

Watch Your Kidneys!

Be Sure They Properly Cleanse the Blood

YOUR kidneys are constantly filtering waste matter from the blood stream. But kidneys sometimes lag in their work—do not act as nature intended—fail to remove impurities that poison the system when retained. Then you may suffer nagging backache, dizziness, scanty or too frequent urination, getting up at night, puffiness under the eyes, feel nervous, miserable—all upset.

Don't delay! Use Doan's Pills. Doan's are especially for poorly functioning kidneys. They are recommended by grateful users the country over. Get them from any druggist.

DOAN'S PILLS

Timely Farm Questions

Answered at State College

Question: How can I tell when my chickens have worms?

Answer: Birds that are heavily infested with these parasites are usually quite thin, there is a drawn appearance of the face parts, and sometimes a fading of the eye. The birds are also sluggish and are invariably poor producers. When this condition appears in the flock several birds should be killed and the intestinal tract checked for worms. Before any medication, however you should see your county agent, as worming a flock must be done carefully to prevent the birds going into a moult.

Question: What feed should be given a cow immediately after freshening?

Answer: For the first few days

PLANT BED FERTILIZER

We now have on hand a supply of Plant Bed Fertilizers and Nitrate of Soda.

SEE US BEFORE YOU BUY.

MEADOWS and HARRIS

Southside Warehouse
Louisburg, N. C.

the feed should be very limited. Only bran mash should be used as the grain feed the first day after freshening. For the next four days the feed should consist of a mixture in equal parts of wheat bran and ground oats. A reasonable amount of legume hay and a small amount of silage may be fed during this period. On the fifth day the cow may be started on the regular milking ration and gradually brought to full feed over a period of three weeks from freshening date.

Question: How can I control the small worms in my tobacco plant beds?

Answer: These small worms often cause severe damage by uprooting the small plants, but are easily controlled by applying naphthalene flakes at the rate of one and one-half pounds to each 100 square yards of plant bed. It may require from one to three applications and these should be made about one week apart. Strong winds will blow the naphthalene gas out of the bed as fast as it is formed and any applications made just before a strong wind should be repeated as soon as it becomes calm.

Beware The Cough That Hangs On

No matter how many medicines you have tried for your cough, chest cold or bronchial irritation, you can get relief now with Creomulsion. Creomulsion not only contains the soothing elements common to many remedies; such as, Syrup of White Pine Compound with Tar, fluid extract of Licorice Root, fluid extract of Wild Cherry and Menthol, but also has fluid extract of Ipecac for its powerful phlegm loosening effect, fluid extract of Cascara for its mild laxative effect and, most important of all, Beechwood Creosote is perfectly blended with all of these to reach the source of the trouble from the inside. Creomulsion can be taken frequently and continuously by adults and children with remarkable results.

Thousands of doctors use Creomulsion in their own families as well as in their practice knowing how Creomulsion aids nature to soothe the inflamed membranes and heal the irritated tissues as the germ-laden phlegm is loosened and expelled. Druggists also know the effectiveness of Beechwood Creosote and they rank Creomulsion top for coughs because you get a real dose of Creosote in Creomulsion, emulsified so that it is palatable, digestible and potent for going to the very seat of the trouble.

Creomulsion is guaranteed satisfactory in the treatment of coughs, chest colds and bronchial irritations and especially those stubborn ones that start with a common cold and hang on for dreadful days and nights thereafter. Even if other remedies have failed, your druggist is authorized to guarantee Creomulsion and to refund every cent of your money if you are not satisfied with results from the very first bottle. Don't worry through another sleepless night—phone or go get a bottle of Creomulsion right now. (Adv.)

A little vision goes a long way—too much vision has wrecked more men than too little.

Being Leap Year, 1936 offers opportunities to a girl with a steady job.

WHEN WE LOAN WE MUST KNOW

all about the borrower, for we are loaning our depositors' funds and must account for every penny.

But we do want to make loans, for the interest upon them is our principal source of income.

You may be sure, then, that Citizens Bank and Trust Company will be interested in your proposition, and ready to supply the funds you need if sound banking practice permits.

From 1935 Report of President Price

The Jefferson Standard is in the strongest financial position in its history.

Surplus, contingency and special reserve funds were increased to \$4,325,000.

Assets increased over \$4,300,000 in 1935.

Assets now totaling \$62,206,099 have doubled in the past ten years, and are larger than at any time in the history of the Company.

We are continuing to make satisfactory investments in high class mortgage loans and in select bonds.

Liquid resources are ample.

\$5,981,892 were paid to policyholders and beneficiaries in 1935.

More than eighty-seven million dollars have been paid to policyholders and beneficiaries since organization in 1907.

We continue our unbroken record of payment of 5% interest on funds held in trust for policyholders and beneficiaries. As long as we continue to make investments producing such satisfactory interest yield we feel that our policyholders and beneficiaries are entitled to this rate on funds left with the Company.

New life insurance sales totaled \$49,524,700, an increase of 6% over 1934.

Insurance in force increased more than fifteen million dollars, the total amount in force now standing at \$329,887,624.
