

True Progress

Consists in Substituting the real for the Unreal

Why not substitute a real bank account for that unreal one that belongs with you. "Castles in Spain?" You will better appreciate the progress you have made when you build your account to the point where you can make a profitable investment. No account too small to receive our most careful attention and consideration. Small accounts grow, why not start yours today?

TAR DROPS.

—And summer has at last reached us.

—See Dr. Malone's article in another column.

—With such weather as this crops will soon begin to grow.

—A clean town is a desirable town. Let's make Louisburg clean.

—Let everybody come out and help in the cleaning up movement.

—The man who asks the fewest favors has, as a rule the most friends.

—Persons who are everlastingly talking of getting ahead generally have none.

—Come out to the Court house Monday morning and take a hand in cleaning up the town.

—A little son was born to Mr. and Mrs. Geo. S. Baker on Wednesday of this week.

—In a game of base ball here Saturday between Wake Forest and Louisburg the local team was defeated in a score of 4 to 0.

—W. M. Person and S. M. Washington returned Friday evening from Moore's pond where they caught a string of forty nice fish.

—The members of the fire department here are preparing to attend the State Firemen's Association to be held in Charlotte next week.

—There never was such a rage for book reading as at the present time. It is a commendable habit, only one cannot be too careful in the selection of books.

—You will not pass through this world but once. Any good thing that you can show to any fellow being, do it now; do not defer or neglect it for you will not pass this way again.

—There is no good reason why a man should needlessly put his own wife to the trouble of wiping up the tracks, when he takes great pains to clean his feet before crossing his neighbor's threshold.

—Any business is more respectable than what is termed loafing. A young man had better sell clams by the painful than hang around public resorts, murdering time and his own reputation.

—We regret to learn of the misfortune of Mr. Charlie Pippin, who was kicked in the lower part of the stomach by a horse the past week. From last reports he is getting along as well as could be expected.

—If there is a stone, stump or other unsightly object in the yard, plant some morning glories, cypress vines, canary flowers and balloon vines (love puffs) around it. You'll be glad it was there before the summer is over.

—Reports were received here yesterday to the effect that Capt. E. J. Cheatham, the efficient S. A. L. agent at Franklinton, had gone to Newberne where he would be married on Wednesday. His many friends here extend congratulations.

—An exchange says: "If you want money go to strangers, if you want advice go to your friends, if you want nothing go to your relatives, and you will get it sure as h—!"

—An industrious, energetic, painstaking boy or young man never wants for a place, and these with stability of character, are all the recommendations needed. All these are so plain that every business man reads them and mentally concludes: "That boy will succeed because he deserves success."

—The boy who takes his hat off when he enters the house is the one who usually has his hair combed and his face clean, and the girl who says "please," and "thank you," is always prettier than the one who forgets these little things. You just look around and see if this is not true.

—What others have done can be performed today by our young men. They are in a great measure the architects of their own fortunes. Upon themselves alone rests the responsibility. They have it in their power to either make or unmake, and every young man should earnestly and seriously ask himself which it shall be.

An Exorbitant Monopoly.

The first witness that appeared before the Senate Finance Committee charged that the shoemaking industry in the United States is in the grip of a trust, and the manufacturers are at the mercy of the United Shoe Machinery Company of Boston. Another witness stated that the royalties charged by the Shoe Machinery Trust would, in less than a year, be sufficient to buy English machinery outright if the 45 per cent duty imposed by the Aldrich-Payne bill did not stand in the way.

Experiment Stations.

The experiments conducted by the State Department of Agriculture which were located here early in March with the below mentioned parties were arranged for being started by one of the State's Department men who was here Friday last. These experiments consist of an acre plot of land each and are conducted along very practical lines which should be of great benefit to the farmer's of Franklin county, as these are for the purpose of arriving at some valuable conclusions relative to practices in farming.

These men each have one: Mr. N. M. Perry, Halifax road, Experiment with Varieties of Cotton, Mr. E. L. Harris, Nash road, Fertilizer experiments under corn, Mrs. W. G. Mumford is expected to take the experiment with varieties of cotton. Similar and additional work is conducted in most of the counties of the State.

Public Land Trespassers

The constitutionality of the establishment of the Land Reserves and Conservation by the Federal government of its natural resources has been upheld by the United States Supreme Court in two decisions. The court also decided that the Federal government and not the states may say how the reserves shall be used. The basic principle upon which the decision rests is that the nation is the owner and has made Congress its agent to dispose of its property, and it is not for the courts to say how that trust shall be administered; that is for Congress to determine. The decision further says: "The courts cannot compel it to set aside the lands for settlement nor to suffer them to be used for agricultural or grazing purposes, nor interfere when in the exercise of its discretion Congress establishes the forest reserves for what it decides to be national and public purposes. In the same way and in the exercise of the same trust it may disestablish a reserve and devote the property to some other national and public purposes. These are rights incident to proprietorship, to say nothing of the power of the United States as a sovereign over the property belonging to it."

R. O. BISSETT, Clerk.

The better the deed the fewer the people to do it.

Loafing could be just as hateful as work if you got a salary for it.

Most people can brag three years about a three weeks' trip they took.

Maybe we like to talk about the weather because we don't like for other people to.
