BUNN SCHOOL NEWS

Chapel Exercises Enjoyed

We have been having some very interesting programs in chapel each morning for the past two weeks. On Friday morning of last week a very interesting program was rendered by the fourth grade. The importance of cleanliness, being the main topic, was greatly stressed all through the program.

This week is National Educational week throughout the state. Different grades have put on programs in chapel emphasizing education. They have been helpful as well as interesting.

The Monday morning exercises were conducted by Rev. Crawford, of the Bunn Baptist church, who gave a splendid talk on the subject, "The Enrichment of Life Through Education." He gave us some good ideas and illustrations which were appreciated by all who were present to hear him.

Tuesday, as we all know, was Armistice Day. On this day all the students and teachers enjoyed the chapel exercises in charge of our principal, Mr. S. L. Bowen, who gave a talk on, "True Patriotism and Education." In his speech he brought out the following points:

1. Education is the individual means by which society shapes its ends and determines its progress. Ex: Prohibition and War.

2. Ten Commandments of True Patriots:—

1. Put good and worthy men into places of power—inferior men danger the essence of power. 2. Enact laws—just and equally laws individual conduct is socially controlled. 3. Enforce laws upon all alike without fear, favor, or delay.

4. Reverence and obey all laws as the political region of the nation. Obedience to laws must be taught in the schools.

5. Learn to think straight and accurately. Lucien Boneparte wrote to his brother, Napoleon: "Public opinion is the greatest force in the world. It is greater than kings". We need enlightened public opinion, it is the native air of a safe democracy.

6. Learn to appreciate solid attainments of national character. "Our republic is the result of all that is great in by gone times." From Marathon when Greece achieved the liberty of Athens, to Rermyne, where the English wrung from the tyrant king, the Magna Charta. All of these strivings are alive in our public today. Our constitution in these ideas evolved, we need to appreciate Washington's work, Jefferson's, Jackson's, Lincoln's, Roosevelt's, and Wilson's.

7. Be tolerant of progressive change, avoid revolution by encouraging evolution. Revolution is destructive, ex: Russia, China, and France.

8. Thou shalt not glorify war. Old teachings and new. There is no glory in war! Germany glorified war—20,000,000 men paid the price. The logic of war is destruction and death.

9. Overcome fear. Fear leads to suspicion, hatred, physical force, and violence. We need to teach the new generation the causes of war and the best way of avoiding conflicts when disputes arise.

10. Develop an intelligent and vital patriotism. Patriotism is one of the noblest impulses and one of the most sovereign traits of a good man.

Sir Walter Scott said, "Breathe there a man with a soul so dead who never to himself hath said, 'This is my own, my native land'." We must teach the rising generation that a man who makes this country worth dying for is as worthy of honor as the man who dies for it.

On Wednesday morning the fifth grade gave a program on health. The exercise gave some very helpful advice such as, the proper kind of food, exercise, and clothing, which one needs in order to be healthy; and the danger for one who fails to follow such requirements was also given.

Willie Kay Bunn.

Obtaining Fruit Trees

In buying fruit trees you should be careful who you buy from so that you will get healthy trees.

It is not wise to buy from a traveling agent, because you can't tell what kind of trees you are getting. The agent doesn't care what he sells just so he makes his sale.

It is best to buy from a nursery, because you can tell what you are getting, and the trees are probably better adapted to the soil you are planning to set them in.

If it is not possible to buy them from a reliable nursery near by. After you receive the trees, and you do not have your land prepared, you should "heel-in" your trees. This is done by digging a trench and standing the trees up in it, in a scattered position, so that moist dirt may be applied to all the roots. Then cover the roots with soil. To make the roots easy to cover turn the body of the plant over to one side and the roots will be more easily covered.

Orchards

Disease of apples and pears are very destructive in all orchards where they are not fought. Home orchards are more commonly neglected than commercial orchards.

The advance class in Agriculture of Bunn High School are going to see that there is some fighting done in the orchards in this community this spring. We are making a study of the most common diseases and pests of apples, in our class work now. In a little while we will begin the fight. We want all those who have orchards to help us, and we will help them to the best of our ability and knowledge.

Our plans are as follows: First, we will collect specimens of insects, and specimens of fruit, twigs, etc., showing the damage done by various diseases and insects. Second, we will identify all of the specimens gathered and learn the control measures

20 Years Suffering Finds Happy Ending

"There wasn't a day for 20 years that my stomach didn't give me trouble. I used to have awful pains

MRS. CORA PETERSON

in my back and sides; my kidneys had me up many times during the night; my liver was inactive and I had severe headaches. I had taken all kinds of medicines and treatments but my first real benefit came through Sargon. I eat and enjoy my food now without a trace of indigestion; I never have to get up nights and all my troubles have disappeared.

"Sargon Pills relieved my of long standing constipation and I haven't had a bilious dizzy spell since I started them."—Mrs. Cora Peterson, 42 Center St., Asheville.

Scoggin's Drug Store, Louisburg; L. W. Henderson's Pharmacy, Franklinton, Agents.

for each. Then we will be ready to advise various members of the community on points for the improvements of their orchard.

Apple scab is probably the worst disease of apples. This fungous growth attack the leaves, small twigs, and the young fruits themselves. The scabby appearance, formed on the fruit, gives origin to the name. The disease lives from one season to another in the form of spores on the trees, and in the leaves under the tree.

The winter spray for Sanfose Scale will destroy many of the winter spores of scab disease. When this is done the orchard should again be sprayed with little sulphur or a Bordeaux mixture, about the time when the buds are opening, and before the blossoms are open.

Watch for discussions of other

insects and diseases in future copies. Anthony May.

Department of Agriculture The advanced class in Agriculture of The Bunn High School, are planning to help the farmers of Bunn and adjoining communities by inoculating different kinds of legume seed.

If land does not contain the proper kind of bacteria artificial inoculation is necessary for the successful growth of certain legume crops. There are two kinds of inoculation, the pure culture method, where the bacteria have been developed or grown in a ratum and by transferring soil from a field that contains the type of bacteria needed.

It has been estimated that sixty per cent of all the failures with crimson clover and vetch are due to the lack of inoculation.

Everette Bunn.

Junior Class Organized

Miss Cline, our chapel monitor, called the Junior class together last Thursday to discuss several subjects of importance. While we were together, we organized our class as follows:

President—Ennis Murphy. Vice-Pres.—Bruce White. Secretary—Louise Williams. Reporter—Juanita Perry.

We sincerely hope that our class will be successful. Officers, do your duties!

Secretary.

Business Arithmetic In the class of Business Arithmetic

tic each pupil is keeping a daily record of his grades. At the end of the semester all the students having their grades exactly correct will have some extra points added to their general average. Ruby Perry.

Contents

The school is putting on a contest for some fertilizer for the shrubbery on the campus. Any kind of fertilizer will be greatly appreciated. The shrubs and flowers are in great need of nourishment. Each grade is to contribute as much fertilizer as possible. The grade contributing the most fertilizer of any kind will receive a prize.

Another campaign is being put on by the Editor of the Zebulon Record. For every subscription renewal the Editor is offering fifty cents for the benefit of the school. The price of the paper is one dollar and half (\$1.50) per year. We want to urge the students to take a vital interest in the contest. If we should get as many as fifty subscriptions the school would receive twenty-five dollars. We are in great need of funds for the library. These funds will be used in bettering the library.

One Cumberland County landlord is furnishing wheat seed to his tenants with the agreement that they shall have all the wheat, except that advanced for seed, if they will plant a crop of lespedeza on the land next spring and give him the resulting hay.

Dangerous Business Our stomach and digestive systems are lined with membrane which is delicate, sensitive and easily injured. It is dangerous business, then, to use medicines containing harsh drugs, salts or minerals, when we are constipated. In addition to the possibility of injuring the lining of our digestive system, these medicines give only temporary relief and may prove habit forming. The safe way to relieve constipation is with HARBIN, the cathartic that is made from licorice and acts in the way nature intended. You can get HARBIN at F. R. Pleasant. Adv.
