Breaks Record

Sales by Chevrolet dealers continued throughout January at a rate which broke all January records in the history of the company, besides rounding out the greatest 90 days after announcement that Chevrolet has ever known.

This fact is revealed by figures released by W. E. Holler, vice-president and general sales manager. New records were established both for new cars and trucks and for used cars, Mr. Holler said. An important contributing factor, he added, was the used car disposal program, under which thousands of old cars were destroyed and forever removed from the streets and highways of America. January sales of new cars and trucks totaled 75,412 units, an increase of 103 per cent over January 1935. New unit sales for the period since the 1936 model announcement totaled 247,666, as compared with 130,867 for the best corresponding period in the past, in 1929-30. This is an increase of 89 per cent.

Used car sales for January were 166,966 units, the second-highest used car month in Chevrolet's entire history. Sales of used cars for the 90-day period since introduction of the 1936 models totaled 400,717 units; 247,003 in 1934-5 being the highest previous total for a corresponding period.

"We regard it as significant that the combined sale of new and used cars by Chevrolet dealers in January totaled 242,378 units and further, that the combined sale by Chevrolet dealers of new and used cars during the three months period reached the tremendous total of 648,383 units.
