There was a silence in the kitchen save for the snapping of the fire in the tove, the ticking of the big, eight day Sermer's newspaper, and when Mrs. Harewood signed deeply, both her husband and sister looked on in surprise. "What's the matter, Sarah?" asked the former. That sigh was the loudst I ever heard you give. Has anything gone wrong? You look as though you had a big load on your mind."

"I have," answered the wife, "And it is a load which you must share, Eli; have borne it alone as long as I can bear it. The farmer leaned his head on his hand, a look of deep thought on his grave, weather-beaten face. His genlock in the corner and the rustle of the tle sister-in-law's plain speaking had given rise to thoughts which had never before entered his mind.

"I believe you are more than hall right, Hester," he said at last. "I'll think it all over to-night, and make up my mind what to do. I'd be lost here without George, and he shan't leave the farm if I can help it."

How Money Gets Into Circula-

It is interesting to see how money gets into the channels of trade. Most people never stop to think of that.

When the issue of paper money or the coinage of metal has been authorized by congress, the work is done at the mints and at the bureau of printing and engraving, but how does it go to the people? In several ways, but principally through the paying out of sums appropriated by the government for various purposes. The appropriations for the current year are \$460,000,000. About \$100,000,000 is paid out in pensions and thus scattered in every State, but principally in the Northern States.

A large amount goes for the redemption of bonds and the psyment of interest; other large amounts for the civil, millitary and naval establishments, for the diplomatic service, for public buildings, in the government of en. the District of Columbia, and for the Indians. In this way \$460,-000,000 will go out from the treasury this year, and the amount increases annually.

Another method is through the coinage of silver and gold. The government buys bullion and must pay for it with something; it pays for it with silver and gold certificates, which thus get into the hands of the people.

Another method is through the notional bank system, by which, everybody knows, a duly chartered corporation, on deposit of United States bonds, is allowed to isste 90 per cent. of their face value in currency of their own. This currency the bank loans to its customers and so it goes.

Another method is through the government depositories. All over the United States federal officers are collecting internal revenue taxes-over \$100,000,000 a yearsometimes as high as \$150,000,000 a year. The local officers must have a place of deposit, and so the government designates deposiburn, all relieved and cured by P. P. (Prickly Ash, Poke Root and Potassium.) lories in convenient places. The banks so designated have to secure the government fully by putting up government bonds. Thus there are in every important city in the country considerable amounts of government money on deposit. These deposits form a part of the loanable funds of the bank and so get into circulation .- Atlanta Con-

# A NATURAL CONCLUSION.

It is natural that those who have been deceived by the various nostrums that are continually offered to the public should demand a more substantial testimonial than the simple declaration of those who are interested in the sale of medicine. Recognizing the justice of this demand, the Press. Swift's Specific Company, of At lants, has embodied in pamphlet form a few of the more noteworthy testimonials that have come to them unsolicited.
