**How Thin People Obtain a
Plump, Strong,
Robust Body**

"Before I took Prunitone people used to call me 'skinny' but now my name is changed. My whole body is stout. Have gained 15 lbs. and am gaining yet. I look like a new man," declared F. P. Smith, Pittsburg, Pa., who had just finished the Prunitone treatment.

Would you, too, like to quickly put from 10 to 30 lbs. of good solid "stay-there" flesh, fat and muscular tissue between your skin and bones?

Don't say it can't be done. Try Prunitone and prove what it can do for you. L. E. Scoggin is selling a good deal of Prunitone, and is giving universal satisfaction.

More than a half a million thin men and women have gladly made this test and that Prunitone does succeed, does make thin folks fat, even where all else has failed, is best proved by the tremendous business we have done. No drastic diet, flesh creams, massage, oils or emulsions, but a simple, harmless remedy that is pleasant to take and effective in results.

Take Prunitone with your meals, and watch it work. This test will tell the story.

**BUY SWEET POTATOES
NEXT WEEK**

April 16 to 21 is "North Carolina Sweet Potato Week."

Raleigh, N. C. April 10—Designating the week of April 16 to 21 as "Sweet Potato Week" in North Carolina, the Agricultural Extension Service of the North Carolina State College and State Department of Agriculture urges every consumer and every household to buy at least one bushel of sweet potatoes during this period. As a reason of setting aside a week for a campaign of this kind, the Division of Markets states that farmers in certain sections of North Carolina have been forced to seek new money crops on account of damage to cotton by the boll weevil and to tobacco by wilt disease. A large number of them turned to the sweet potato and the production has been somewhat out of proportion to the present demand. In several sections of North Carolina, states Mr. Gorrel Shumaker, acting chief of the Divisions of Markets, the farmers have made considerable investments in storage houses to keep the potatoes in good condition for the spring trade.

They have a quantity of these potatoes on hand and it is absolutely necessary that some of the holdings be converted into cash before farming operations for the coming year can be inaugurated.

The Division of Markets, says Mr. Shumaker, is eager to find a market for this surplus of potatoes, especially in the stricken areas, because it realizes the plight that some of these people find themselves in. The Division has secured a list of parties from whom good sweet potatoes may be secured and grocery stores and other concerns desiring to stock up for "Sweet Potato Week" can get this list on application to the division at Raleigh.

Mr. Shumaker states that in setting aside this week of April 16 to 21 as a special time for selling and consuming sweet potatoes, his division is urging growers to use the utmost care in grading to see that only the best of potatoes are offered for sale. Further, the growers are asked to make only a reasonable charge per bushel so that every family in North Carolina may purchase a supply. Dealers will be asked to sell the roots on the lowest possible margin of profit and to depend on the quantity of sales to compensate for the extra trouble in pushing this product. Some stores have already made arrangements to not only sell for the growers without charge but also to use their own paid space for

advertising the potatoes. The movement as initiated has the hearty endorsement of Director B. W. Kilgore of the Agricultural Extension Service, as well as the various divisions and organizations of the State College and Department of Agriculture. The State Federation of Sweet Potato Storage Houses, the Agricultural and Industrial Development Service of the Atlantic Coast Line Railroad and various other civic and business organizations have given their full approval and are helping to put the movement across.
