THE MARCH OF MEN.

If you could cast away the pain,
The sorrows and the tears,
And let the joys alone remain,
From all departed years;
If you could quite forget the sighs
And recollect the song.
What think you, would you be as wise,
As helpful or as strong?

If you could lay the burden down
That bows your head at whiles,
Shun everything that wears a frown
And live a life of smiles,
Be happy as a child again,
As free from thoughts of ezre,
Would you appear to other men
More noble or more fair?

And carry all his load,
Rejoiced to share with every heart
The roughness of the road;
Not given to thinking overmuch
Of pains and griefs behind,
But glad to be in fullest touch With all his humankind. -Charles Buxton Going in Harper's Weekly.

London's most famous historical building was named the "Tower," and not the "Castle," of London. Most fortresses of Norman construction in England keep the name of castle. London's Norman fortress alone bears another title. The reason is to be found in the methods of Norman military architecture. A Norman fortress was constructed of a tower or keep, with an attendant castle, each having the same relative importance. The first consta ble of the Tower called himself "con stable of the Tower of London and its attendant castle." Whereas in the case of most such buildings in England the name castle has survived longest, in the case of the principal fortresses at the capitals of Normandy and of Norman England the tower was the chief part of the fortifications. Thus the castle at Rouen, like the castle at London, always has been called the Tour de Rouen. The White Tower was so called because its builder, Hen-

Warned by Those About to Die. Camille Flammarion, in a French periodical, asked people to answer the following question: "Have you ever had while awake the impression of having seen a human being and had that impression coincide with the time of the death of that person?" The astronomer tells the result of his investigation

in the Nouvelle Revue. He had 4,280 responses, of which 2,456 were negative and 1,814 affirmative. Of the affirmative replies he examined 782, who recited 1.120 cases, all of which he regards as authentic. In his article M. Flammarion merely gives the experience of the subjects as related to him and does not attempt to account for the premonitions.

It might be said, however, that the fact that 40 per cent of those who wrote to him had had telepathic experiences does not indicate such an average among the human family. The three periodicals whose readers he asked for information have a large circu lation, and it is safe to say that every reader who has had premonitions of the death of a friend wrote to Flam marion, while the others would not regard it as worth while.

They demand the abolition of docu nents for proving identity and also the port. They repudiate compulsory millitary service, and if forced to bear arms they are liable to emotional enthusiasm, lending to self sacrifice. The form of death which they adopt is usually burial while alive, but occasional ly it is self destruction by fire. When the last great sacrifice of the

sect was made, the people adopted the voluntary cremation method as a means of getting an eternal release from their troubles.
