IN MEMORY

On Tuesday night January, 13, 1931 the death angel came and took from us one of our dearest friends, Mrs. Pattie Collins. She had been sick for only a few days and bore all of this patiently.

Mrs. Collins was born October, 1861, making her stay on earth 69 years, 2 months and 13 days. It grieves us to have to part from the one we love so dear but we must remember God gave His life for us, and He doeth all things for the best. At the age of 20 she joined Saint Delight church and remained a member until her death.

The funeral was conducted Wednesday

at 2:30 P. M., at Plain View church by Rev. Bun Ferrel and Rev. Charlie Denton. She was then laid to rest in the family burying ground beside her husband amidst many beautiful flowers, a token of respect from her friends.

She leaves to mourn their lost eleven children, a number of grand-children and great-grand children, besides a host of friends, relatives and loved ones.

GLADYS.

After dinner many attractive and useful gifts were presented to Mr. May and Mr. Kemp by little Miss Hazel Kemp.

THE HOME GARDEN SAVES CROP MONEY

Using the average yields and the average prices for cotton and tobacco in 1930, it would have taken more than nine acres of cotton and almost 2 1-2 acres of tobacco to purchase the vegetables which can be grown in a small half-acre garden.

"Half an acre of fertile ground, properly planted and tended will produce enough vegetables for a family of five persons," says E. B. Morrow, extension horticulturist at State College. "These vegetables will cost at least \$225 if bought at retail prices usually prevailing. We have found that the family garden acreage was increased by ten per cent or by 10,000 acres in 1930 over the previous year due largely to the live-at-home movement which gained such popularity last year. This increase represents a potential savings account of around 4 1-2 million dollars and is well worth considering in this period of business depression."

The garden work conducted by the agricultural extension service of State College last year was closely associated with the work in nutrition, says Mr. Morrow. A large number of home demonstration club women kept careful figures as to the amount of vegetables used from their gardens during each month. The idea of building a balanced and nutritious diet by means of certain vegetables from the family garden gained much prominence.

Mr. Morrow says the most popular green or leafy vegetables were cabbage and snap beans, followed closely by green onions and okra. Asparagus, lettuce and spinach were outstanding weaknesses in this group. Cowpeas, lima beans and sweet corn were leaders in the edible seed groups. Of the vegetable fruits, tomatoes led, followed by cucumbers and watermelons. Less than 50 per cent of the women reported using cantaloupes while squash and sweet peppers went above this mark. The most popular root crops were mature onions and Irish potatoes.

Mr. Ferguson, district farm agent, in his recent talk to farmers in the Court house in Louisburg said that Franklin County produces more eggs than it needs and has fewer hens than it needs. Mr. Ferguson pointed out the fact that this condition indicates that Franklin County has some high producing hens. The many flocks in the Franklinton community help to raise this production.

Nash county poultry flocks are leading state in egg laying and profits per bird according to recent tabulations by the poultry extension office at State College.
