A Sprained Ankle.

As usually treated a sprained ankle will disable the injured person for a month or more, but by applying Chamberlain's Liniment and observing the directions with each bottle faithfully, a cure may, in most cases, be effected in less than one week's time. This liniment is a most remarkable preparation; try it for a sprain or a bruise, or when laid up with a chronic or muscular rheumatism, and you are certain to be delighted with the prompt relief which it affords.
