

## How Doctors Treat Colds and the Flu

To break up a cold overnight or to cut short an attack of grippe, influenza, sore throat or tonsillitis, physicians and druggists are now recommending Calotabs, the purified and refined calomel compound tablet that gives you the effects of calomel and salts combined, without the unpleasant effects of either.

One or two Calotabs at bed-time with a swallow of water—that's all. No salts, no nausea nor the slightest interference with your eating, work or pleasure. Next morning your cold has vanished, your system is thoroughly purified and you are feeling fine with a hearty appetite for breakfast. Eat what you please,—no danger.

Get a family package, containing full directions, only 35 cents. At any drug store. (adv)

## This Week

### THE MONKEYS TRIED IT. IMAGINATION'S POWER. CORN LOW, HOGS HIGH. ZERO WILL HELP.

Charles Garland, an earnest young New Englander, inherited a large fortune, refused at first to take the money, saying no man had a right to money not earned. He changed his mind and drifted onto a sidetrack. Convinced, perhaps, that he was an original thinker, he decided that marriage was an unnecessary institution. Now he is arrested, because a young child born on his farm died, having for its mother an unmarried girl.

The young man should realize that his experience was tried by our alleged simian ancestors for thousands of years before man appeared, and abandoned by our human ancestors of 100,000 years ago.

Not to do away with marriage, but to make men WORTHY of it, is the task of the human race. "Away from the monkey life" is a better motto than "Back to nature."

Imagination is more powerful than fact. James Dempsey, not the Dempsey you mean, owns a restaurant. Two men entered, held him up, he delivered his money.

A policeman dashed in, arrested the man "pointing the gun" at Dempsey. The only gun was two fingers that had been pointed.

The second man, escaped, came back that afternoon, pointed one finger at Dempsey, and the latter again gave up what money he had.

Corn prices are low, "hogs are high." This puzzles farmers and packers. Corn and hog prices should go up and down together, since the pig is really corn changed into meat. There is always something to puzzle and distress the farmer. He has no sufficient national organization, and after election day he hasn't much influence in government, compared with railroads and other big financial units.

At the midday luncheon club in New York you can see eating at the same time those that control ten thousand millions of dollars. Farmers are scattered all over the land, and if you could get them together there wouldn't be any hall that could hold them.

Uncle Sam is riding along on velvet. Severe competition abroad in the world's markets at home is said to be ahead of our producers. But everything, including Providence, seems to be with us now.

Citizens of Minnesota get from their State University interesting information about their State. It contained the beginning of life on this planet, in the form of algae, two hundred million years ago. The first life came as soon as the earth's temperature fell below the boiling point.

One of the first real animals was an ancestor of our frogs and salamanders, living on land and in water, with a foot four inches in diameter. It is from the five toes of the salamander, you know, that we get the five fingers on each hand, according to the evolutionists.

Mathematicians wish that salamander had had six toes. That would have given us the duodecimal system instead of the decimal system, which is based on our ten fingers and thumbs. The duodecimal system would be a great improvement on the decimal, twelve having four divisors, ten having only two.

Mr. Green, of the American Federation of Labor, predicts an early end of the coal strike, now distressing the East and other parts of the country. The thermometer at zero may help. Americans are "decile," as Northcliffe said. You must pinch their fingers with the cold or pinch their pockets hard to make them take action. And, unlike mine workers and owners, the people are not organized.

**WANTED**  
Agents in every town and village in Franklin County, to solicit orders for Tylers Ideal Fibre Cutters, sample cutter and terms to agents \$1.50. Address J. H. Mullen, Bunn, N. C.

The average farm sheep produced only about two pounds of wool per year a century ago. Now the annual average is about 7 1/2 pounds of wool. This is the result of better breeding.
