

U. S. HEALTH SERVICE ISSUES WARNING

Increase in All Respiratory Dis- eases After the Influenza Epidemic Probable.

Influenza Expected to Lurk for Months. How to Guard Against Pneumonia. Common Colds Highly Catching—Im- portance of Suitable Clothing—Could Save 100,000 Lives.

Washington, D. C.—With the subsidence of the epidemic of influenza the attention of health officers is directed to pneumonia, bronchitis and other diseases of the respiratory system which readily cause a large number of deaths, especially during the winter months. According to the U. S. Public Health Service, the influenza epidemic in the United States has been the most severe in the history of the country, and it is expected that the influenza epidemic will be followed by a large number of deaths from pneumonia, bronchitis and other diseases of the respiratory system.

The influenza epidemic has been followed by a large number of deaths from pneumonia, bronchitis and other diseases of the respiratory system. It is expected that the influenza epidemic will be followed by a large number of deaths from pneumonia, bronchitis and other diseases of the respiratory system.
