

### GLAD TO TESTIFY

Says Watoga Lady, "As To What Cardui Has Done For Me, So As To Help Others."

Watoga, W. Va.—Mrs. S. W. Caldwell, of this town, says: "When about 15 years of age, I suffered greatly... Sometimes would go a month or two, and I had terrible headache, backache, and I had down pains, and would just drag and had no appetite. Then... It would last... two weeks, and was so weakening, and my health was awful."

My mother bought me a bottle of Cardui, and I began to improve after taking the first bottle, so I kept it up till I took three... I gained, and was well and strong, and I owe it all to Cardui.

I am married now and have 3 children... Have never had to have a doctor for female trouble, and just resort to Cardui if I need a tonic. I am glad to testify to what it has done for me, so as to help others."

If you are nervous or weak, have headaches, backaches, or any of the other ailments so common to women, why not give Cardui a trial? Recommended by many physicians. In use over 40 years. Begin taking Cardui today. It may be the very medicine you need.

### ADVICE TO "FLU" CONVALESCENTS

#### SPAIN AND ENGLAND REPORT INCREASE IN TUBERCULOSIS AFTER INFLUENZA EPIDEMIC.

#### U. S. Public Health Service Warns Public Against Tuberculosis. One Million Cases Tubercu- losis in United States—Each a Source of Danger.

Influenza Convalescents Should Have  
Lungs Examined—Colds Which Hang  
On Often Beginning of Tuberculosis.

Is Recognized Early—Patent Medi-  
cines Not to Be Trusted.

- \* fluenza. No need to worry if \*

- \* ine your lungs several times at \*

- \* enjoy life. \*
- \*\*\*\*\*

Washington, D. C.—(Special).—Ac-  
cording to a report made to the United  
States Public Health Service, the epi-  
demic of influenza in Spain has al-  
ready caused an increase in the pre-  
valence and deaths from pulmonary tu-  
berculosis. A similar association be-  
tween influenza and tuberculosis was  
recently made by Sir Arthur New-  
holme, the chief medical officer of the  
English public health service. In his  
analysis of the tuberculosis death rate  
in England.

In order that the people of the United  
States may profit by the experience  
of other countries Surgeon General  
Rupert Blue of the United States Public  
Health Service has just issued a  
warning emphasizing the need of spe-  
cial precautions at the present time.  
"Experience seems to indicate," says  
the Surgeon General, "that persons  
whose resistance has been weakened  
by an attack of influenza are peculiar-  
ly susceptible to tuberculosis. With  
millions of its people recently affected  
with influenza this country now of-  
fers conditions favoring the spread of  
tuberculosis."

#### One Million Consumptives in the United States.

"Then you consider this a serious  
menace?" was asked. "In my opinion  
it is, though I hasten to add it is dis-  
tinctly one against which the people  
can guard. So far as one can estimate  
there are at present about one million  
cases of tuberculosis in the United  
States. There is unfortunately no  
complete census available to show ex-  
actly the number of tuberculosis per-  
sons in each state except in the case of  
most of the states have made the dis-  
ease reportable. In New York city,  
where reporting has been in force for  
many years, over 35,000 cases of tu-  
berculosis are registered with the De-  
partment of Health. Those familiar  
with the situation believe that the ad-  
dition of unrecognized and unreported  
cases would make the number nearer  
50,000. The very careful health sur-  
vey conducted during the past two  
years in Framingham, Mass., revealed  
200 cases of tuberculosis in a popula-  
tion of approximately 15,000. If these  
proportions hold true for the United  
States as a whole they would indicate  
that about one in every hundred per-  
sons is tuberculous. Each of these  
constitutes a source of danger to be  
guarded against."

#### What to Do.

In his statement to the public Sur-  
geon General Blue points out how  
those who have had influenza should  
protect themselves against tubercu-  
losis. "All who have recovered from in-  
fluenza," says the Surgeon General,  
"should have their lungs carefully ex-  
amined by a competent physician. In  
fact, it is desirable to have several ex-  
aminations made a month apart. Such  
examinations cannot be made through  
the clothing nor can they be carried  
out in two or three minutes. If the  
lungs are found to be free from tuber-  
culosis every effort should be made to  
keep them so. This can be done by  
right living, good food and plenty of  
fresh air."

#### Danger Signs.

The Surgeon General warned espe-  
cially against certain danger signs,  
such as "decline" and "colds which  
hang on."

These, he explained, were often the  
beginning of tuberculosis. "If you do  
not get well promptly, if your cold  
seems to hang on or your health and  
strength decline, remember that these  
are often the early signs of tubercu-  
losis. Place yourself at once under the  
care of a competent physician. Tuber-  
culosis is curable in the early stages.  
Patent Medicines Dangerous in Tuber-  
culosis.

"Above all do not trust in the mis-  
leading statements of unscrupulous  
patent medicine fakers. There is no  
specific medicine for the cure of tuber-  
culosis. The money spent on such  
medicines is thrown away; it should  
be spent instead for good food and de-  
cent living."
