COMMUTATIONS ARE N. G.

Recent escapes from the State's Prison of prisoners who at one time or another had been under sentence of death, suggest a slight change from the custom of commuting the capital sentences of prisoners whose lives governors find it politic to spare.

Instead of granting commutations from death, governors should suspend the death penalty on condition of good behavior.

Then when Mr. Murderer decides to take advantage of good nature by "going over the wall" he will do so in the knowledge that the death chair awaits him when he is captured.—Fayetteville Observer.

Lincoln cotton growers are fighting the cotton caterpillar with the use of calcium arsenate and lime.

Eight new alfalfa growers are reported from Stanly County this fall. The growers will seed from one to 10 acres each.

Timely Farm Questions
Answered at State College

Question: When is the best time to cut lespedeza for seed?

Answer: The Korean variety should be cut about the first of October and the other varieties just after the first hard frost. After being left in the barn for a few weeks the Korean seed is threshed on a grain separator. Seed from the other varieties are harvested with a seed pan attached to the cutter bar of a mowing machine. Plans for building a seed pan may be secured free by writing the Agricultural Editor, State College.

Question: How big a trench silo should I dig to handle silage for 12 cows?

Answer: This depends upon how long your animals are to be fed. The average cow will consume about one cubic foot of silage each day. A silo of silage from three to five inches thick beginning at the top and going to the bottom should be fed daily to prevent spoilage. The suggested dimensions for a silo to take care of 12 cows is 7 feet wide at top, 5 feet wide at bottom, and 6 feet deep. For a 180 day feeding period the silo should be 60 feet long. For a longer feeding period the length should be increased rather than the width or depth.

Question: Can I substitute skim milk or buttermilk for any of the ingredients in your recommended State Laying mash formula

Answer: Skim milk or buttermilk may be substituted for dried milk at the rate of one gallon of milk to each 100 birds. Where as much as three gallons of the skim milk or buttermilk is fed to each 100 birds a days this will take the place of all the dried milk, one-half the fish meal, and one-half the meat meal as recommended. The success of these substitutions depend upon the regular feeding of the milk and unless there is an ample supply so as to make regular feedings no substitutions should be made.

FEED DAIRY COWS CULL SWEET POTATOES

Unmarketable sweet potatoes may be fed to dairy cattle with excellent results, says R. H. Ruffner, head of the animal husbandry department at State College.

Both the tubers and the vines make a good, palatable feed which will produce milk and butter of high quality.

But livestock men can afford to feed only cull potatoes or those which cannot be marketed for human consumption at a fairly good price, Ruffner pointed out.

Sweet potatoes contain about one-fourth the total feed value of an equal weight of corn, consequently, dairymen cannot afford to allow more than one-fourth the price of corn for the sweet potatoes.

Sweet potatoes may be fed cows in place of corn silage. Since

there are 25 pounds of digestible nutrients in 100 pounds of potatoes, while an equal weight of silage contains only 17 pounds, the cows will not need as much potato feed as silage.

When sweet potatoes are fed, the cows should also get eight to ten pounds of legume hay to balance the ration, as potatoes consist mostly of starch and sugar, Ruffner stated.

From 25 to 30 pounds of potatoes a day may be fed the average cow, but it is advisable to feed only five to ten pounds a day at the start. The quantity may be increased gradually as the cows learn to eat the roots.

The sweet potato vines may be grazed off by the cows, or they may be pulled and fed in the barn. Each cow can consume from 50 to 40 pounds of vines a day. Do not allow them to eat more than this amount, Ruffner added.

PHONE 283
FOR FIRST CLASS PRINTING

Over 400 Warren County tobacco growers have signed the new four-year adjustment contract so far.

Randolph Guernsey breeders sold a car of 23 cows, heifers and one bull in Florida last week for \$2,000 net.

COMMON CAUSE OF BALDNESS

One of the chief causes of premature greyness, falling hair and ultimate baldness is lack of circulation in the scalp.

To prevent this and bring an abundant supply of blood to nourish the hair roots, massage scalp at night with Japanese Oil, the antibiotic counter-irritant.

Thousands of men and women forget daily, but results in stopping falling hair, growing new hair on bald areas and in eliminating dandruff and itching scalp.

Japanese Oil costs but 60c at any drug store. Economy size, \$1. FREE "The Truth About the Hair" Write Dept. 34.

Craven Test Indicates New Fertilizing Method

Two demonstrations conducted in Craven County indicate that fertilizer applied to the winter cover crop preceding corn will give better results than fertilizer applied directly to the corn.

In both demonstrations Austrian winter peas were sown last fall and turned under for corn in the spring, reported E. C. Blair, extension agronomist at State College.

On certain plots in each demonstration approximately 400 pounds of fertilizer containing 10 per cent phosphoric acid, four per cent potash, and no nitrogen were applied to the acre before the peas were sown.

No fertilizer whatever was applied to the corn which followed the cover crop winter peas.

On five other plots, no fertilizer was applied to the peas, but 400 pounds of 0-10-4, 400 pounds of 1-8-5, 200 pounds of 2-10-4, 200 pounds of 16 per cent superphosphate, and 200 pounds of colloidal phosphate respectively were applied to the corn per acre.

Although definite results cannot be announced until the corn is harvested, Blair stated that already it is clearly evident that the best yields will come from the fields where all the fertilizer was applied to the winter cover crop.

He also pointed out that fertilizer applied to the cover crop does double duty, since it causes the cover crop to produce a better yield as well as the corn or cotton which follows.

He urged farmers to bear this

OPENING SALE
TUESDAY, SEPT. 17TH
SOUTHSIDE WAREHOUSE
LOUISBURG, N. C.

We are glad to announce to our friends and customers that we will open our warehouse on Tuesday, September 17th for the sale of tobacco. We have been in the warehouse business for forty years right here in Louisburg, therefore we are no strangers to you. You know us and we know you. We are mutual friends. Our warehouse is one of the most modern, best lighted and largest in this section. We have a competent force to serve you.

Sam Meadows and Ernest Pruitt, Sales Managers, can't be beat.

Arch N. Wilson, Assistant Sales Manager.

T. R. Ellis, Auctioneer, none better. W. D. Alford, Book man, always ready to serve you. Numa F. Freeman and Miss Susie Meadows, Assistant Book-keepers. W. B. Spivey and S. C. Alford, Floor Managers. These men will do everything that is possible for your interest. Grover Harris will write your check.

We have a full corps of buyers representing all foreign and domestic companies. Start selling your tobacco this season with us. We will guarantee you to use our best efforts, our experience, our knowledge and our money on every pile of your tobacco and see to it that it sells for the highest market price.

Don't forget our Opening Sale on **TUESDAY, SEPTEMBER 17th.** Bring us a load on that day. When you have tobacco to sell bring it to **THE SOUTHSIDE WAREHOUSE, Louisburg, N. C.** Sam Meadows, Ernest Pruitt and Grover Harris will satisfy you.

Your Friends,
MEADOWS & HARRIS
Southside Warehouse Louisburg, N. Carolina

LEA'S UNION WAREHOUSE, LOUISBURG, N. C.

WE WISH TO ANNOUNCE THAT LEA'S UNION WAREHOUSE, LOUISBURG, N. C.

WILL OPEN ON TUESDAY, SEPTEMBER 17TH, 1935
FOR THE SALE OF TOBACCO

Bring us your first load and we feel sure that we can convince you that we know how to sell your tobacco for the highest market price. By the opening on the 17th we think that weather conditions will be more favorable and that prices will be better. If you will start with us, we will appreciate it and do our very best to please you and sell your entire crop.
