

There's A Big Reward For The Rescue

By Albert T. Reid

Resolutions By Seven Paths P. T. A.

Resolved:—1. That we hereby pledge ourselves to work against and vote against any proposal that may be introduced into our district that will in any way hurt or destroy our High School and cripple our elementary school. 2. We also realize that we would get no aid from the State Tax Reduction Fund, if we voted off the extended term, and by having to pay the interest and installments on our indebtedness our local tax rate would be much higher than it is at it stands. 3. We realize that our children are our biggest asset, therefore we do not propose to deny them the privileges of an education and training they would receive by our having and maintaining good schools.

Sees Little Hope For High Cotton

Facing the facts about the cotton crop this fall, leads one to the conclusion that despite the short crop of approximately 11,310,000 bales this year, the carry-over of 13,000,000 bales will give such a supply that high prices for the staple can hardly be expected, says J. F. Criswell, extension economist at State College. The acreage planted to cotton in the United States this year was estimated on September 1 to be 36,161,000 acres which is the smallest acreage since 1923. The estimated production of 11,310,000 bales is the smallest since 1923, also, but the world carry-over is 13,000,000 bales which gives a supply of over 24 million bales. This is exceeded only by the supply of 26 million bales of last year. Considering prices, Mr. Criswell says the supply of 20,400,000 bales in 1930 brought the farmers only 9.5 cents a pound. The supply of 26,200,000 bales in 1931 brought an average of only 5.7 cents a pound. The general business depression might account in part for the low when there was a supply of only prices of these two years but in 1926 23,400,000 bales, the farmer got only 10.9 cents a pound for his crop. Therefore, says Criswell, the supply of over 24 million bales this season does not warrant the grower in expecting high prices. It is true, he says, that business shows some improvement but our present condition with the cotton crop approximates conditions prevailing in 1930 and 1931. Only 12 million bales were consumed during the past year at a time when cotton was lower in price than at any time since 1894. From these facts and figures, Mr. Criswell does not believe that prices this fall will be very far removed from those of the past two years.

Jones vs. Tunney?

T.A.D. (Tad) Jones, former famous Yale football player and coach, is the Republican candidate for congress from 3rd district, New Haven, Conn., a GOP move interpreted as creating a worthy campaign opponent for Gene Tunney who is helping the Democrats in that state.

The hand that rocks the cradle is also the foot that steps on the gas.

For lazy liver, stomach and kidneys, biliousness, indigestion, constipation, headache, colds and fever. 10¢ and 35¢ at dealers.

No one can "inherit" nerves, but anyone can inherit enough money to "afford" them. Everything in its places. The automobile belongs in the garage at least after midnight.

A Reluctant Adventure

Maine's Governor-elect

Governor-elect Louis J. Brann of Maine, the first Democratic governor of the state in 18 years, takes the limelight in Eastern states, the National Committee assigning him speaking dates as a result of the surprising victory.

acting nitrogen fertilizer and when ripe, the grain was cut and threshed with a combine at a cost of \$4 an acre. Mr. Blair says it is only good insurance for all farmers to begin to plan for some supplementary crops. A field of small grain will likely come in handy on every farm and the land may be used next summer to the ordinary field crops if there is no need for the grain.

Sales on the Pitt county curb market at Greenville now total \$6,068.79 for the year, which is about \$1,000 above sales for last year even though price levels for all farm produce have been at a lower figure.

Hoax—I am not surprised to hear that Mrs. Spinks is an ardent spiritualist. She is a woman who always goes to extreme. Joax—Is she? I thought she went to mediums.

Those who take care of the little troubles as they arise never have any big ones. If Uncle Sam must have dirigibles, he shouldn't let them go visiting.

Perennial Lespedeza

Possibly no single crop has created the interest and enthusiasm of as many people as Lespedeza Sericea. From all indications it is deserving of its popularity. It has many of the qualifications of alfalfa, the best in hay plants. Planted in the spring it gives a crop of hay or seed that year. The following year it sends up from one to fifty shoots from the old stalk, similar to alfalfa, and may be cut from 2 to 3 times the following years. The oldest plants in the State are in Rowan County and have been growing four years and still making good yields of hay. This crop is different of alfalfa in its requirements as it does not require a limed soil and will grow on poor soils. One of the largest gatherings if not the largest, ever held studying any lespedeza was held on Thursday, September 22 at Salisbury on the farm of W. D. Graham. The group of 1100 people heard interesting talks by Dr. Moore of the Tenn. Experiment station and Dr. Pieters of the Federal Department of Agriculture, in charge of Forage investigation. Barbecue was served by the Four county mutual exchange to this large group. They told of the plant's unusual growth on poor unlimed soil in dry seasons. A heavy seed yielder reaching a height of five feet if not cut for hay. After the delicious dinner the group visited two three acre fields that were sowed this year, of good growth and seeding remarkably heavy. From these farms the group drove about 10 miles to see fields of 1, 2, 3 and 4 years of age. On this farm there was a 15 acre field, one of the largest in the state. Mr. W. T. Moss of Youngsville, B. B. Pruitt, C. T. Nicholson, G. H. Ferguson and G. L. Winchester of Franklin attended this meeting. Many cities think that the only way to get on the map nowadays is to get on the air. Statement of the Ownership, Management, Etc., Required by the Act of Congress of August 24, 1912. Of The Franklin Times published weekly at Louisburg, N. C., for October 1st, 1933. State of North Carolina—County of Franklin, ss. Before me, a Notary Public in and for the State and county aforesaid, personally appeared A. F. Johnson, who, having been duly sworn according to law, deposes and says that he is the owner and publisher of THE FRANKLIN TIMES and that the following is, to the best of his knowledge and belief, a true statement of the ownership, management, etc., of the aforesaid publication for the date shown in the above caption, required by the Act of August 24, 1912, embodied in section 411, Postal Laws and regulations, to-wit: 1. That the name and address of the publisher, editor, managing editor, and business manager is: A. F. Johnson, Louisburg, N. C. 2. That the owner is: A. F. Johnson, Louisburg, N. C. 3. That the known bondholders, mortgagees, and other security holders owning or holding 1 per cent or more of total amount of bonds, mortgages, or other securities are: None. A. F. JOHNSON, Editor and Manager. Sworn to and subscribed before me this 3rd day of October, 1933. H. T. BARTHOLOMEW, N. P. (My commission expires 5-17-1934.)

Most for Your Money In a Good Laxative Theodor's BLACK-DRAUGHT has been highly regarded for a long, long time, but it is better appreciated now than ever before. People are buying everything more carefully today. In buying Black-Draught, they get the most for their money. It is a good, effective laxative, dependable for the relief of ordinary constipation troubles. 25 or more doses of Theodor's Black-Draught in a 25-cent package. For Children, get pleasant-tasting SYRUP of Theodor's Black-Draught.

TEN AND TWENTY YEARS AGO

Items of Interesting Happenings taken from the columns of THE FRANKLIN TIMES this week ten and twenty years ago:

October 4th, 1912. Mr. H. G. Perry left Monday for Baltimore to again resume his medical studies at the College of Physicians and Surgeons. The Franklin County Farmers' Union met here Thursday in regular session. Big Tobacco sales were had at both warehouses the past week. The prices have been especially satisfactory to all concerned and farmers seem to be bringing in the golden weed for an early market. Mr. Frank Thompson, of Raleigh, architect and Mr. Allred, of Ashboro, builder, have begun work on the elegant new residence of Mr. and Mrs. T. B. Wilder. Franklinton Items: The well on Main Street near S. R. Holmes' beef emporium, which has been out of commission so long, has been turned inside out and large new pipes put in, and when finished there will be a concrete top.

October 6th, 1922. Hon. Josephus Daniels spoke to an immense crowd at the Franklin County Fair on Wednesday, Educational Day. The school parade was the biggest yet and the exhibits fine and in good number. The live stock exhibit was better than usual. After the conclusion of his speech Mr. Daniels and a number of friends were entertained at lunch in the floral hall. Mr. H. F. Mitchell, one of Franklin County's most successful farmers, reports to the FRANKLIN TIMES that he made twenty-two barrels of corn lacking one-half bushel on one acre of land this year. Cotton sold in Louisburg yesterday for 20 3-4 cents per pound. Mr. W. M. Person spent Tuesday in Raleigh, where he argued his famous tax case before the Superior Court.

Drought Hurts Corn; Uses Small Grain

When drought cut the yield of corn on the farm of J. M. Holland of Duplin County, he turned to small grain as a supplementary feed crop to tide him over the storage of corn. Mr. Holland usually produces more than 1,000 bushels of corn each year but this season, he has had no rain hardly since May and the prospective corn yield has been cut at least in half, says Enos C. Stair, extension agronomist at State College. Mr. Holland would be

facing a very serious feed shortage now had it not been for five acres of wheat and five acres of barley which he planted last year. From this acreage he harvested 115 bushels of wheat and 120 bushels of barley or 235 bushels in all. This grain will be used in connection with the corn crop of the present season to supply feed for the Holland livestock this winter. In addition, he expects to plant an additional acreage this fall for grazing early next spring or harvesting as grain, according to his needs. This will carry him through until the harvest of 1933, says Blair. In planting his barley and wheat last fall, Mr. Holland planted in October without fertilizer. In March, he top-dressed the grain with quick-

Nature's Own Secret of Health Revealed

Science Discovers That Good Health Depends on Supplying the System with Necessary Minerals and Vitamins.

Medical Science has discovered that the human body is made up of a very limited number of essential elements. All of these are found in the Mineral Kingdom and in foods in their natural state. To be exact, the healthy human body is composed of eleven Minerals and when these are present, in balanced proportion, we enjoy good health. PROPER FOODS ESSENTIAL. Unfortunately, few of us give any thought to balancing our diets, according to their Mineral content, and therefore we must pay the penalty. A deficiency of these elements brings on Indigestion, Gas, Bloating, Constipation, Headaches, Nervousness and a host of other ills. We soon lose strength, go from bad to worse and become disgusted with life itself. NEW WAY TO HEALTH. For many long years, Physicians and Chemists have been trying to combine, in proper proportion, the eleven essential Minerals with necessary Vitamins. They realized that the preparation must be easily assimilated and supply the system with these elements as necessary to health. SCIENCE TRIUMPHS AGAIN. Fortunately, for all mankind, this tremendous undertaking has met with suc-

cess! Science has perfected a most remarkable formula, known as LEE'S MINERAL COMPOUND. This preparation supplies the system with the eleven essential Minerals, in combination with Vitamins. It is not, in any sense of the word, a "patent" medicine but is more in the nature of a FOOD VITALIZER. It assists Nature, by restoring a proper balance of the Mineral Content of the body and good health follows as a natural result. BIG SURPRISE AWAITS YOU. You who are blue, down cast and depressed over your loss of health. You who have tried many medicines and treatments with little or no relief—take new heart and cheer! Prepare yourselves for the most joyous surprise of your lives. MAKE THIS 10 DAY TEST. Convince Yourself! Stop doing yourself with "patent medicine," harsh purgatives, oils and cathartics for just 10 days. Go to your nearest Drug-Store and secure a bottle of LEE'S MINERAL COMPOUND. Take it regularly, and watch the results. You'll be amazed at the feeling of renewed strength and vigor that soon appears. No narcotics or alcohol to "boost you up" but a natural method of restoring health and energy.

For Sale by SCOGGIN'S DRUG STORE, LOUISBURG, AND GOOD DEALERS EVERYWHERE, or send \$1.25 to Lee's Laboratories, 365 Peachtree Arcade Bldg., Atlanta, Ga., for large bottle, postage paid.

About Loans

"It is the general practice of this bank to demand security for all loans, but if security is not to be furnished then a statement showing the responsibilities of the prospective borrower is demanded. This is necessary not only for the benefit of the Officers and Directors of the bank but for the Examiners of the Banking Department when they examine the bank. "Credit is based to a large extent upon the careful attention which borrowers give to their loans. The 'due date' is the time when every loan should be paid and in case the borrowers desires to extend part of his loan the time to arrange for this is before the due date and not afterwards. This bank insists on this practice being carried out by its customers."

CITIZENS BANK AND TRUST COMPANY. Henderson, N. C. Capital and Surplus—\$500,000.00
