

"My wife likes its smartness and all that extra room—but

THIS V-8 ENGINE'S WHAT OPENED MY EYES!"

Engineers have known for years the undisputed advantages of the V-type engine...simplicity, economy, compactness, ruggedness. But until Ford announced the first Ford V-8 in 1932, no one had found a way to bring these advantages to the low-priced field.

SINCE its introduction this engine has been constantly refined and improved—but the basic features of Ford design have remained unchanged through the production of over two million V-8 engines.

This is the engine that powers the beautiful 1936 Ford V-8... This is the 8-cylinder engine which, because it is V-type and

compact, gives "all that extra room" that many a woman has wondered about in the Ford V-8 body.

This is the engine which proved sparkling performance and eight cylinder smoothness are economical if you have a V-type engine with a dual-down-draft carburetor that takes the "gas" used by a four and splits it into eight equal charges.

This is the engine you need for quick, sure, cold-weather starting this winter—the engine that's "opened the eyes" of over two million enthusiastic Ford owners.

You'll find such an engine in no other car at anywhere near the price of the Ford V-8 for 1936—So why not arrange to drive one today?

The government pays for labor, not materials, on these WPA projects. Materials can't vote. How poor old Eva ever managed to dress without a mirror, the devil only knows. What men call firmness in themselves they call contrariness in others. Recent rains have damaged peanuts still in the stacks in Hertford County.
