STATE AID.

New Hampshire has taken a most emarkable step in the direction of better system of public highways. measure has been enacted into law appropriating no less a sum than three quarters of a million dollars for the improvement of the main highways of the State. The money is to be raised at the rate of \$125,000 a year for six years.

This amount will build a great many miles of macadam road, and will, no doubt, lead to still further construction in years to come.

It is what we will all have to come to, sooner or later. The State must do the general road-making. The cities and villages and even counties are too small units for so large work. But State and towns in com bination can accomplish a great deal and the burden will be lighter. New Hampshire, in reality, has only taken a place in the march of progress.
