## Woman's Greatest Trouble.

Big Sandy, Tenn.—Mrs. Lucy Cantrell, of this place, says: "Every two weeks, I had to go to bed and stay there several days. I suffered untold misery. Nothing seemed to help me, until I tried Cardui, the woman's tonic. Although I had been afflicted with womanly weaknesses for seven years, Cardui helped me more than anything else ever did. It is surely the best tonic for women on earth." Weakness is woman's greatest trouble. Cardui is woman's greatest medicine, because it overcomes that weakness and brings back strength. In the past 50 years, Cardui helped over a million women. Try it for your troubles, today.

## The Test of Tariff Protection.

While the United States is suffering from depression, in Great Britain business is at its best. What is the cause of this difference in conditions in the two countries? It is impossible to escape the conviction that our Republican friends have brought about a decline in business by over-protecting the trusts, combines, and other manufacturers outside of those combinations. Protection by high tariff taxes adds to the cost of production, and the resulting high cost of living prevents consumption because our consumers are compelled to economize, for they cannot spend more than they earn. If everyone were employed and wages kept pace with high prices, business generally would not be suffering.

In Great Britain the price of commodities has been increasing, and the London Economist says: "Judged by what we test we may apply, British trade is in a prosperous and flourishing condition. The Board of Trade figures are rising every month; employment is good, and the percentage of pauperism low. Even the good trade of 1906-7 is bettered by the trade of 1910-11. The foreign trade returns for March show that the volume of our foreign trade is growing at a tremendous pace. Imports are greater than in any preceding March, while exports of British produce last month exceeded those recorded for any previous month in our history."

That glowing picture of good times in Great Britain from one of its most conservative business newspapers cannot, unfortunately be duplicated here; and yet if the theory of the Republican party is true—that tariff protection begets prosperity—the United States should be prosperous, and Great Britain should be suffering from the depressing influence of tariff for revenue and free trade. Very few articles are taxed under the English tariff, and the percentage on the value is only from 5 to 15 per cent. Here averaging everything is tariff taxed and the percentage is very high, averaging over 50 per cent.

Our Republican friends who are declaiming in Congress in opposition to reciprocity with Canada and against the bill to add a few necessities to the free list, should explain to their suffering constituents why there is business depression here under tariff protection, and prosperity in Great Britain with a very low tariff tax.

## "I HAD NERVOUS DYSPEPSIA 8 YEARS"

Mr. R. M. Medina, of Creedmore, N. C., thus relates his experience: "I was down with nervous dyspepsia for eight years. I weighed 125 pounds and it reduced me to 115. I was so weak that for three months I was not able to walk across the room. I was persuaded to try Mrs. Joe Person's Remedy, and it cured me. Can eat anything, and as much as I want."
