SHOOTING STARS.

The Blazing and Paling of These Erratio Baby Planets.

The shooting star is an oddity of the very oddest kind. It is a world of itself—a miniature planet—probably not larger than the papier mache globe on your study table or the rubber ball with which the schoolboys play "three cornered cat," but it is a world just the same. These baby planets are not always round, as planets are generally supposed to be, but are known to be in all sorts of queer shapes. Some are square, others octagonal; some irregular and many cornered, while one is occasionally met with which is smooth as a brick or a cement paving stone. Probably you have never heard of a man (or woman either, for that matter) "meeting with" a shooting star in any of his wanderings. Let us see how such a thing might be possible.

The shooting star is originally a miniature world, revolving around ras and Plato all studied there; per- dough. Do not knead it thorough- digits must have been (sixteen) 16 the sun with as much regularity as haps Moses too. It was also the ly, and do not add any yeast, for as 61, 27 as 72, 38 as 83, 49 as 94, the earth, Jupiter, Venus or Mars. birthplace of the sacred literature fear it may rise when baking. When etc. It keeps up this unerring flight of Egypt, where was written on you have finished kneading, place thousands or even millions of years. papyrus leaves the original chapter the pan containing the dough Finally it reaches the limit of its of the oldest book in the world, genwithout any visible cause it shoots Dead," giving a most striking acoff at a tangent. It is now a "shoot- count of the conflicts and triumphs throw them with all your might and but even now it is not bright as other stars are. Let us see what will tian, rich or poor, wished to have appearance; hence its name. Place you do. torch in the heavens." > A Story About Dumas. publish this novel, for which you must give 1,500 francs." It was a translation from the English, and the publisher objected, explaining that a translation wasn't worth that sum and that, moreover, he was busy with a number of original works. He wouldn't give more than 300 francs. "Very well," replied Dumas, "put down 1,500 francs to my account. Take your 300 francs and give the remaining 1,200 to the translator." The publisher soon discovered that this was a piece of noble helpfulness on the part of Dumas. The translator was the widow of a friend, a once well known politician, who had died shortly before, leaving the poor woman with a large family to support.
