The Three O'Clock Man

Ghost That Was Banished by

ORDERE SERVICE PROPRIES SERVICES SERVIC Carl Westerly left the office at a quarter to 3 o'clock. There seemed not to be the remotest danger of an extra that night, and the telegraph man had long since sent in his "30." For some reason or other Westerly was more than ordinarily tired. Perhaps it was his spirit that was weary. He was tired of the endless and relentless grind of newspaper work, tired of the newspaper point of view, tired of the whole round of life. He wondered if men who had a home knew how blessed they were and thought, with distaste, of his dismal room, where his thoughts alone kept him company. It was an uninviting room, as any one who saw it must have confessed, for Westerly did not have the trick of domesticating himself as some bachelors do.

He was a bachelor indeed. He had always lived in a womanless sort of way. Sometimes it came across him that he was missing the best part of his life in knowing nothing of them, but he was shy and reverent, and it appeared to be his lot to dwell alone and envy other men. So, what with loneliness and overwork and ennul, he was not at his best on this particular night. No car was in sight, and he concluded that he had just missed the hourly borse car which took belated workers homeward after the cable had ceased its buzzing for the day; so he started out to walk. He loitered for a time, half hoping some vehicle might deserted. So, after pausing a moment

to admire the sinister picturesqueness of the Chicago river," with the lights gleaming upon its murky waters from masthead and high window, he started to cross the bridge. A distant clock struck 3, and Westerly, aroused by it from his reverle, looked up to see a man just before him-a man who seemed to have come up out of the solid planks of the bridge. He wore a hat well back on his head and showed a long, horselike face, with a hooked nose and one blind eye. About

him was a cape such as men wear over their evening clothes. All his garments were of a fine cut and quality, but worn with a noticeable negligence. It was exceedingly curious, but as Westerly approached this man he felt a fear of him-not such a fear as one may be excused for feeling at meeting a stranger in an unlikely place at a late hour, but a fear of the nerves. It seemed to him that if, by any chance,

that man were to touch him he would faint. He moved as far away from him as the limits of the footpath would permit, and passed him hastily, a coldness stealing along his veins as he did so. The man merely smiled in a sardonic fashion, lifting the eyebrow of the blind eye and dropping one corner of his mouth. It was an indescribable smirk and filled Westerly with aver-

Actually it seemed to him that he must shriek aloud for protection from this silent man. But he controlled himself and went to bed and slept-after a time. The next night be confessed to some apprehension as he approached the bridge, and he looked out anxiously for his dread companion of the night before. He was not to be seen anywhere. But at about the center of the erly with that one haunting eye. Again

he gringed. Again he followed Westererly to his house and again he stood without and stared up at the window. This went on for nearly three months. If by any chance the young editor went home later or earlier than 3, he had the privilege of going his way alone, but if the hour was 3 the man was there, watchful and sardonic and silent as the tomb. At times Westerly thought of addressing him, but whenever he strove to do so his tongue clove to the roof of his mouth. 'He evaded him at times by changing the hour of his homegoing or by riding on the street car, but somebow he was insistently drawn back to the bridge and the Three o'Clock Man, as he denominated him. He sometimes wondered if he would see the man upon the

bridge if he were to pass in a car, but as no car went at that hour he was It chanced that better times came to such a temperature of the blood as Westerly and that they came quite birds possess would be a fever. acquaintance with this man was over that he did not even look from his win-

gow that night to see if he were watching, but, putting out his light, threw himself in his bed with more of happiness in his mood than he had known for years. He fell into a light slumber, from which he was aroused by the impression that some one was looking at him. He opened his eyes and stared into the gloom, a gloom not a little mitigated by a street lamp across the street, which, owing to the lifted shade,

shone clearly into the room. The feeling that some one was looking at him grew to a certainty even before Westerly's sleep weighted eyes beheld the tall and careless figure of the Three o'Clock Man standing by his bed. If the man had been repugnant to him before, he seemed bideous now. He seemed to convey some horrible threat by his presence. What was it? Madness'

Westerly gave it no words, but he felt the moment had come for liberation. He determined to make a supreme effort to free himself. Failing, he was convinced that he would be forevermore in the presence of this fearful guest. So, with an effort that took the blood from his heart and brought the drops out upon his skin, Westerly raised himself, staring unflinchingly at the Three o'Clock Man, rose from his bed and slowly advanced. The advance is slow in the face of a cruel enemy. but it is sometimes certain. It was certain with Westerly. Inch by inch they went on, facing each other, the man backing, Westerly advancing, every muscle set, every nerve strained, brain and soul and mind fixed on victory. Across the room they went, bating each other more every passing second and showing their hate on their distorted faces, wrestling as men may not wrestle with their muscles till the creature went out of the side of the room-faded from Westerly's sight. He was gone. By some great, comfortable knowledge Westerly knew him: gone forever. Hardly conscious, he sank upon his bed, panting like one who has been in a frantic race or fight.

"I must tell Elsa Sessions," he re membered thinking as he sank off into a blurred condition, half fainting, half sleeping. "But, after all," he reflected the next morning, "she will never believe me. Perhaps I would better keep the strange matter of the Three o'Clock Man quite to himself."

Which he did. So it must have been cago Tribune.

Mabel's Little Sister.

When you have wanted a little sister very, very badly and when the little sister finally arrives, you are apt to love her far better than anybody else could possibly love her, even your father and mother. Mabel was 7 years old before the long wished for little sister arrived. The first rapture of really having her was dampened somewhat by the incessant crying of the baby.

For herself Mabel didn't mind. Anything the baby did was perfect, but, oh, would the others, who couldn't, of course, worship "little sister" the way Mabel did, get tired of it? One day when the baby had almost screeched her little head off, and all in that inconsequent way of babies, Mabel went to her mother in the first lull and begged

"You don't mind her crying so very nuch, do you. mamma?" she said earnestly. "She's so little, you know, and she can't help it yet, really and truly she can't. Please, please put up with it for my sake. And, oh, mamma, no matter how hard she cries you won't -now promise me you won't, mamm -send her away!"-New York Sun.

She Didn't Appear. One day not many years ago there appeared on the bill of a certain place of amusement the fact that Mr. and Mrs. Salvini would present an interesting feature on the programme. Mrs. Salvini's part in the entertainment was the task of working the stereopticon from the gallery, while her hu band performed on the stage. Mrs. Salvini's work was well done and was just as important as that of her hus band. A reporter, who was to write an account of the programme, however, turned in something like this:

"Mr. and Mrs. Salvini were on the programme. Mr. Salvini was present and did excellent work, but for some unaccountable reason, which was not explained, Mrs. Salvini did not make her appearance."-Detroit Free Press.

In his first book he considers the general phenomenon of the body in health and disease, and in the chapter relating to temperaments and humors be writes, "An humor is called by physiclans what thing soever is liquid and flowing in the body of living creatures inclosed with blood." Proceeding to the "manifold divisions of humors," he separates them into four parts, distinct in color, taste; effects and qualimelancholy. Exact in his subdivisions, he says: "All men ought to think that such humors are wont to move at sethours of the day as by a certain peculiar motion or tide. Therefore, the night to the third hour of the day; choler to the ninth of the day. Then melancholy the blood flows from the ninth hour of the night is under the dominion of phlegm."

An Experience Which Taught the Mechanical Expert a Lesson. One of the best mechanical engineers in New Orleans told an interesting story apropos of the tribulations of inventors. "About three years ago," he

said, "I got up a little device that greatly simplified the working of a certain type of pump. I took out patents that cost me in the neighbor bood of \$300, including attorney's fees, and finally spicultted the thing to a north.
