AAA Will Protect Contract Signers

The AAA plans to base its 1936 cotton adjustment payments on a rate considerably higher than five cents a pound, according to J. F. Criswell, of State College.

The new cotton contracts stipulate that the minimum payments will be five cents a pound on the average production of the land withdrawn from cotton cultivation.

The exact amount of the adjustment payments next year will be determined by the price of cotton and amount of money available, Criswell said, but it is safe to say the payments will be well above the minimum.

The AAA plans to protect the contract signers in case the price goes down next year, Criswell said, and for this season provision is being made to increase the adjustment payments.

If the Bankhead act is not continued next year, he explained, growers not under contract may expand their production enough to cut the price down to a low level, possibly six or seven cents a pound.

Growers with contracts will receive adjustment payments in addition to the income from the sale of their cotton, and will be able to get a fair return for their crop; Criswell pointed out.

Those without contracts will get only the amount for which they can sell their cotton on the market.

If the Bankhead act is discontinued, he went on, contract signers will be allowed to sell all the cotton they can raise on their allotted acreage.

A grower may adjust his 1936 acreage by 30 to 45 per cent of his base acreage, and receive adjustment payments accordingly.

Timely Farm Questions

Answered at State College

Question: What will be the amount of the first payment made to tobacco growers signing the new contract?

Answer: A minimum payment of \$1.00 per 100 pounds of base tobacco production will be made as soon as possible after the contract is signed. Additional payments will depend upon the price of tobacco, and will be the amount which, when added to the farm price, will bring the returns to not less than parity on the quantity of tobacco used domestically. Tenants and share-croppers will share in the special payments in the same proportion as their interest in the 1936 crop.

Question: How can I get rid of yellow color in eggs from my poultry flock?

Answer: Shell color is inherited and the best way to eliminate the color is not to set any eggs

showing tinted shells. When breeding for future egg producers head your flock with males from a source where this trouble does not exist. If the eggs with colored shells show to a large extent it might be well to do no breeding from the present flock. Keep the present flock for egg production only and get some new breeding stock from another flock that does not produce colored eggs.

Question: How can land be inoculated for growing lespedeza?

Answer: There are various commercial cultures, but a better method is to moisten the seed with molasses and then mix them with soil from a field that has grown lespedeza or some other legume crop such as vetch, Austrian winter peas, or crimson clover. Inoculated soil can also be drilled in at the rate of 200 or more pounds to the acre with the seed. The latter method is best, especially on sandy soils.

A husband and wife were driving along a lonely country road. They had had a spat. A mule brayed.

"One of your relatives?" he asked.

"Yes, by marriage," was her reply.

A man stepped up to a grocer's cigar counter and bought two ten cent cigars. A Scotchman who was waiting to be served pushed forward.

Scotchman: You sell those cigars three for a quarter, don't you?

Grocer: Yes.

Scotchman: Well, here's a nickel, I'll take the other one.

If you can't please three members of one family with one brand of toothpaste how can you expect the government to make one brand that will please a hundred million people?

"A SINCERE MESSAGE TO THE PATRONS OF THIS BANK"

The closing of another year gives us once more the welcome opportunity of greeting you, and of thanking you for your patronage and cooperation.

The surface indications as 1935 ends, record some increase in business activity, and this has had its encouraging effect upon the spirit of the people.

What there may be of good or bad beneath the surface it is, of course, impossible for anyone to see. However, with the Christmas holiday just behind us, and the natural stimulation of hope at the beginning of a new year, most of us will prefer to center our thoughts upon all that is most favorable and hopeful in the immediate economic outlook.

It is our sincere wish for you that in the new year the days of shadow will be few and the days of sunshine, many.

A Bad, Bad Indian Hits Broadway

NEW YORK . . . A bad Indian, a real bad Indian, hit Broadway this week; a giant some nine or ten building stories high. He had a rubber skin and was full of helium gas and was escorted by a great throng of strong-armed men holding tow ropes. When a particularly brisk breeze caught the red-skin at one corner, he almost got out of control but was finally subdued and continued to feature a toyland parade of a department store here.

Old Farm Lady—Something's

the matter with my hens. Nearly every morning I find several lying on the ground cold and stiff and with their legs up in the air. Something's got to be done about this, and I want you to write and tell me what's the matter.

Agricultural College Professor (anxious to help out)—DEAR MRS. P—. Its a plain case. A very simple fatter indeed and self-explanatory. Your hens are dead and there can be no doubt about it.
