THE FRANKLIN TIMES . F. JOHNSON, Editor and Manager Que Year \$1.50 Eight Months 1.00 Months75 m Months56 Foreign Advertising Representative

Entered at the Post Office at Louis arg, N. C., as second class matter.

Hon. Oscar W. Underwood, of Ala bama, has indicated that he would accept the nomination for President in 1924 if given him.

The States deficit on December 31, 1922, as given out by the Auditors on a cash basis was \$2,863,068.88. This seems to be quite a big jump from the first figures.

The attention of some of our people who are continually kicking about taxes, is directed to the per capita tax burden of our neighboring counties, as published in the University News Letter, which are as follows: Wake \$10.00, Nash \$11.60, Vance \$10.80, Granville \$8.39, Warren \$7.91, Wilson \$16.10. Compare this with your own county Franklin, \$9.93 and you will see that others pay as much and more than we do.

Judge Beam, of Franklin County Kecorder's Court is to be congratulated upon the manner in which he conducted his Court on last Monday, disrosing of thirty-four cases. He so managed his decisions that the greatest satisfaction prevailed and a great good was accomplished in instilling the proper respect for law. At the beginning he convinced the defendants and the spectators that he had a determination to give sentences that would produce the desired results, and as a result no appeals were taken. In the case of the changes of sen tence it was done upon recommendation of the prosecution. This days work will no doubt mean much for Fianklin, and the people are indebte to Judge Beam for the wholesome spirit he has encouraged.

LOOK AFTER THE BOLL WEEVHL

From the reports being received in Louisburg there are many sections of Franklin County infected with boll weevils. In every case where they have appeared the squares that have fallen off should be carefully picked up every morning and burned. It would be well to keep plowing your cotton as long as you can as this will assist in destroying them by covering the squares with dirt which becomes too hot for them to survive in these long hot days. It would also he well to dust with calcium arsenate. In using this poison the greatest care should be taken as it is deadly poison. Do not let your stock come in contact with it. Remember that the work done now is of value, but if it is put off it will become a very ex-

pensive delay. The controll you take of the weevil this year will be of

greatest assistance in the future.

THE TAX PROBLEM

We believe the greatest problem before the American people today is the problem of taxation, says the Shena-doah, Ia., Sentinel Post.

Two same methods of relief are open. First discourage new govern-mental and fancies which add unneces sary laws to our statue books with increased numbers of employes and more government overhead. Official-ism apreads like the green bay tree if left to its own course, so trim it down to essentials.

Second, see that all property pays taxes equally, which it does not do at present. Under our existing laws person is at liberty to convert

any person is at liberty to convert his property into non-taxable bonds and thus escape all forms of taxation. The necessity (if it ever existed) for tax-exempt bond is past and the day is here when no such loophole as this should remain to enable those must be to use to such a statistic

as the should remain to enable those most able to pay to escape taxation. Every dollar that tax-exempt bonds absorb cuts two ways—it doubles the tax on other people and removes a dollar from industries which need it for emanging and development for expansion and development.
