New Way to End Dangerous Cough

The most stubborn cough is relieved with the first dose, and is very often broken up entirely in 24 hours by a new method based on the famous Dr. King's New Discovery for Coughs.

Here is the method: You simply take one teaspoonful and hold it in your throat for 15 or 20 seconds before swallowing it. The prescription has a double action. It not only soothes and heals soreness and irritation, but also loosens and removes the phlegm and congestion which are the direct cause of the coughing. So with the cause removed, the severest cough usually disappears quickly.
