#### Minutes of the L. M. A. Society

On Wednesday afternoon, February 6, 1929, the L. M. A. Society met in the auditorium for a short program. The society was called to order by the president, "Carry me back to old Virginia," was sung by the society. The roll was called and the minutes were read by the secretary after which a very interesting program was rendered with Miss Esther Pearce as group captain.

The program consisted of the following numbers:

Piano solo by Bruce Dodd.  
Story by Bobbie Medlin.  
Reading by Mozelle Ray.  
Duet by Crama Brantley and Eatrice Richardson.

Debate, resolved that examinations should be abolished in high school.  
Affirmative: Estelle Richards, Edith Dickerson. Negative: Katherine Weathers, Ruby Horton.

The affirmative side won with a two to one decision.  
The society then adjourned.

#### The Dramatic Club Writes Original Plays

The Little Theatre Dramatic Club members are writing original plays. Many of the members have their plots and some parts written, but only one has been completed. This one was written by Mary Lee Alford. It has a great many choruses which are being composed by members of the club.

The local high school fans witnessed a very lively contest between the home team and the Franklinton team here February 1. Both teams fought on somewhat equal basis for the first few minutes of the game, but by the end of the first half the visitors were trailing with the little end of the score of 15 to 7. In the second half the Bunn boys showed some real skill in basket ball. The final count was 33 to 15 in favor of the Bunn team. Dickerson lead the scoring of the evening with fourteen points while Ward lead the scoring of the visitors with five

points.

#### Notice

Watch for the definite announcement of "Eyes of Love" in next week's Bunn School News. "Eyes of Love" is a dramatic comedy that has enough fun in it for the whole family, which will be given at Bunn High School sometime soon.

The Bunn High School team won over the Wakelon team tonight by a score of 25 to 16 in a very warm contest. Wakelon early took the lead through the long shots of Privette. The visitors held this lead until the beginning of the second half when the locals came back strong in both defensive and offensive work. The score at the end of the second half was 14 to 11 in favor of the visitors. White for Bunn was high scorer with a count of fourteen points. Strickland for Bunn did some good defensive work. Privette led the visitors with a score of six points.

Bunn, Feb. 8.—Bunn High School won another game within the week from the Bailey High School by a score of 25 to 11. The game was featured by good defensive work on both sides with some moments of rare offensive work by the locals. At the end of the first half the locals were leading by a margin of 14 to 5. Dickerson led the scoring of the evening with nine points. Flowers led the scoring of the visitors with six points.

#### Vocational Agriculture Work

The agriculture boys and teacher, Mr. O'Quinn have been doing some pruning for the people in this community. We have had some days that were too rough to go out pruning. So on these rough days we stay in and take text book work. Every day that the weather is suitable we will be out pruning trees for people in our community. We are planning to do some spraying of fruit trees if any of the people want it done. We are hoping they will. We can already see several orchards that need spraying, but we don't know whether the people will want them sprayed or not. We also have culled a few flocks of birds. We will do more if we are informed to do so.

#### The Soy Bean, Its Culture and Use

The extensive utilization of the soy bean for forage and the increased use of the bean for oil and for human food have resulted in the increase of acreage of the crop.

The climate adaption of the soy bean are about the same as those of corn. The soy bean succeeds best on fertile sandy loam and clay soil. When sown on land not previously planted to this crop it should be inoculated.

The best time for planting soy beans is about that for planting corn. Soy beans may be combined in many ways of crop rotation their crop value being sufficient to encourage the growth of the beans as one of the main crops.

The large yield of seed, the ease of harvesting it and the increasing demand for the bean for planting purpose for food, and for the production of oil and meal, recommend the soy bean for seed production. The growing of seed for feeding will produce at a moderate cost, at least part of the high protein corn concentrates necessary for stock feeding and milk production. The straw obtained from thrashing soybeans for seed is a valuable feed for all kinds of stock. The soy beans makes an excellent hay of high feeding value which is greatly relished by all farm animals. Sometimes as high as 4 tons to the acre are obtained. The variety and palatability of the forms in which the soy beans can be sowed make it a very desirable article of human food and

its use as such is gradually increasing.

No insect or fungous pest has assumed any great economic importance in the culture of the crop. The soy beans can be served make it a very disease caused by an eelworm or nematode which occurs in many of the lighter soils of the South. To plant soy beans on such infertile soil is a very dangerous practice.

#### Cooperative Marketing Keeps Going Forward

Just because our tobacco farmers of Virginia, North Carolina and South Carolina no longer have a cooperative marketing organization, many of them fail to realize that the great, triumphant, world-wide movement for co-operation goes right on without us. Meanwhile the cooperative association are learning better and better methods of doing business. So much is being learned about the right ways to manage cooperative marketing that

(Continued on Page Six)

# Does the gasoline you buy have these qualities?

*It should, if you are a careful buyer...*

All gasoline (unless dyed) looks pretty much alike, but there are certain qualities that make one gasoline better than any other.

"Standard" Gasoline is the best "buy" on the market today, for "Standard" has these outstanding qualities:

**Easy Starting**—even in coldest weather.

**Quick Acceleration**—necessary in traffic.

**Power, Steady and Reliable**—for hill climbing and long, hard runs.

**Mileage Efficiency**—proved over and over by road-tests in every type of car.

**Safety to Motor**—a fuel that cannot possibly injure your engine.

**Complete Combustion**—a fuel that burns cleanly, leaving practically no carbon, and burns completely, leaving no "loose ends" to seep down and dilute the motor oil in the crank case.

**Uniformity**—you can set your carburetor on "Standard" and forget it, for every gallon is like every other gallon wherever you may buy it.

**Availability**—"Standard" Gasoline has the further advantage of being easily obtained, as our red "Standard" pumps are conveniently located throughout the length and breadth of this state.

The Standard Oil Company of New Jersey has had 59 years of experience in refining petroleum. It has a staff of over 300 men engaged solely in research work for the betterment of its products.

So, you can safely depend on "Standard" Gasoline being kept at top quality. If new methods develop further improvements in gasoline, "Standard" will have them.

Buy "Standard," the dependable quality gasoline.

STANDARD OIL COMPANY OF NEW JERSEY

There is no truly "anti-knock" motor fuel being sold, except at a premium price. The best known "anti-knock" fuel is ESSO, the Giant Power Fuel. It is acknowledged by engineers to be in a class by itself—a genuine "anti-knock" fuel, specially made for use in high compression motors, and in motors that are carbonized from long usage. ESSO costs more to make, and has to be sold at a small premium over "Standard" Gasoline, but ESSO gives an extra engine performance never before experienced. On sale only at the Silver ESSO Pumps with the ESSO Globes.
