Splendid Paper.

The following is a paper prepared and read by Miss Montagress Stallings of near Justice at a meeting of the Young People's Union there on last Sunday night.

We can only define faith as a power beyond the grasp of our finite minds So we might consider faith the yoke So we might consider faith the yoke which being firmly attached to the object desired or hoped for, there is no power that can change the result We learn from the inspired word the many mysteries that have been accomplished through faith, and this faith which resulted in obedience to God's command showing such impli-cit confidence in God's dealings with man, can not we also consider it the great propelling power by which great results are reached as to matters par-taining to man's accomplishments in this life? We learn from God's infaith, by which he and his family were saved from the flood.

So we must conclude that it is through faith that all the wonderful achievements have been accomplished in this life—like faith of a divine nature, is dead without words. Christ himself tells us that nothing is im-possible if we only have faith it has made the plan of calmatter much to made the plan of salvation which is by faith so plain, simple and free that by faith so plain, simple and ree that it is within the reach of every one from the highest to the lowest. So our faith in Christ must be similar to that faith of the child in its mother; it knows of no other source of reliance When faith that He has paid by his own blood the debt for she we owe enters into the heart, there is unspeak-able joy and peace of mind. So faith is the great power that moves man to all the great accomplishments in this world and the power that alone can fit him to spend eternity in the pres-ence of God, his Creator.
