Will Fly MacMillan to Pole

Above are the four U. S. flyers who have volunteered to fly Mac-Millan to the North Pole this summer, "which event," says the noted explorer, "will result either in success or death on the great ice wastes on the north." The flyers are, (above) E. E. Reber and A. C. Nold. (Below) Commander Richard E. Byrd and Lt. G. T. Owen.

Involving Farm Problems Effecting Franklin County.

PARMERS QUESTIONS

Answered by Cole Savage, . County Agent

Cotton planting began the middle of April this year and before the first of May many farmers had finished plant. Those who have not finished are busy planting this week and will have finished by Saturday night. Unless planting over is necessary most of Franklin Count'sy cotton will have been planted by Saturday night.

The early cotton plantings are coming up. The cool weather a few days ago checked its progress but it seems to be standing the unfavorable weath-

The preparation for this year's crop is the best it has been in years, so the oldest farmers say. Some of the last breakings have broken up cloddy due to the drowth but most of the land is in excellent condition.

The cloudy weather of last week was favorable for setting tobacco plants and many fields were busy with plant setters. In the Southern part

Plant shortage is a common com-plaint throughout the county, espec-ially around Epsom. Some few would-be tobacco fields are being planted to cotton but not enough to materially educe the tobacco acreage.

The early plantings of corn are coming up but are not large enough to start cultivation. The cool weather has slapped its growth in the face but has not damaged the stands thus far. The corn prospects are good.

Annual clover is cut in half this year. The Spring drouth is the principal cause of this reduction. An inder_watered plant has been attacked by clover insects and clover stem ot which added to the shortage,

Cutting of the better clover growths egan a few days ago.

The home-made crusher built by G. 2. Harris and B. F. Daughety and demonstrated on the Court House Square is proving to be a very popular labor saving device with nitrate of soda users over the county. 19 other crushers have been reported as made since this one was first shown a few weeks ago. Doubtless there are others which have been made but have not been reported. If such is the case please tell the county agent about yours at once. He wants a complete list of those making such crushers with their opinion of the same. Those

reported to date are as follows: C. M. Howard, Louisburg. Dr. C. H. Banks, Franklinton, R 2. P. S. Allen, Louisburg. W. D. Egerton, Louisburg. R. Earl, Louisburg, R 4.

Dr. D. T. Smithwick, Louisburg. DR. W. R. CLIFTON, NOW PRESI-DENT OF BEHRENS DRUG, HAS SERVED LONG AND WELL DURING ITS FORTY YEARS

C. P. Harris, Bunn, R 1.

Dr. W. R. Clifton, president of the Behrens Drug Company, was one of he first subscribers to the stockhas been connected with it in impor-

tant capacities since its organization. Dr. Clifton has been director, chair. man of the board and president, and is perhaps as familiar with the history of the business as any man who has ever had to do with this business concern, which from the very beginning gave evidence of its solidarity and business popularity.

While Dr. Clifton could not be induced to say so, it is nevertheless a fact, admitted by officials of the company, that his wise counsel has had as much to do with its success in recent years as have the efforts of any other one man. He has taken a deep interest in the affairs of the company, and has always been ready to back his

judgment with his money.

Dr. Clifton has been quite successful in his other business ventures also, and owns stock in very many of the ongoing concerns of the city, one of these being the Clifton Manufacturing company, which has had a conspicu-ously successful career, and which is being handled so ably by Albert T. Clifton, son of Dr. Clifton. A genius for business enterprise has been shown clearly by Dr. Clifton, and his business acquaintances in Waco have N. C., attended school there and also always eagerly sought his cooperation and counsel.

He also has been most liberal in community enterprises, and the steady growth of Waco has been due to his efforts and to the efforts of men like

A good many years ago Dr. Clifton became interested in Red Poll cattle, and, having a large farm north Waco, this was stocked with such cat. tle, the fame of which spread over a wide area. In fact, many credit Dr. Clifton with being the man who really introduced the Red Poll cattle into Texas and several other states in the southwest. He also, in the nineties, shipped a car of these cattle to the Republic of Salvador, Central America, which was a great help in the breeding of better stock in that country.

Later he sold his farm and disposed of the cattle to J. W. Mann who has made a great success with them. Mr. Mann's stock farm is five miles south

of Waco. Dr. Clifton was born in Louisburg,

Editor and General Manager
WILL ROGERS

NEW YORK is building some more of those subways under the ground. No use building any more, people can't find their way out of the ones they got now. There's people down underground in New York that haven't been up for years. New York people are just like a lot of Gophers; every time they see a hole in the ground they grab a nickel and duck for it.
If they keep on living underground, in two more generations their children will have fur like a rat.

What's this Subway got to do with 'Bull' Durham?

What do people outside New York care about how New Yorkers live?

But there is an old saying that one half the world don't know how the other half live, so I am telling you how they live, not as an Ad but as a fact. Five million Ground Hogs in New York rush through life missing one Train and being shoved into the next. The real trouble is that they can't smoke 'Bull' Dur-

Thee Rogers

P. S. I'm going to write some more pieces that will appear in this paper. Keep looking for them.

SIXTY-FIVE YEARS AGO!

In 1860 a blend of tobacco was born—'Bull' Durham. On quality alone it has won recognition wherever tobacco is known. It still offers the public this— more flavor, more enjoy-ment and a lot more money left at the end of a week's smoking.

graduated at Baltimore dental college. He practiced dentistry with very great success for several decades after coming to Waco, and his skilled services were not only worth much to this whole section, but also quite remun. erative to him. He came to Texas in 1870 and to Waco in 1871. Few men here are more widely Waco News.

"It's a good thing to have someone to think up ways so we won't have to work so hard," said a colored tenant farmer at one of the recent soda crush-er demonstrations in Franklin Coun-ty. He was referring, of course, to the home-made soda crusher as a time and labor saver.

"My men say the soda crusher has been worth \$25.00 to them this year," says Dr. D. T. Smithwick.
