THE FLOWER OF UTAIL

CHAPTER IL

This is not the place to commemorate the trials and privations endured by the immigrant Mormons before they came to their final haven. From the shores of the Mississippi to the western slopes of the Rocky mountains they had struggled on with a constancy almost unparalleled in history. The savage man, and the savage beast, hunger, thirst, fatigue and diseaseevery impediment which nature could place in the way, had all been overcome with Anglo-Saxon tenacity. Yet the long journey and the accumulated terrors had shaken the hearts of the

stoutest among them. There was not one who did not sink upon his knees in heartfelt prayer when they saw the broad valley of Utah bathed in the sunlight beneath them, and learned from the lips of their leader that this was the promised land, and that thesevirgin acres were to be theirs forever-

Young speedily proved himself to be a skillful administrator as well as a resolute chief. Maps were drawn and charts prepared, in which the future city was sketched out. All around farms were apportioned and allotted in proportion to the standing of each individual. The tradesman was put to his trade and the artisan to his calling. In the town streets and squares sprang up as if by magic. In the country there | lying pasture lands, and trains of tired was draining and hedging, planting and clearing, until the next summer saw the whole country golden with Through all this motley assemblage, the wheat crop. Having rallied, with the elasticity of childhood, from the shock caused by her mother's death, she soon became a pet with the women, and reconciled herself to this new life in her moving canvas-covered home. In the meantime, Ferrier, having recovered from his privations, distinguished himself as a useful guide and an indefatigable hunter. So rapidly did he gain the esteem of his new companions that when they reached the end of their wanderings it was unanimously agreed that he should be provided with as large and as fertile a tract of land as any of the settlers, with the exception of Young himself,

On the farm thus acquired John Ferrier built himself a substantial log house, which received so many additions in succeeding years that it grew into a roomy villa. He was a man of a practical turn of mind, keen in his dealings and skillful with his hands. His iron constitution enabled him to work morning and evening at improving and tilling his lands. Hence it came about that his farm and all that belonged to him prospered exceedingly. In three years he was better off than his neighbors, in six he was well

There was one way, and only one, in which he offended the susceptibilities of his coreligionists. No argument or persuasion could ever induce him to set up a female establishment after the manner of his companions. He never gave reasons for this persistent refusal, but contented himself by resolutely adhering to his determination. There were some who accused him of lukewarmness in his adopted religion, and others who put it down to greed of wealth and reluctance to incur expense. Others, again, spoke of some early love affair, and of a fair-haired girl who had pined away on the shores of the Atlantic. Whatever the reason, Ferrier remained strictly celibate. In every other respect he conformed to the religion of the young settlement, and gained the name of being an cr-

thodox and straight-walking man. Lucy Ferrier grew up within the log house, and assisted her adopted father in all his undertakings. The keen air of the mountains and the balsamic odor of the pine trees took the place of nurse and mother to the young girl. As year succeeded to year she grew taller and stronger, her check more ruddy and her step more elastic. Many have been so scared by a lot of cows?" galloped furiously away, never even a wayfarer upon the high-road which ran by Ferrier's farm felt long-for rotten thoughts revive in his mind as he watched her lithe, girlish figure tripease and grace of a true child of the west. There are few who cannot recall that day and remember the one little incident which heralded the dawn of a new life. In the case of Lucy Ferrier the occasion was serious enough in itself, apart from its future influence on her destiny and

that of many besides. It was a warm June morning, and the Latterday Saints were as busy as the bees whose hive they have chosen for their emblem. In the fields and in the streets rose the same hum of human industry. Down the dusty highroads defiled long streams of heavily laden mules, all heading to the west, for the gold fever had broken out in California, and the overland route lay through the city of the elect. There, too, were droves of sheep and bullocks coming in from the out-
