HAVE MONEY IN THE BANK AT 4 Per Cent Interest

It's a mighty comfortable feeling to know that all rainy days are provided for by money in the bank drawing 4 per cent interest.

Start now to build up that account here. We'll be glad to talk things over with you in a friendly way.

HORDES OF LOCUSTS DUE TO ARRIVE

Raleigh, June 1.—The seventeen year locust is due to appear in Pie! month North Carolina just about this time. The insect will come in enormous numbers but will probably do little damage except in places where it was abundant 17 years ago.

"This insect always creates a great deal of interest because it appears in such enormous numbers and because it occurs only every 17 years," says Dr. Z. P. Metcalf, head of the department of entomology at State College. "In spite of the enormous number, however, the insect does little damage because it lives primarily in the forests and lays its eggs in forest trees. Occasionally, it may do damage to a young orchard where the trees have been planted in a place where the locust was abundant 17 years ago."

The locust does its principal damage by killing the small branches in which it lays its eggs. Farmers having young trees in such situations as described by Dr. Metcalf are advised to watch carefully and if the locusts appear in abundance to protect the young trees by mosquito netting or tobacco canvas. This can be removed as soon as the locusts disappear.

Dr. Metcalf states that the 17-year locusts are dying out, but they will perhaps be abundant in the upper piedmont and mountain counties this season. Those who find the locusts on their farms will render a service to the entomology workers by sending specimens to State College.

There is a common superstition that the sting of this insect is dangerous or fatal to man. This is not true, explains Dr. Metcalf, because the locust has no sting and cannot injure man.

PAPER-MONEY TO BE MADE MUCH SMALLER

Washington, May 26.—A reduction in the size of paper currency was approved today by Secretary Mellon, who announced that the first of the new form of money probably would be ready for circulation in about a year.

The bills will be reduced about one and one third inches in length and 3-4 of an inch in width, with a lower in manufacturing costs of about \$2,000,000 annually.

Nurse Advises WEAK, RUN-DOWN WOMEN To Take Cardui

"I have known of Cardui for nearly twenty-five years," says Mrs. Selma Meissner, 1072 Harrison Ave., Beaumont, Texas. "During that time, I have taken it several times and have frequently recommended it to others, for it is a splendid medicine and I am glad to give people the benefit of my experience."

"I have been a nurse for several years and have often come in contact with patients who were run-down and weak. Often I have told sufferers of Cardui, and the way I myself had been helped after taking it, and advised them to give it a trial. Many of them have since thanked me for what I told them, so I am willing that other women should know about it, too."

"I first took Cardui because I was awfully run-down. I had no appetite, and was weak and listless. It was hard to keep going under such conditions, and I looked for something which would help me."

"I had read of Cardui and decided to try it. After taking it, I improved so much that I have taken it since whenever I needed a tonic."

Keep Fit!

Good Health Requires Good Elimination.

To be well, you must keep the blood stream free from impurities. If the kidneys lag, allowing body poisons to accumulate, a toxic condition is created. One is apt to feel dull, languid, tired and achy. A nagging headache is sometimes a symptom, with drowsy headaches and dizzy spells. That the kidneys are not functioning properly is often shown by burning or scanty passage of secretions. If you have reason to suspect improper kidney functioning, try Doan's Pills—a tested stimulant diuretic. Users praise them throughout the United States. Ask your neighbor!
