- CEDAR ROCK HIGH SCHOOL
- News Of Interest To Teachers, Pupils and The Public Generally
- By School Correspondent

On last Thursday evening, Mar. 15 the Senior class and faculty of Cedar Rock high school was delightfully entertained by the Sophomore class, in the school auditorium. The right wing of the auditorium was beautifully decorated in white and lavender, the Senior class colors. At the end of the hall was arranged a figure 23 in the Senior class colors; and beside it was a figure 25, in gold and black, the colors of the Sophomore class. After a number of entertaining games and contests, a salad course was served, this being followed by cream and cake. Each visitor was presented a souvenir of the occasion, in the unique manner of first being given a verse containing a description of the souvenir and the place in the room where it would be found.

Mr. Dewey Fisher and Miss Sallie Lancaster were united in marriage Sunday, March 18. After their wedding tour they will make their home in Castalia.

A number of the Cedar Rock people attended the community singing at White Level Sunday.

"Everybody knows that the sun has spots on it, and yet some people always expect a ten year old boy to be about perfect."

Miss Bernice Smith spent last week end at the home of Miss Lucy Tharrington, near Hickory Rock.

Mr. Gray Byrd Murphy has returned from an extended visit to Richmond. He reports a fine time.

Miss Elizabeth Long spent the week end visiting friends in Mapleville.

With the victory at Youngsville Saturday night, Mar. 10, the Cedar Rock basketball quint closed a most successful season. Since the opening of the basketball season after Christmas, the team has played a total of 18 games and has won twelve. Most of those lost were at the beginning of the season. The team has played every high school team in the county, with the exception of Franklinton and Youngsville. Youngsville's Army team being played and defeated instead of the high school. At least one game has been won from the following teams: Louisburg, Bunn, Justice, Epsom and Ingleside high schools, Castalia All-Stars Justice All-Stars and Youngsville Army team. Out of the 18 games the team has made a total of 344 points while a total of 299 has been scored against them. They closed the season with four successive victories to their credit. The following men have been awarded their letters, after meeting requirements as to school work and number of games: Jennings, and Dickens, Forwards; Sturdivant, Center; Bledsoe and Leonard, Guards.

The team was greatly handicapped in the beginning of the season in that many of the players had never played basketball before this year, but it bids fair with continued improvement, to give some one a close race for county championship next year. It is hoped that we may be able to have an indoor gymnasium and basketball court near the school building by the opening of the season next year.

"No one is useless in this world who lightens the burden of it to anyone else."

The third basketball team of Cedar Rock closed their season with two successive victories, the first one the Castalia quint, and the second over the Justice team last Thursday afternoon.

Read the notice of prizes offered at the Music Carnival here March 30, and tune up that instrument and get in practice for they are all going to be here that night. Come and bring your friends. Admission 25 and 35c.

Student Editorial—SCHOOL LIFE
By Mary Gardner, 10th Grade
Most of us enter school when we are between the ages of six and ten, and we do not always begin the right kind of school life. Some of us begin school life with a determination to win what there is to be won. We make a resolution to gain what is worth while in life. We think of our school life as being the real beginning of our life of work and the making of our career. We are striving with the utmost strength and confidence to overcome the trifling things and gain those that will be a benefit to us and our fellowmen. For we know that this beautiful school life is a short one and we must make the best possible use of our time. The days and opportunities of the past can never be recalled; so we must use the present. On the other hand we have some others enter school with apparently no purpose or determination, but come and drag over

New Ambition For Nervous People

The great nerve tonic that will put vigor, vim and vitality into nervous, tired out, all in, despondent people in a few days is the celebrated Prunivone. Anyone can buy a bottle, it is inexpensive and L. E. Scoggin is selling Prunivone in such large quantities, that it proves that it is a remedy of unusual merit.

Thousands praise it for general debility, nervous prostration, mental depression and unstrung nerves, caused by overindulgence in alcohol, tobacco, or overwork of any kind.

As a brain food or for any affliction of the nervous system Prunivone is unsurpassed, while for hysteria, trembling and neuralgia it is simply splendid. Mail orders filled for out of town customers.

their work in the laziest way possible and never try to improve or build up their school. They sometimes think of it as time wasted that they can do without the wonderful things that they learn in school. But when their school days are past they often realize the mistake they have made.

School life is a precious life, and should not be wasted. In school we are not only drilled and taught in mental things but physical things as well. In school we learn to be friends and by being a friend we make friends.

If we start our school life in the right way we start with a jug that is to be filled from the fountain of life. Our jugs are not always alike; some are of rough clay, while others are smooth, but each one of us is working to get it filled, the when our school days are over it will not be filled, but it will contain a portion that will help us through our toils and duties of life.

Lavoisier Chemical Society

ALCOHOL—by Mattie Glasgow
A great many kinds of alcohols are known. Ethyl (CHOH 25) and Methyl (CHOH 3) are the most important of all. Methyl alcohol (wood alcohol) is formed when wood is heated in the absence of air, this is why it is called wood alcohol. It is a colorless liquid, which boils at 57° and burns with an almost colorless flame. It is a good solvent for organic substances and used extensively in the manufacture of varnishes. It is quite poisonous, and it acts upon the optic nerve, and many persons have become blind from drinking the liquid or from repeatedly inhaling its vapor. Wood alcohol is the simplest form, known in the markets. It has an unpleasant taste and gives off an offensive odor. Because of its cheapness it is used extensively as a substitute for common alcohol.

Fermentation of sugar or of saccharine matter is the only source of alcohol. Some plants contain free sugar, and others are rich in starch that can be converted into sugar. Common spirits such as brandy, whiskey and others contain from forty to sixty per cent of alcohol. In other words, they are about half water and half alcohol. The milder beverages such as beer, cider and the light wines, contain from four to fifteen per cent of alcohol. The water may be extracted from the alcohol by a second or third distillation, or by mixing with the alcohol fused chloride of calcium, quick lime, or fused carbonate of potash.

Ethyl alcohol is a colorless liquid with a pleasant odor, and is an excellent solvent for many organic substances. It boils at 78.3°. It is sometimes used as a fuel, since its flame is very hot and does not deposit carbon as the flame from oil does. When taken into the system in small quantities it causes intoxication; in larger quantities it acts as a poison. The ordinary alcohol of the druggist contains about 95 per cent alcohol and 5 per cent water. A solution containing 99 per cent or more of alcohol is called absolute alcohol. When alcohol is heated with sulfuric acid, a low boiling inflammable liquid known as ether is formed. Which is used largely as an anaesthetic in surgical operations.

Luke Reilly Says, "The Rat Died Before Reaching the River"

"Since moving near the river 2 years ago, we've always used RAT-SNAP. Watched a vicious water rat, nibbling at RAT-SNAP outside the house. About 15 minutes later he darted off for the water, to cool his burning stomach, but he died before reaching it." Three sizes, 35c, 65c, \$1.25. Sold and guaranteed by Cash Grocery and Market.

It's the wonderful flavor in the biscuit that makes WILLIAM TELL Flour so popular.

THAT BAD BACK

Do you have a dull, steady ache in the small of the back—sharp, stabbing twinges when stooping or lifting—distressing urinary disorders? For bad back and weakened kidneys Louisburg residents recommend Doan's Kidney Pills. Read this Louisburg statement.
Mrs. J. E. Ferguson, Church St., says: "I had a great deal of heavy work and I over-did. My back became weak and mornings I had a dull, aggravating pain across my kidneys. This dull misery bothered me all day long and the longer I stood, the worse the trouble became. When I stooped a sharp twinge shot across the small of my back and at times I had dizzy spells and dark spots appeared before my eyes. On a friend's advice I procured Doan's Kidney Pills and several boxes of Doan's removed the trouble. I haven't a speck of that kind since."
Price 60c, at all dealers. Don't simply ask for a kidney remedy—get Doan's Kidney Pills—the same that Ferguson had. Foster-Milburn Co., Buffalo, N. Y.

31,646 Stars Built By Durant To March 1

NEW YORK, March 18—Durant Motors reports that on March 1 a total of 31,646 Star cars had been produced in the three months the various factories have been turning out this line.

The February count was 10,794, while March is expected to produce 15,000. In April the schedule calls for 20,000. The red letter day in production so far was Feb. 23, when 852 were manufactured, while on Feb. 28 a shipping record was broken when 912 were sent out to distributors. It is expected production will reach 1000 a day inside the next three weeks.

Equipment is being installed in the new Flint plant and it is expected it will take sixty days to complete the job. Production on the new Princeton car, which will be turned out from the Muncie plant, is expected to start in about ninety days.—Motor World.
