POU'S DENUNCIATION OF pass a bill protecting our infant Ameri-THE WAR IN THE PHILIPPINES

THRILLS THE HOUSE WITH BURN-ING ELOQUENCE AND UN-ANSWERABLE LOGIC.

day Representative E. W. Pou spoke Spain was too weak to accomplish in in opposition to an amendment to the Urgent Deficiency Appropriation bill appropriating \$500,000 to establish an army post at Manila. The talented young member from the Fourth District was in good voice and he held the undivided attention of the House Twice during his speech he was liberally applauded by his Democratic colleagues, and at the close there was great applause on the Democratic side While this was a short speech it showed that Mr. Pou is moving to the front, Few members have a more impressive manner of speaking. With his great ability and untiring energy he will soon come to the front in the House Mr. Pou said :

"The wording of the amendment offered by the distinguished chairman of the Appropriation's Committee induces me to submit a few remarks bes fore debate shall conclude.

"If I believed that the appropriation of \$500,000 provided for by that amendment was necessary for the shell ter and protection of the officers and enlisted men in our army in the Philippines, I would support it if every other man in this chamber voted against, it but I do not believe the ap propriation is necessary for the purpose. It appears to me to be a mere subjerfuge, an effort to accomplish comething by indirection which gentlenen fear to attempt in the direct and usual way. How utterly perverted are all the purposes of the war anyway! In constant worrying. Worry and unnatural everything appears? "When war was declared, for one

was for it. Under the same circumstances I would be for it again. Spain was murdering a people struggling for liberty, just a few miles from our shores. Our great republic had witnessed this until forbearance made us almost guilty, and when our battleship was blown up in Havana harbor, as I believe by Spanish agencies, the people of my State felt it was our duty to avenge the outrage and my district offered up the first young life as a sacrifice upon his country's altar. We fought in the righteous cause of liberty, and God and withers the mind. Have a hearty gave us the victory. Did anyone then laugh once in a while, it is a good anbelieve that when Cuba was freed we would use our soldiers and our ships to subjugate a people struggling for liber. bad temper and other ills.—Buffalo ty. The best shelter, the best protection we can give to our officers and enlisted men is to bring them away from scenes of disease and crime and death back to their own American homes (Applause on Democratic side.) "During the yaer 1900, Mr. Chairman, there were 66,882 men in our army in the Pecific Islands. There were more cases of sickness in our hospitals than there were men, that is to say,

that upon an averge every soldier in the service was sick once, and 10.547 were sick twice. Of course many were not sick at all while others were admitted to the hospitals several times. The we asked ourself the question. "Why report of the surgeon general of the is it that our people do not awake to army shows that during the year 1900 the situation, and add to themselves a the number of admissions to the sick report in our army of 66,882 soldiers in the Pacific Islan's reached the enormous total of 77,429. How many of these died I do not know, but I do know that 397 American lives were sacrificed during that year upon the field of battle in the Philippine Islands. And for what cause?

"I will give you the answer out of the mouth of the greatest statesman of the Republican party, who but recently has declared that we are engaged in the strongest stimuli to that developmen unholy work of crushing a republic. Statistics for the year 1901 have not been given us, but when they are the will furnish additional evidence of the stupid blunder we have made in attempting to take over the Philippin as a part of our republic. Accurate figures are not given us showing the number of lives taken by our soldiers. If they were the conscience of the republic would revolt and demand that Our country churches would be much the war be ended. Gentlemen seem to forget the principle that a nation can by good roads. The question is a vital a nation can commit crime. The re- from the banker to the little child who sponsibility of a continuance of this trudges his way to school. wretched state of affairs rests upon

can industries against competition in the Philippines. How long shall the war last? Soon four years will have assed. How long will it take 66,999 men to completely subdue eight mil

"Again I say how utterly have the high purposes of the war been pervert-WASHINGTON, D. C., Jan., 23 -To edl We are simply continuing what the Philippines, while at home we see slandered, persecuted and humiliated the great admiral who gave the stroke which destroyed the Spanish fleet, and which ought to have ended the war." (Great applause on Democratic side.)

MISTAKES OF WOMEN.

One of the mistakes of women is not nowing how to eat. If a man is not be fed when she is, she thinks a cup of tea and anything handy is good enough. If she needs to save money she does it at the butcher's cost. If she is busy, she will not waste time in eating. It she is unhappy, she goes without food. A man eats if the sheriff is at the door, if his work drives, it he undertaker interrupts-and he right. A woman will choose ice

Another of her mistakes is in not nowing when to rest. If she is tired, the may sit down, but she will dare tockings, crochet shawls, embroider doiles. Doesn't she know that hard work tires? If she is exhausted, she will write letters or figure her accounts She would laugh at you if you hinted hat reading or writing could fail est her. All over the country women's hospitals flourish because women do edly perfectly honest, was most carnot know how to rest.

Another mistake on the list is their their enemies, and yet they bug them to their bosoms. bridges before they get to them, and even build bridges to cross. They imagine misfortune and run out to mee

Women are not jolly enough. They make too serious a business of life, and augh at its little humors too selde Men can stop in the midst of perplexties and have a hearty laugh. And it keeps them young - Women cannot and that is one reason why they fade so early-there are other reasons, but we will pass them now. Worry not only wrinkles the face; but it wrinkles tiseptic, and will purify the mental atmosphere, drive away evil imaginings,

GIVE US GOOD ROADS.

Years ago we became the possessor of the conviction that a good road is one of the most potent factors in the life of people. Many and many a time as we watched the wagon trains, loaded with mountain produce, winding slowly and laboriously over rain-washed or muddy roads in Western North Carolina and later, as a circuit preacher, we made our way often at the rate of two and three miles an hour over the rocks and through the mud of mid-Carolina roads, mighty force in the shape of good

No town can thrive, no rural com munity can be prosperous, with bad roads. Prosperity will have good avenues to a people, or it will have none. The value of farms the well-being of orban institutions will be enchanced beyond measure by the existence of good roads. No nation can ever become great when the highways do not invite communication. One of the which has marked the life of North Carolina in the last decade is the deep ening interest it the matter of good

The influence of good roads is not exerted merely on the material life of people. It is felt in the educational and religious life. Good roads are wonderful agents in the hands of the Holy Spirit in developing the church stronger, if they could be approached

Therefore, with grateful feeling we hall the approaching Good Roads Convention, to be held in Raleigh, will be a great one, and that represenpresent to receive instruction and in-
