

THE FRANKLIN TIMES.

VOL. XXIII.

LOUISBURG, N. C., FRIDAY, AUGUST 25, 1893.

NUMBER 26.

Highest of all in Leavening Power.—Latest U. S. Gov't Report.

Royal Baking Powder

ABSOLUTELY PURE

TO PUBLIC SCHOOL TEACHERS.

The Superintendent of Public Schools of Franklin county will be in Louisburg on the second Thursday of February, April, July, September, October and December, and remain for three days, if necessary, for the purpose of examining applicants to teach in the Public Schools of this county. I will also be in Louisburg on Saturday of each week, and all public days, to attend to any business connected with my office.

J. N. HARRIS, Supt.

Professional cards.

C. M. COOK & SON,
ATTORNEYS-AT-LAW,
LOUISBURG, N. C.

Will attend the courts of Nash, Franklin, Granville, Warren and Wake counties, also the Supreme Court of North Carolina, and the U. S. Circuit and District Courts.

D. R. J. E. MALONE,
Office two doors below Thomas & Aycocke's drug store, adjoining Dr. O. L. Ellis.

D. W. H. NICHOLSON,
PRACTICING PHYSICIAN,
LOUISBURG, N. C.

E. W. TIMBLELAKE,
ATTORNEY-AT-LAW,
LOUISBURG, N. C.

Office on Nash street.

F. S. SPRUILL,
ATTORNEY-AT-LAW,
LOUISBURG, N. C.

Will attend the courts of Franklin, Vance, Granville, Warren and Wake counties, also the Supreme Court of North Carolina, and the U. S. Circuit and District Courts.

N. Y. GULLEY,
ATTORNEY-AT-LAW,
FRANKLINTON, N. C.

All legal business promptly attended to.

THOS. B. WILDER,
ATTORNEY-AT-LAW,
LOUISBURG, N. C.

Office on Main street, one door below Eagle Hotel.

W. M. PERSON,
ATTORNEY-AT-LAW,
LOUISBURG, N. C.

Practices in all courts. Office in the Court House.

WHAT IS IT CAN IT DO?

The original and only genuine Compound Oxygen Treatment, that of Drs. Starkey & Palen is a scientific adjustment of the elements of Oxygen and Nitrogen magnetized, and the compound is so condensed and made portable that it is sent all over the world. It has been in use for over twenty years; thousands of patients have been treated, and over one thousand physicians have used it and recommended it—a very significant fact.

"Compound Oxygen—Its Mode of Action and Results," is the title of a book of 200 pages, published by Drs. Starkey & Palen, which gives to all inquirers full information as to this remarkable curative agent and a good record of surprising cures in a wide range of chronic cases—many of them after being abandoned to the by other physicians. Will be mailed free to any address on application.

Drs. STARKEY & PALEN,
1529 Arch Street, Philadelphia, Pa.
120 Sutter Street, San Francisco, Cal.
Please mention this paper.

Coffins and Caskets.

We have added to our already complete line of wood and cloth covered Coffins and Caskets

Bank of Louisburg

Does a General Banking Business. Collections made and returned promptly Northern Exchange bought and sold.

COUNTY ORDERS CASHED

Interest paid on deposits after three months.

W. P. WEBB, President.

The Macon Telegraph says the profits to the melon growers of Georgia were so small this year, the probabilities are that the acreage will be much reduced next year. Only those who had good crops and got them to market early realized fair returns. After the railroad freight was paid, at the rate of \$100 a car load, and commissions, &c., paid, the car load which brought \$125 didn't put much cash in the raiser's pocket.

DELEON, TEXAS, July 23, 1891.
Messrs. Lippman Bros., Savannah, Ga. Gents—I've used nearly four bottles of P. P. P. I was afflicted from the crown of my head to the sole of my feet. Your P. P. P. has cured difficulty of breathing and smothering, palpitation of the heart, and relieved me of all pain: one nostril was closed for ten years, now I can breathe through it again.

I had not slept on either side for two years, in fact, dreaded to see night come, now I sleep soundly in any position all night.

I am 59 years old, but expect soon to be able to take hold of the plow handles; I feel proud I was lucky enough to get P. P. P., and I heartily recommend it to my friends and the public generally.

Yours respectfully,
A. M. RAMSEY,
The State of Texas,
County of Comanche.

Before the undersigned authority on this day, personally appeared A. M. Ramsey, who being duly sworn, says on oath that the foregoing statement made by him relative to the virtue of P. P. P. medicine is true.

Sworn to and subscribed before me this August 4th, 1891.
J. M. LAMBERT, N. P.,
Comanche Co., Texas.

A smiling face is like a ray of sunshine, and it is wonderful the amount of cloud dispelling power it has.

Bucklen's Arnica Salve.

The best salve in the world for cuts, bruises, sores, ulcers, salt rheum, fever sores, tetter, chapped hands, chilblains, sores, and all skin eruptions, and positively cures piles or no pay. It is guaranteed to give perfect satisfaction or money refunded. Price 25 cents per box. For sale by Thomas & Aycocke.

Oh, What a Cough.

Will you heed the warning. The signal perhaps of the sure approach of that more terrible disease Consumption. Ask yourselves if you can afford for the sake of saving 50 cents to run the risk and do nothing for it. We know from experience that Shilo's Cure will cure your cough. It never fails. This explains why more than a million bottles were sold the past year. It relieves cough and whooping cough at once. Mothers, do not be without it.

Karl's Clover Root, the new blood purifier, gives freshness and clearness to the complexion and cures constipation. 25c., 50c. and \$1.00. Sold by Thomas & Aycocke.

FEED SALE AND LIVERY STABLES.

The attention of the public is called to the fact that the undersigned are prepared to give their patrons full satisfaction. Remember that you can be accommodated at any hour, day or night.

DUKE & WARD,
Franklinton, N. C.

Henderson College,

HENDERSON, N. C.

Monday, September 4, 1893.

The Academic Department, including English, French, German, Latin and Mathematics will represent only what is best, while the music and art will be under skilled teachers. For further particulars address,

Mrs. B. B. PHILLIPS, Principal,
Henderson, N. C.

UNIVERSITY OF NORTH CAROLINA!

EQUIPMENT—Faculty of 25 teachers, 11 buildings, 7 scientific laboratories, library 30,000 volumes, 315 students.

INSTRUCTIONS—Five general courses, 6 brief courses, professional courses in law, medicine, engineering and chemistry, optional courses.

EXPENSES—Tuition \$60 per year. Scholarships and loans for the needy.

Address,
PRESIDENT WINSTON,
Chapel Hill, N. C.

A Beautiful Stylish Shoe for Ladies.

Perfection Adjustable Shoe

Is made to expand with every motion of the foot; it retains its stylish shape when other shoes give way and break. It is the best shoe made.

PRICES, \$2, \$2.50, \$3, \$3.50.

Consolidated Shoe Co., Mrs. Lynn, Mass.
FOR SALE BY
PERRY & PATTERSON;
YOUNGSVILLE, N. C.

ARE YOU PROUD OF YOUR STATE?

If You are Not Read This Brief Account of the Fine Record She Has Made at the World's Fair, and You Will Be.

The various exhibits of North Carolina show so much good management as to deserve a special description. Only \$25,000 was appropriated and that did not become available till March 14, last. A State board of managers was created, composed of the board of agriculture and the national commissioners of North Carolina. Of this board Col. W. F. Green is president; Miss Florence Kidder, vice-president; P. M. Wilson, executive commissioner, and T. K. Bruner, secretary and commissioner of exhibits.

There was not money enough for a State building and for adequate exhibits in the four great departments in which North Carolina stood ready to compete with the world, namely the Agricultural, Fisheries, Mining and Forestry. Accordingly every energy was bent upon preparing displays in these departments which collectively could stand a chance to win the prize, and which separately, each in its way, would indicate existing conditions and future possibilities.

In the forestry exhibit made by North Carolina, the plan adopted was to show planks four feet long and four inches thick; the upper half highly polished, the lower simply dressed. Above each plank is a photograph, 22x30 inches, of the identical tree from which the plank was sawed, and above this another photograph of the same size showing a section of the forest in which the tree grew. Over one hundred of these planks are in the display, each labeled with its proper scientific and popular name. To each is attached a map showing the portions of the State in which that particular kind of timber occurs. There are also in the exhibit full photographic illustrations of the turpentine industry in all its phases. There is besides a wonderful collection of medical herbs made by Wallace Bros., of Statesville. Palmetto trees from Smith's Island shade the four corners of the space containing this forestry display from "the old North State." North Carolina has the advantage of a double exhibit, as there is a very beautiful and unique display of timbers and photographs sent by Mr. Vanderbilt from his Biltmore estate.

North Carolina's mineral exhibit occupies a large and conspicuous space at the corner of the two main aisles in the Mining Building. It attracts constant attention alike from technical and plain everyday people on account of the great range and variety of its contents and the perfect system shown in classification and arrangement. The exhibit embraces both economic and precious ores, stones and metals. There are iron ores, copper ores, building stones, marble, gold ore, gold nuggets and 180 varieties of gems, including diamonds, hiddenite, sapphires, rubies, beryls, rose garnets, topaz, amethysts, emeralds and quartz crystals. These were collected under the special direction of Mr. T. K. Bruner, commissioner of exhibits. One of the most striking features of this mineral department of the North Carolina exhibit is a display of mica, one crystal among the many weighing over 300 pounds. The sandstones, the cut and polished specimens of granite and marble are well worth investigation on the part of builders. A column of ashler work five feet in diameter, from the Mount Airy quarries, is another attractive feature of the display. It would be difficult to call for a mineral not to be found in this exhibit.

The Southern State exhibits which causes the greatest surprise to sightseers at the World's Fair, is that from North Carolina in the Fisheries Building. All the food fishes of the State are shown, not mere casts but mounted specimens. There are aquatic birds and game water fowl; a pen of living diamond-back terrapins; models of all the different kinds of nets and appliances for catching fish, among them one of the enormous seines, a mile and a half long by thirty feet deep, used on the North Carolina coasts.

The agricultural department of North Carolina's Exhibit embraces probably the largest variety of products shown by any State or nation. The portion of it devoted to tobacco contains the finest and costliest kinds grown in the United States. It is made up largely of what is known as "Virginia Bright," of which as much as 80 per cent. of the total product of the two States of Virginia and North Carolina is grown in the latter. It got to be called "Virginia Bright" because most of it was marketed in Virginia cities. There is cotton in every stage of growth, with cereals, grasses and truck garden products in infinite variety. There are even live tea plants. Soils from various portions of the State are so arranged as to show the strata from the surface to a depth of several feet. There is a complete assortment of North Carolina's phosphate rock.

The horticultural exhibit of North Carolina now contains only fruit in glass jars and thirty varieties of native wines, the principal vintyards represented being Hoyt's of Buncombe county. "The Tokay" of Fayetteville and "the Medoc" of Halifax. The wines include champagnes. Fresh fruits of every kind will be shipped from the State and shown in this exhibit as they mature. Later on one of the features, which will be a novelty to most visitors, will be seppernong grapes, discovered and made famous by Sir Walter Raleigh. Prof. Saunders, of the United States Pomological Department recently said that North Carolina was the best apple orchard in the Union.

I have thus given special prominence to the display made by North Carolina, because it shows how much may be done with very little money; because it is in every respect significant and representative; because it embodies a correct idea. It says so much and says it so well that Mr. Wilson, the Executive Commissioner and the experts in the several divisions who helped him prepare it and install it, deserve the meed of praise not only from the people of North Carolina but of the whole South. Good judgment and economy were exercised even in designing the cases, tables and racks, which are all of oak and which, instead of being destroyed after the Exposition, will be taken back and used in a permanent museum at the State capital.—T. P. Grasty in Southern States Magazine.

To Restore Silks.

If you want to be always prepared to deal with grease spots on your silk gowns always keep the following preparation at hand: Powdered French chalk wet with soap suds, pressed into cakes and dried in the sun. Then when your attentive escort drops a cup of chocolate down the front breast, smile amiably and go home happy in the consciousness that you can repair the damage.

Lay the stained piece on clean cotton cloth, the right side down. Scrape your soap on the spot. Cover with several folds of tissue paper and press with a hot iron for a minute or so. Raise the paper. Scrape off the chalk. Rub the place with a torn piece of pasteboard to restore the gloss.

An excellent wash for dark silk dresses is made of a cup of cold water, a half teaspoon of honey, a half teaspoon of soft soap and half a wine glass of alcohol. The silks that are sponged with this preparation should be rinsed in clear, cold water and pressed on the wrong side while damp.

To restore its pristine smoothness to wrinkled silk, sponge it on the right side with a very weak solution of gum arabic and press on the other side.—N. Y. World.

A Japanese novelty is "glass paper," which is said to combine wonderful transparency with unusual strength and tenacity. The material for making it is furnished by a Japanese aquatic plant.

THE STATE UNIVERSITY.

Is it Worthy of North Carolina and Her People?

The Committee of the Board of Trustees appointed by the Governor to inspect the University, made a full and detailed report at commencement. We print a few extracts which will inform the people of the condition and management of their chief institution of learning.

GENERAL CONDITION

The general condition of the University is one of healthy, vigorous growth. The spirit that pervades it, from the president to the manager of the baseball team is pushing, hopeful and progressive. There is a determination to make it all that a reasonable public will demand.

MORAL AND RELIGIOUS TONE.

Your committee as a body, and individually, were very favorably impressed with the high moral and religious tone of the University, as it applies to both the faculty and students. We were informed that the students regularly attend some of the church services of the several Christian denominations having churches in Chapel Hill. The orderly decorum, the gentlemanly bearing, and the quiet of the students at the chapel service and prayers were very marked, and the members of the committee were highly pleased and gratified. The young men listened attentively to the reading of the scriptures, and engaged heartily in the service of song. The morning prayers we attended impressed us as solemnly as would a family worship before the duties of the day begin. It was a company of joyous, hopeful, happy young men. Your chairman, by invitation of the young men attended the worship of the Young Men's Christian Association, and by their request made a short talk after reading some selections from the Scriptures and prayers. He was encouraged and strengthened by the service, and went away grateful for the privilege, and with the prayer in his heart, "God bless the young men in this institution, and turn the feet of many through their influence to obedience to His statutes. And God bless the University, and multiply its power for good."

QUALITY OF INSTRUCTION.

The quality of the instruction given is in keeping with the character and quality of the men in charge of the departments and their scholarship and ability. No one doubts this who knows the standard claimed for it by the management of the University. The standard of the work is best judged by the bright and aspiring young men of the high grade institution. These are the best measures of college class work. Such young men desire the advantages of the best work. When it fails to come up to the standard of the best, they are the first to find its defects and to demand its improvement. Such young men are not easily deceived; and woe betide the professor who fails to reach their standard of demand. From these, and their attitude towards the professors here, largely, your committee conclude that the work is well and efficiently done.

HEALTH.

We inquired about the health of the students, and received the reply that not a member of the faculty nor of the student body was sick during our visit; that no professor had been sick during the year, and only one student had been seriously sick, and that he came in September, having contracted sickness elsewhere. He returned to his home and died there in October. The testimony was that the village was unusually healthy.

RELATIONS OF OFFICERS AND STUDENTS.

After careful inquiry we concluded that the relations of the

faculty to each other, and to the President, were most cordial and kindly. Not a jar, but peace and the kindness of friendship pervaded the entire faculty. All were working together harmoniously for the common purpose of serving together the best interest of higher education; and all were striving in generous rivalry to serve the University and the State to the very best ability of each. The faculty were unitedly following the leadership of our worthy President, and adding him in every way possible in the administration of the affairs of the University. They united in testifying to his wisdom, prudence, firmness, zeal and high executive ability.

We found the very best state of feeling between students and faculty, the faculty striving to be helpful to the students, and the students rendering much aid to the faculty in the general management of the University, and taking a great pride in making a good name for the institution. The faculty bore warm testimony to this, and expressed grateful appreciation therefor to the committee.

NON-POLITICAL AND NON-DENOMINATIONAL.

The management of the University, we fully believe, from our investigation, to be free from political and denominational bias. We have seen no evidence of any such bias in either direction. The students are from families of every shade of politics and religion. We heard not a word of discord or unpleasantness either score. We do not believe anything of the kind has any existence here. There is a bias for religion, the religion of our own Bible, the Christian religion. Why should it not be so biased? Our civilization is a Christian civilization. Our school system is a Christian civilization. Our constitution, which is a religious constitution, declares that "religion, morality and knowledge being necessary to good government and the happiness of mankind, schools and the means of education shall forever be encouraged." Does anyone suppose that any other religion than that of our own Bible, or that any morality except that of which our Bible is the best teacher, was in the minds of the men who formed this constitution? Under this this constitution, and by its command, we have our public school system, under this constitution, and by its command, this University was founded.

Let it be religious! It must be religious. There is a common ground for the common good, broad enough for us all to stand on as Christian men and citizens of a Christian State. Denominational bias should have no place here, either in the faculty or in the board of trustees. We believe it has no place. It becomes us to see that it has no place.

THE STATE NEEDS THE UNIVERSITY AND THE UNIVERSITY IS WORTHY OF THE STATE.

We believe that the University is worthy of our highest efforts to maintain it and to broaden its influence, and to send out its light to bless the State in blessing its young men and broadening them for service. The State needs the University. The University is worthy of the State. Let us keep it so. As our educational horizon expands with the advance of these wonderful times let us enlarge the center light that its rays may touch the remotest points and bring hope and joy to the men who are to come after us.

JOHN C. SCARBOROUGH,
Chairman.

Deserving Praise.

We desire to say to our citizens, that for years we have been selling Dr. King's New Discovery for consumption, Dr. King's New Life Pills, Bucklen's Arnica Salve and Electric Bitters, and have never handled remedies that sell so well, or that have given such universal satisfaction. We do not hesitate to guarantee them every time and we stand ready to refund the purchase price if satisfactory results do not follow their use. These remedies have won their great popularity purely on their merits. Aycocke & Co., druggists.

SHILO'S ORE, the Great Cough and Croup cure is for sale by Thomas & Aycocke. Pocket size contains twenty-five doses, only 25c. Children love it.

TARIFF REFORM A NECESSITY.

The Republicans and other protectionists are making a labored effort to muddle the Democratic party on the financial question. They are antagonizing the financial policy of the Democrats in the hope of indefinitely delaying the consideration of the tariff question.

The Constitution warns our representatives in Congress, at this early stage of the extra session, that the great majority of the American people are not willing to endure the oppression of the robber tariff a day longer than is absolutely necessary. Congress must lose no time in redeeming that pledge in our platform which promises the reduction of the tariff to a purely revenue basis, on the ground that protection is an unconstitutional tax upon the masses to build up a few favored classes.

In the fight for tariff reform we stand squarely on the Chicago platform, and we are willing to go a little in advance of the party in demanding that the last vestige of protection shall be wiped out of our political system.

It will be useless for the extra session to pass measures of financial relief if the unjust and dishonest protective tariff is to continue to drain the pockets of the people of their hard-earned dollars to swell the wealth of a few millionaire monopolists.

We need financial relief, but don't forget the robber tariff. Smash it, annihilate it, strike it down, no matter what deceptive shape it may assume. A circulation of \$50 per capita would do our people no good with this monster evil absorbing the earnings of our toilers, and paralyzing the agricultural interests of the country.

Our Democratic Congressmen should not allow themselves to be drawn into extended debates on the financial question, and they should make no compromise, no bargain with the protectionists. There is no reason why our bill reducing the tariff to a strictly revenue basis should not be ready for the committees to take up as soon as they are appointed. The bill agreed upon should be reported without unnecessary delay, and then the Democrats, in possession of all branches of the government for the first time in a generation should give the death blow to the protective system.

This is the Constitution's attitude on the tariff. That vital issue must not be subordinated to any other. It must not be sidetracked or postponed. That robber system which is making the rich grow richer and the poor grow poorer, must be abolished, and we have no time to lose in getting rid of it. Tariff reform must go hand in hand with financial relief. The latter alone would be only a temporary makeshift.—Atlanta Constitution.

A Million Friends.

A friend in need is a friend indeed, and not less than one million people have found just such a friend in Dr. King's New Discovery for consumption, coughs and colds. If you have never used this great cough medicine, one trial will convince you that it has wonderful curative powers in all diseases of throat, chest and lungs. Each bottle is guaranteed to do all that is claimed or money will be refunded. Trial bottles free at Aycocke & Co.'s drug store. Large bottles 50c. and \$1.00.

R. R. CROSSÉN.

FIRST CLASS PAINTER,
LOUISBURG, N. C.

I wish to offer my services to the public, and will say that I am prepared to do all kinds of house painting, graining, &c. My work in Louisburg speaks for itself, and I refer to all parties for whom I have worked. Old furniture made new. Give me your patronage, and you shall be pleased.

NOTICE.

Under and by virtue of a decree of the Superior Court made in the Civil action entitled *Pattie D. B. Arrington vs. John L. Arrington and B. L. Arrington, Executors*, the undersigned, Commissioner of the Court, at public auction at the Court House door, in Louisburg, Franklin county on Wednesday, the 20th day of September, 1893, the following described lands to wit: That tract known as the "Franklin Mill Tract," and now owned by J. T. Collins. This 10th day of August, 1893.
HENRY PERRY, Commissioner.
