The sly fox is still at large. Mr. Lasater and his guests had a nice race with him last week. It is said that one of the party went to sleep and while he was sleeping the fox came up and robbed him of his horn and pocket knife. The horn he wanted to call up another pack of hounds and the knife to cut a way for the dogs through the briars. He also took the mans pocket book and it is supposed that he will visit other parts of the country for his health.

BLUE EYES.

The old fashioned way of dosing a weak stomach, or stimulating the Heart or Kidneys is all wrong. Dr. Shoop first pointed out this error. This is why his prescription—Dr. Shoop's Restorative—is directed entirely to the cause of these ailments—the weak inside or controlling nerves. It isn't so difficult, says Dr. Shoop, to strengthen a weak Stomach, Heart, or Kidneys, if one goes at it correctly. Each inside organ has its controlling or inside nerve. When these nerves fail, then those organs must surely fail. These vital truths are leading druggists everywhere to dispense and recommend Dr. Shoop's Restorative. Test it a few days, and see! Improvement will promptly and surely follow. Sold by F. Reid Pleasants, Louisville, T. C. Joyner, Franklinton.

WASH THE HANDS.

And Do It as Frequently as the Opportunity Offers.

Civilized man touches a hundred things with his hands to every one with any other part of his body. Literally he sticks the former into everything. It follows, as Dr. Eccles points out in the Dietetic and Hygienic Gazette, that hands probably play a very important part in the spread of disease. From this the further corollary may be drawn that washing the hands is a sanitary process of great importance. It affords an imperfect but partial disinfection.

Pretty much everything touched by the hands may be infected—money, newspapers, books, street car straps, restaurant knives and forks and tumblers, other people's hands, door handles, public pens and pencils, and so on, ad infinitum. Every one of these touches may, and some of them actually do, result in a transfer of germs. Fortunately most of the newcomers will be harmless, but occasionally a "batch" arrives analogous to the Black Handers, and if they find any cut or minute abrasion of the skin or if the imbecile carelessness of their host rubs them into his eyes or mouth the possibility of a death or at least an expensive illness in the latter's family becomes imminent.

Therefore wash your hands as often as opportunity offers. You can't overdo it. Clean hands are of far more importance hygienically than aesthetically. Washing them after handling some dangerously infected object may save your own or some one else's life. As you have no way of distinguishing infected from uninfected things, banknotes, for instance, the hands should always be washed as a matter of routine before they are carried to the eyes or lips.

What Dr. Eccles would like to see adopted is antiseptic hand washing involving the routine use of some fairly strong germicide. This is a counsel of perfection that cannot be hoped for. A more frequent use of soap and water will be soon enough for a first step. The Medical Record agrees with Dr. Eccles as to the necessity for a hand washing crusade.

The Earliest Lotteries.

The lotteries are generally said to have had their origin in Italy, but in Crowe and Cavalcaselle's "Early Flemish Painters" reference is made to a lottery drawn at Bruges on Feb. 24, 1446 (1445 old style). This is the earliest of which the scheme, list of prizes and accounts are known to be in existence. In 1530 a lottery was drawn in Florence, the object being to meet the state expenses. Nine years afterward they were legalized in France by Francis I. and called "blanques." The lotteries instituted at Paris by the Duke d'Invertois in 1572 and 1578 were for providing marriage portions for the young women belonging to his estate.

The first lottery known in England was drawn at the west door of St. Paul's cathedral in 1569. The amount was £20,000, which in those days was very considerable. It consisted of 40,000 tickets at 10 shillings each; and the profits of the speculation were to be appropriated to the repair of the harbors of the kingdom.

A Successful Disguise.

Mr. Murphy, says a writer in the Brooklyn Citizen, was inquiring of his friend Mr. Doolan how his wife was feeling after the excitement of the recent wedding of their daughter. "She's well enough," replied the other, "excepting that she's grieving over a pair of illigant new kid gloves that got lost on her that evening."

"She's feeling bad about them, but I've advertised in the paper, and I'm thinking she'll get them back again before long. They cost Mrs. Doolan two dollars and forty-five cents!"

"Ain't you afraid whoever got them will be slow to answer the advertisement?" inquired Mr. Murphy.

"It's meself that knew how to fix that," returned Mr. Doolan. "I advertised them illigant gloves was an owld cotton pair, bur-rusting away at the seams and wur-rth nobody's keeping!"

The Cossack's Whip.

People who are unacquainted with Russia and who read of street disturbances being suppressed by the Cossacks with their whips have little idea of what formidable weapons these are. Made of hard leather and tapering to a fine point, they are triangular in shape, and the Cossack, who knows how to bring the edge down upon his victim, can inflict a wound that is not infrequently fatal. A favorite stroke is one by which the eye and a portion of the cheek are cut.

Perry Mill Items.
