SHE KEPT THEM ON THE JOB

PROVED SPIRIT OF DEMOCRACY

Voluntary Basis of Food Saving Showed Heart of America Beat True for Freedom.

To the voluntary service and sacrifice of the American people must be attributed the continued health, strength and morale of the Allied armies and the civil populace.

Upon this spirit of service and sac-rifice will depend Europe's fate in the months to come. In the past year we have carried out an export program, the magnitude of which is almost beyoud comprehension. But with the new demands that have come, with the liberation of nations freed from German oppression, our exports must be almost doubled. Instead of 11,820,-000 tons, we must ship twenty million tons of food to Europe in the coming year—as much as can be pushed through our ports.

If the Allies had not been fed by sible for them to maintain their deagainst Germany.

Meeting this world need on a purely voluntary basis, the American people have conclusively proved that democracy is a success and that in time of need it will rise to its own defense.

If there were no other accomplish-ment to its credit the very fact that it has shown the strength of democracy has in itself more than justified the existence of the Food Administration in the eyes of the world.

Less than four months after the United States declared war the United States Food Administrator expressed his determination to meet America's food problem on a basis of yoluntary action and reiterated his confidence that awakened democracy would prove irresistible.

"Many thinking Americans," said Mr. Hoover, "and the whole world have been watching anxiously the last four months in the fear that demo-cratic America could not organize to meet autocratic Germany. Germany has been confident that it could not be Contrary proof is immediately at our door, and our people have al-ready demonstrated their ability to mobilize, organize, endure and prepare voluntarily and efficiently in many di-rections and upon the mere word of inspiration aside from the remarkable assemblage of our Army and finances."

The history of the Food Administra-tion has clearly shown that the trust of those who put their faith in democ racy has not been misplaced.

SAVE 16,000.000 BUSHELS OF WHEAT THAT FORMERLY WAS LOST IN THRESHING

Farmers, Urged by Food Administre tion, Provide Seven Extra Loaves of Bread for Every American.

By adopting cleaner threshing methods and by literally combing harvest fields to gather grain formerly wast-ed, threshermen and farmers of the United States this year saved fully 16,000,000 bushels of wheat, estimated as equivalent to about seven one-pound looves of bread for every person, in loaves of bread for every person in the country. This result, accompanied by corresponding savings of barley, cats, rye and other grains, is shown by reports from 38 grain states to the U. S. Food Administration. Other states, although not prepared to furnish definite figures of conservation in the grain fields, report greatly reduced harvest losses.

This rural food saving achievement, accomplished in scarcely six months' time, was in direct response to re-quests by the Food Administration, which asked farmers and threshermen to reduce barvest losses from about

in normal times—to the lowest possi-ble minimum. Country grain threshing committees carried into every grain growing community the official recommendations for accomplishing It Is A Case For

the results desired.
In numerous instances drivers of racks with leaky bottoms were sent from the fields to repair their equipment and frequently bad order thresh-ing machines were stopped until the cause of waste was removed. But in proportion to the number of persons engaged in gathering the nation's grain crop, cases of compulsion were com-paratively rare. The Food Administration freely attributes the success of the grain threshing campaign to patriotic service by farmers, thresher-men and their crews. Incidentally grain growers of the United States are millions of dollars "in pocket" as a result of the grain saved.

The marvel of our voluntary food aving, now that we are "getting results," is that no one ever actually suffered any hardship from it; that we all are better in health and spirit and better satisfied with ourselves be cause of our friendly self-denial

Food control in America held the price of breadstuffs steady, prevented vicious speculation and extortion and preserved tranquillity at home.

In no other nation is there so willing a sense of voluntary self-sacrifice as in America—that was shown in the abstinence from wheat.

Find more wheat, it came; more pork, it came; save sugar, it was done. So Americans answered the challenge of German starvation.

Good will rules the new world as fear governed the old world. Through sharing food America helps make the
