Timely Words. Hon. Perry S. Reath, once assistant ideas and is not afraid to express them in vigorous English. I most heartily commend to every thoughtful Amerlean citizen of whatever party the following extract from his paper:

Again there is agitation at Washingto of the subject of improving the classific in the executive departments, but no de-cent or practical means have been provided for getting rid of incompacent or incapacitated cierks. Although not admitted by those responsible for the present condition, the federal government for years has had and now has the most desploable form of a civil pension list. Two or three cabinet officers are reported to be in favor of some action which will, at one fell swoop, take from the assiste those who are not rendering good work for the government, and it is hoped they will not stop till they have accomplishe results. But will they?

A few years ago the commissioner of pensions told the writer that the service in his bureau would be better, more would be accomplished, if one-third of the clerks be accomplished, if one-third of the clerks in the pension office were dropped from the rolls. "But they will be retained," said be, "because men in congress will not vote for the displacement of their own constitutents." They are there yet and will be for many years. It is tive departments at Washington are al-ther incapacitated by age or were never fitted for the work they are set to per-form. Those undestrable ones who got in through the civil service examinations had the "book larnin" and mothing size. them dropped out by the only means at the command of those who have the au-thority. After a probation of air menths from the initial appointment the permanent appointment is made, and the executive officers are compelled to pursue methods which a criminal prosecutor would blush at in order to get rid of an undestable of the control of the classified employee of the govern-

It is now proposed to fix a tenure for all within and who may be appointed to position in the classified service. This the only way to make and keep the service efficient. The notion that any ex-ocutive officer will diamins as incapaci-tated or inefficient employee in the inter-ent of the public assvices has long since been exploded. He will call and call again those who would best serve the guerrament by staying at home until pay day stumble over one another, and Uncie San ecomes a great keeper of his wards. One good way to improve and maintain an efficient classified service is to fix a tenure of office and relieve the appointing officers of some of the responsibility of removal for inefficiency. bash." Now the chances are that General Michener is not the only statesman out of a job, to use the famous Three New States.

It will be remembered that at the last session the house passed the omnibus statehood bill providing for the admission of Arizona, New Mexico and Okia. homa. While the house Republicans did not put up much of a fight to prevent the passage of the bill, it was theroughly understood that down in the bottom of their hearts most of them were opposed to the bill. Of course the western Republicana, as a rule, voted with the Democrats and thereby gave them strength enough to force the passage of the bill. Thereupon the senate appointed an "investigating commit—all fells in paying tribute to appointed by Senator Beveridge of Dewitt's Lettle Early Blescy. Indiana, who visited the territories and made a most astounding report favoring the admission of New Mexico and Oklahoma as one state, a thing nobody had ever thought of or asked for. This is a proposition to join together the oldest and the newest civilisations in America. That the brilliant Hoosier senator expects his bill to become a law is to impeach his sanity. Why, then, did he offer it? The facts go to show that it is a flank movement to prevent any new state being admitted by this congress, which would be a great outrage. All some eulogy will be written about him | three are more fit for statebood than is altogether probable.
