WONDERFUL STUFF!

LIFT OUT YOUR CORNS

Apply a few drops then lift corn or calluses off with fingers—no pain.

No humbug! Any corn, whether hard, soft or between the toes, will loosen right up and lift out, without a particle of pain or soreness.

This drug is called freezeone and is a compound of ether discovered by a Cincinnati man.

Ask at any drug store for a small bottle of freezeone, which will cost but a trifle, but is sufficient to rid one's feet of every corn or callus.

Put a few drops directly upon any tender, aching corn or callus. Instantly the soreness disappears and shortly the corn or callus will loosen and can be lifted off with the fingers.

This drug freezeone doesn't eat out the corns or calluses but shrivels them without even irritating the surrounding skin.

Just think! No pain at all; no soreness or smarting when applying it or afterwards. If your druggist don't have freezeone have him order it for you.

FISHING'S FORCE IS NOW READY

The Next Thing on the Program is a Sham Battle.

American Field Headquarters in France, August 14.—The American expeditionary force, at the close of a month of training, have passed the preliminary and intermediate stages of development and are now entering the final phase before being ready for actual fighting. In view of the fact that a large percentage of the force were recruits just enlisted, it was first necessary to instill discipline and perfect organization. Then there was instruction by the French in hand grenade throwing, trench construction, machine gun and automatic gun handling, bayoneting and transportation and communication work.

Now the troops are on the threshold of real fighting. This week a sham battle will be staged in which the American troops will storm trenches under cover of fire from artillery miles behind the advance. They will first hurl high explosives, destroying the objective trenches, and then, under a timed barrage fire, the Sammys will advance across country, occupying the trenches.

The sham battle will be an exact reproduction of an actual battle except that there will be no enemy to return the fire.

More time is now being devoted to target work. There is a difference of opinion concerning the allies' respective effectiveness with hand grenades and rifles, but the American army has always been noted as the best rifle shots in the world, and the army tradition will be sustained in Europe.

The Sammy today will go to the trenches as good a shot as the minute men of '76. He is also proficient in grenadeing.

The expeditionary force today is essentially a well trained army. Their French instructors today are more of advisors than actual directors.

The staff feels confident that America's timber for soldiers today is superior to any in the world and are only waiting a chance to prove it in the trenches.

Mrs. W. F. Crews, Macon St., Franklinton, N. C. says: "I had trouble from my kidneys nearly all my life. My back pained me severely and felt as though it were broken. Awful twinges came through my kidneys and I couldn't move until the pains let up. I had dizzy and nervous spells. I passed gravel stones the size of large peas and I nearly went insane. I finally began using Dean's Kidney Pills and the first box helped me. A couple of boxes strengthened my back and kidneys and removed all the trouble. I don't have trouble from stones in my bladder any more."
