Lo, at my feet they ite like glants Of mighty strength upon their own

The Pines! sublime array of natures

A grand and noble host of sentinels They've battled with the raging storms and won.

For years they've slowly crept nearer the sky-Heavenward-ne'er looking down but

always up. They've taught us noble things-sang for us,

When winters snowy feathers crowned their heads. then the summer winds sighed

lullables e melod ng their tops day were my childhood's friends and memory dwells

On little paths, made plain by little

And banks of fragrant leaves, where oft I'd lie

And dream away the happy hours, and Past the tall swaying tops, up to the

Where feating clouds brought angel volces sweet,

To make for me the singing of the

Hand classed in hand, there memories go today, With those of other days, when eage

youth of ambitions thoughts walked

Then the pine songs meant semething Dreams came to life, words to their

music set In the tender light of the sheltering

Of those dear old pines.

When later years brought pain and grief to me,

And those I loved walked by my side no more. I left their graves with bleeding

heart and walked In paths of other days, and memory came

And swept as strings the million swaying leaves

Of these grand old pines, and lo, chorus Made of angel voices came to my ear. And nature gave to me the balm of

song. Now all is still, the spring's first gentle breath.

Finds no responsive sigh and passes

The little sparrow nesting here so Finds not its home and leaves me here

alone

With only bitter thoughts of how these Conquered all nature's foes, and how

for years, They've sighed with me, and sung when I was glad.

their last enemy the Greed of Cold.

With glittering armor fells them to their graves. -Lutie Cooke Foster.

Getting Water by Gravity.

Will a fall of three mohes in 100 feet be enough to run water to house 1,800 feet away? What sized pipe should I use? Would it be advisable to flave standplpes at the high spots to let off the air?"

I think it very doubtful that you could get a satisfactory flow of water with so small a fall, as tae friction in the pipe that distance would be considerable. Use not less than twoinch pipe. If you can't get a greater fall in another direction, and the spring is a strong one, you could use a Lydraulic ram to elevate the water to the house andput it in an elevated ok to supply the upper floors. This would take a strong flow of water since the ram wastes agreat part of it.-W. F. Massey, in The Progressive Farmer

### RUN-DOVEN WOMEN

Find Health in a Simple Tonic. How many women de you know who are perfectly wall, strong and healthy as a woman should be? They may not be sick enough to lie in bed but they are run-down, thin wood, tired and ous, tired and devitalised.

Women and devicament.

Women are so active newsdays, and so much is expected of them, that they constantly overds and suffer from headache, backache, nervous ser from hesdache, bed ness and kindred illa.

men need Vinol, our deliclous cod liver and iron tonic with out oil which will create an appetite, e up the digestive organ

ure blood and create strength.

Mrs. Walter Price, Biloxi, Miss.

ays: Toras in a run-down condition says: Toras in a run-down condition for moneys, I had taken several mediines but they seemed to do nod. Finally Vinol was rec med to do me no ve until I am strong and well

Oh, Who Can Tell? Oh, who can tell When his life is rude And his heart is true? When his friends deny, And all his wits subdue?

Oh, who can tell?

Am'I undone after all my trials, Or can I not some secret find And face the noble with sunny amile?

Oh, who can tell?

Oh, can I not some fortune find, And then reveal my broad, sad

And tell my friends and relatives What noble deeds a boy can do.

Oh, who can tell?

I am baffling today where the waves go hid.

Trying and struggling 'seath the sky To gain some ground or win some And wrestling with the trials

erhaper I may some future day Gain a footbold/thereis

Oh, who can tall?

th, who can tell what a bay can do. When his heart to noble, kind on

He has a chance to win the race If he keeps the right and spirited

Oh, who can tell?

Adversity may turn and come my

And follow me both by night and day: Or prosperity may show the sign of

light. And follow me both by day and night.

Oh, who can tell?

-Ollie Harris.

#### Improving Sandy Land.

Can you give me any information how to improve upland that has no clay subsoil? We have quite a lot of land that has a sandy subsoil here in Buncombe County, N. C."

Land of that character should have the vegetable decay increased in it to make it more retentive of moisture and to darken the color and make it warmer. It is naturally leachy and the organic matter decays very rapidly in it, and must be continually renewed. Growing legume crops and feeding them to stock and returning the manure to the soil will be one of the best means. Down in the pino barrens at Pinehurst, Mr. Tufts has made a deep sand soil produce 90 bushels of corn an acre, which six years ago would hardly grow corn knee high. He has done it by feeding cows and using the manure, and growing cowpeas and feeding them, and constantly using every means to store organic decay in the soil. A good rotation of crops is important as a means for economically and profitably doing the work. Corn should always have peas sown among it, and there should always be a winter cover of crimson clover on the land to turn for corn, and peas should follow small grain for hay to feed and make manure. Such land is easily improved, but rapidly loses the improvement unless constantly renewed.-W. F. Massey, in

#### The Flower Department.

The Progressive Farmer.

Gladiolus as a house plant? Why not? If you have the bulbs plant a tew now in pots of good soil. Keep Registers office of Franklin county, them in a cool, moist place till they sprout, then bring them to the light. If they don't bloom by early May, then set them in the garden

Preesia bulbs planted now will give plenty of bloom before outdoor flowar. They are among our mos pleasing house plants, mainly because of their exquisite fragrance. Moreover, the buibs are very cheap.

If not already done, spread a goodly mulch of litter, cornstalks or . other material on bods where bulbs were planted inst fall and around shrubs such as roses, deutsia and spiraca. Though these plants are hardy, they are not benefited by heaving and settling of the ground, The mulch will prevent this.

Plants seem to have their personal preferences. They thrive in the house but not in another. Because Mary Jones succeeds with a gerantum and not with a fuchsia may not prove that Anna Smith would do the same, Perhaps there's something in the person but more likely it's in the quarters .-Southern Farming.

Draying and Carriage Service, I meet all trains with carriage and will take you snywhere in town for MC. I'm so dray and will be glad to serve you of my than

## If You are Subject to Colds This Editorial will Interest You.

TE FRANKLIN TIMES PRIDAY, PERRITARY 27, 1914.

A Great Majority of People Get One or More Colds Every Season and It is of Vital Interest to All to Learn How to Avoid and Relieve Colds Quickly, Since Colds are Said to be Contagious.

Some people think colds are only caught through exposure. This in return is contradicted by the fact that Arctic explorers are peculiarly free from colds. It is more generally accepted that colds are the result of civilized life, due to super-heated rooms and a very rapid change in temperature which causes the nerve centers to be depressed, and still more largely due to contagion—ene member of a family imparting a cold to another by sneezing or coughing.

A cold means nothing if relieved quickly. That such a purpose may be mplished, a quick aid to a cold is an essential. A remedy especially devised to relieve colds quickly is PERUNA.

PERUNA contains such ingredients that have an especially beneficial influence upon the inflamed mucous membranes and the quicker these mucou membranes are given the benefit of a remedy like PERUNA, the quicker the relief and the less contagion.

A neglected celd may become a serious menace to one's own life, and far ree, may endanger one's family.

We insure our homes against fire, our lives against death. Why should we not insure ourselves against cylds if possible by having a medicine in the family chest that can be used at page?

PERUSA is a reliable household remedy for saids and should be in every

ie, for there should be a desire to combat a cold as quickly as possible This is unlightened hygiene.

People who are Sphile and run down are more subject to calls then per-mine in normal health. Such pursues need outdoor life and PERUEA to help build up a strong constitution. If you have a pour appoints that is often a warning that you probably need a tonic like Perusa for Perusa aids the digestive organs. When 'your appetrte is fair and work and exercise do not quickly tire you, your susceptibility to colds diminishes very much.

Persons who object to liquid medicines can now obtain PERUNA TABLETS.

Trustee's Sale of Real and Personal Meridage Sale of Real and Persons

By virtue of the power of sale contained in that certain deed of trust executed on the 5th day of March, 1913, by J. Scott McKnight and wife, Maggie to Wm. H. Ruffin, trustee, and duly recorded in the Registry of Frankin county in book, 192 at page 327 de county in book 192 at page 257, de-fault having been made in the pay-ment of the indebtedness thereby se-cured and demand for foreclosure hav ing been made upon the trustee by the holders of the indebtedness so secured, the undersigned will, on Seturday the 14 th day of March, 1914, at about the hour of noon, at the court house door, in Louisburg, N. # FORD, FORD, FORD,

Three or four times as many in use as any others.

Right now is the time to "Stop, Look and Listen" before you buy your new automobile. No matter what car you may be thinking about buying, you can not get away from the fact, the Ford outsella all others three or four times. Over half a million people have bought the Ford cars. I don't know how you would reason it out, but I believe that if that many people can decide on the Ford to keep their profits up and their expense down then their robice ought to be a pretty safe one to go buy. You cannot afford to experiment. Life is too short to be fussing around with uncertainties. You want profits. You are entitled to them and you get them quick and in big volume with the Ford.

The difference between a Ford and all others is that it is simple, practical and will go any time of the year, winter or summer. Your business does not wait until a bright, warm sunshine day to call you. You have to go any time—that's the Ford.

The best of all, it will run 25 per cent cheaper per mile then other makes.

The best of all, it will run 25 per cent cheaper per mile than other makes. Your car is ready—Prompt delivery is the regular rule here. Your car will be der today for one or two.
