Things are taking shape in Franklin County for an interesting campaign this spring. At present the contest creating the most interest in the County is that for Governorship and it seems that McDonald has the lead.

Congress has passed and sent to the President's desk the soldiers bonus bill providing for immediate payment of adjusted compensation certificates. It is expected the President will affix his signature right

Efforts at curbing the power of the Supreme Court have begun in both houses, according to reports coming from Washington. Any action along this line will be exceedingly dangerous to our Democratic form of gov-

Governor O. K. Allen of Louisiana will fill the unexpired term in the United States Senate of the late Huey Long, whose every wish he once was willing to answer, as a result of Tuesday's Democratic primary vote. With Allen swept to victory the entire pro-Long ticket of Louisiana, which admirers claim is a direct slap at the New Deal.

### UNEMPLOYMENT

It is quite clear that nobody has any exact information of the number of employable persons still unemployed in the United States. That is, the number who would take jobs if they were available. To the claim that there are still eleven million industrial workers unemployed, the reply has lately been made, based upon Government statistics, that at no time, even at the peak of prosperity, did industry ever employ more than nine million persons, and as there are now more than seven million on industrial payrolls, the unemployment in that field cannot a mount to more than two million.

In one sense, of course, all of the persons on relief are unemployed. But it does not follow that all of them were employed before they went on relief. In the best of times there have always been five or six million persons without jobs, either because they preferred not to work or were unable, for various reasons, to attach themselves to payrolls. A large proportion of these have always been recipients of charitable relief, and it is impossible to imagine a situation in which there will not be a very large number of people who will depend for subsistence upon the generosity of public or private relief organizations.

In the meantime, however, more people are going back to work every day and the outlook is hopeful for a job within a year or so for everybody who is willing and able to work.

### **PROPAGANDA**

We hear more and more about "propaganda." The word has come to have a sinister implication. It is loosely applied to any effort of any kind to influence public opinion. To those who don't agree with the point of view of the propagandist, his efforts are vicious and should be suppressed. To those who do agree with his opinion, he is a praiseworthy apostle of a highly laudable doctrine.

There never has been a time and there never will be a time when individuals, groups and organizations holding certain things to be true will not attempt to convince others of their truth. The very word "propaganda" was first used to describe the efforts of the Christian church to spread—that is to propagate—the doctrines of Christianity. Doubtless there are atheists and others who consider even that noble purpose an entirely vicious one. And beyond doubt, a great deal of propaganda has been carried on in recent years for entirely selfish

and often sordid purposes.

Propaganda in the real sense is an effort to educate. There can be no honest quarrel with the desire of anyone to convert others to his way of thinking. The real quar-rel with propaganda arises from the subtle and under-hand methods which are too often used. Propaganda conducted in the open, with the motives and purposes behind it clearly disclosed, is a sound and legitimate method. It is only when the identity and motives of the propagandists are concealed that it becomes danger-

SOIL CONSERVATION WORK Farm Tenancy Increasing IN FRANKLIN COUNTY

Congress has appropriated a definite sum of money for soil conservation work throughout the United States. Fortunately through the efforts of some of the leading farmers and business men extension workers and teachers of agriculture of Franklin County, a branch of the Soil Conservation Service has been established in this county with headquarters at Franklinton.

Through the activities of this unit there is available for erossion control and soil conservation work on farms of the area, 300 local men whose work is confined to the Buffalo and Cedar Creek water, sheds, and 175 CCC enrolless who are working on farms outside of the above water sheds.

This work is directed by a trained personnel consisting of experts in soils, agronomy, engineering, forestry, wild life, and farm agreement men who have a farm background and a sympathetic understanding of the farmer's problems. The service of these men with the work of more than 475 foremen and laborers is available without cost to the farmers of this area who are willing to undertake a definite soil conservation.

Reliable sources of information indicate that more than 20 times as much soil fertility is lost each year from washing away than is used in crop production on our farms.

In addition that time, 25 per cent of the farmers were listed as tenants. Attempts to check the growth of tenancy have been made chiefly because of the instability of residence associated with a farm tenant system.
