents per mile for second class fares. This, the commissioners thought, would be more satisfactory to the public than a amform rate of 3 cents But all the time I wondered what my Mary per mile as established by the Railway Commission in Georgia. An examination of the freight tariff now in for e in North Carolina has, we learn, shown that rates in North Carolina are cherp er than in Georgia, where the Commission has been in operation for some years. The North (arolina Commissioners have so far contented themselves with reducing the freight rate on such articles us coal and salt, which are of prime necessity to the people, and which should therefore be delivered as cheaply as possible. The freight and passenger rat's recommended by the Commission are intended for the well established through lines, and will be modified in the case of short lines o railread that are struggling to pay expenses even at the old rates. The Commissioners are also endeavoring to bring about reforms in the line of

through trains between important North Carolina towns, and expect to have a through car from Paint Rock to Goldsbore and Morehead City, instead of the present inconvenient arrangement by which passengers are compelled to make several annoying changes between those points. The railroads will be required to provide comfortable stations at all points where passengers are received, and legal proceedings are to be instituted to test the exemption from taxation claimed by certain of the older roads. These are some of the matters upon which the Commission is now enor not the results which were expected from the Commission are to be realized. We are confident that the Commission will give to the people whatever of good

ing injustice to the railroads. - Ex. The FirstStep.

SCHEDULE B TAX TO BE RESISTED IN THE COURTS-ACTION TAKEN BY THE MERCHANTS OF WILMINGTON.

[Wilmington Messenger] The ner hants of Wlinington are

determined to resist the payment of Schedule B tax to the full length of the law. Messrs. R. M. McIntire, N. B. Rankin and C. W. Worth have been

making the rounds to sa ure subscriptions to a fund for currying the matter into the courts, and several hundred dollars have already been raised for this purpose. The Legislature was appealed to at its recent session to light en the burdens of this tax but falled to afford the relief sought for. The merchants will now secure able counsel, and by testing the constitutionality of the Act in the cour's, are confident of securing the relief which they could not obtain before the General Assembly.

TWO OPINIONS.

A great many farmers in this county failed to get in their usual crop of oats last fall and this spring, and many of them are considerably puzzled as to what they are going to do about it. It will never do to buy corn at present prices, and some have made ar rangements to "hedge" against the difficulty. The best suggestions that we have heard came from two tool, those initials stand for Willy know what they are talking about. One says:

"Let every farmer who failed to get in his oats go right to work and sow an acre of speckled peas to the mule. This will come in by the middle of June, and if he sows them on good rich soil, they will carry him over until his corn is gathered. I have tried that plan more than once, and it is about the cheapest and best feed I know cf. But be sure that you sow the speckled or "whippoorwill' pea. It comes in several

The oodinary treatment for contageous blood poisoning is to drive one poison from the system by introducing another. The result, in most cases, has been that which or's recentions, in New York City, usually follows a leap from the frying-pan into the fire. To put it mildly, mercurial and other mineral poisonings have disadvantages which are hardly less serious than contagious blood poison. In either case the system is wrecked; and yet there is no reason why humanity should continue to suffer. It is the office of ty. Weekly Times intend to have 100.000 S. S.
