

# BOYS AND GIRLS -- THE BEST CROP

The best crop to raise is boys and girls. The acreage should be large and the cultivation exceedingly intensive. To this crop we owe more than to all others. To properly educate and care for the boys and girls, we should bend all our energies. Have we done our duty in the past? Have we not given to others in some cases what justly belongs to our own blood? Can we not make a good saving and an effective start by co-operating among ourselves in the sale of tobacco this fall? On every load of tobacco sold at the FARMERS UNION mutual warehouse--Harts House--this fall we can save money, money that heretofore has been given not to producers of wealth but to consumers of profits that properly belong in our pockets. Would you rather sell at your OWN WAREHOUSE and save money in charges, or would you rather sell at other houses and give unnecessary charges to those who wish to prosper through driving a bargain with you? Answer this question this fall and remember that the patrons of our warehouse, whether members of the Union or not, get their share of the net profits.

## PEACE PROGRESS IS SATISFACTORY

### There is No Note of Discord in Mexican Affairs During the Day.

Washington, D. C., July 27.—Actual progress today rewarded efforts of administration Senators to expedite trust legislation and the first vote on an amendment to the Interstate commission bill was reached. A few Republican Senators abandoned their efforts to delay the measure and Democratic leaders now hope to get a final vote on the first of the trust measures by Saturday night.

The amendment, adopted by a vote of 40 to 13, would apply to the section of the bill relating to unfair petition and would provide that no order or finding of the proposed commission or of a Court in connection therewith, should be admissible as evidence in any suit, civil or criminal, brought under the anti-trust laws.

Senator Brandegee, Republican, moved to strike from the bill the section which would declare unfair competition unlawful and empower the petition and prevent corporations from using unfair methods. This motion was pending when the Senate recessed.

### Cover Crop Campaign.

The farmers' co-operative Demonstration work, conducted jointly by the U. S. and the State departments of Agriculture and the A. & M. College, is now starting plans for winter cover crops in this State. Efforts put forth in this matter the past season resulting in the adding directly of 42,300 acres of such crops.

The management will make a strenuous effort to double the average agents are already at work on the matter. Every farmer, merchant, banker, and all who are interested in promoting better farming are asked to join in the movement.

The crops advocated for this State are Rye, for very poor soils; crimson, bur and red clover; vetch, with a support crop; and grasses of various mixtures. Last year a hundred acres of grasses, scattered well over the state, produce an average of 5,600 pounds of cured hay per acre, at a net profit of \$31.00 per acre. This shows that we have splendid conditions for growing all the hay and grazing crops needed in the State and some to sell.

The legumes mentioned are usually more profitable than grasses because they gather free expensive nitrogen from the air and store it in the soil. Farmers can get it this way much cheaper than by purchasing it.

These winter growing crops are valuable. For grazing, cutting for forage or turning under to increase soil fertility, they are easily worth ten dollars per acre and often several times this amount. Often the crop that follows them is doubled in yield, and leaching and add organic matter, something that practically all soils are deficient in. Every acre of cultivated land should grow at least two crops per acre, one in the winter and one in the summer. One may be a food crop or a money crop and the other a soil improvement crop. Lands that bare during the winter months often lose more plant food through leaching and washing than is used by the crop that grows there during the summer.

It behoves every farmer to give this matter his attention. The important thing to do right now is to decide which crop or crops he will grow, procure good seed, and then break his land at once to a depth of from eight to twelve inches. Profitable crops are rarely grown on shallow plowed soils. Harrow the land the same day it is broken to prevent loss of moisture,

and to have it ready to plant when the time arrives.

There is no reason why every farmer in the State should not plant some clover on his farm late in August or from then till the middle of October. Those who are not acquainted with clover growing should not plant more than an acre or two the first season. Information concerning the matter may be had by requesting it of our State and National Departments of Agriculture, our A. & M. College, or Mr. C. R. Hudson, Raleigh, N. C., who inaugurated and is pushing the matter. Where there are Demonstrations Agents, farmers enjoy the advantage of a personal interview by calling on them.

### How Uncle Sam Spends

#### Your Income Tax Dollar

The American Magazine sent Ray Standard-Baker to Washington to trace penny for penny exactly how Uncle Sam spends it. The result of his investigation appears in the August number. Under the direct method of taxation, by which we still continue to raise most of our revenues, for people felt any concern as to what the government spent, but with a direct tax like the income tax several hundred thousand Americans will feel this year, for the first time, just what it means to help buy warships and pay for unnecessary postoffice. Following is part of Mr. Baker's report:

"The very first thing that struck me, and struck hard was the fact that, although we have had no great war in fifty years (and only a little one sixteen years ago), over sixty cents of every dollar that Uncle Sam collects from you and me (directly or indirectly) goes for military purposes, including containing expenses of past wars—pensions.

"I think that few people realize what this means—in a nation which considers itself peculiarly devoted to peace.

"Sixty-three per cent to the army, navy and pensions, and only thirty-seven per cent to pay all the other vast and useful purposes of the government, excluding postal service and the preposterous sinking fund—required by law, but never provided in fact. This thirty-seven per cent is available for building the Panama canal, improving our rivers and harbors, supporting the Indians, encouraging agriculture, public health and education, to say nothing of taking care of the entire machinery of civil government—congress, executive, courts, and the diplomatic and consular service.

"In the estimates for the new year the expenditure of the government for all purposes (with the exceptions above stated), reaches the vast sum of \$740,000,000. Of this \$466,000,000 go for war purposes and forty-five per cent of this goes for pensions, retirements, and interest on war debts."

### WET MAJORITY GROWS.

Late Returns Increase Lead of Anti-Prohibitionist—Races for Congressional Nominations Close in Two Districts. Callaway's Election Not Sure.

Dallas, Tex., July 26.—Prohibition was defeated in yesterday's State Democratic primary election, according to additional returns received today.

James E. Ferguson, of Temple, the anti-prohibition candidate for the nomination for governor, increased his lead to 20,000 over Thomas H. Ball, of Houston, the prohibition candidate. The returns indicate a final majority for Ferguson of about 30,000.

The resolution to have a State con-

stitutional prohibition amendment election was running behind to-night, with prospects that final figures would show its defeat about 10,000.

### In Congress Districts.

In the races for congressional nominations, Representative Young, Rayburn, Summers, Eagle, Henry Stephens, and Garner appeared renominated in the Twelfth district the race is still in doubt, with Representative Callaway in the lead. Jeff McLemore and E. R. Kone lead in the contest for congressman-at-large. Democratic nomination in Texas is equivalent to election.

Incomplete returns indicated that Representative James D. Slayden would defeat M. M. Slater for Congress in the Fourteenth district.

W. P. Hobby, of Beaumont, a well-known newspaper man, is slightly in the lead in the contest for lieutenant governor.
