Timely Farm Tames Wild Birds Amateur Typing Record Questions

Answered at State College

Question: Can skim-milk or buttermilk be substituted for any-thing else in the laying mash oth-er than dried milk.

er than dried milk.

Answer: Yes. When as much as three gallons is fed each day to 100 hens all the dried milk products, one-half the fish meal, and one-half the meat meal as recommended may be left out of the ration. The success of these substitutions, however, depend upon the regular feedings of the skim milk or buttermilk. Unless there is an ample supply of these items at all times no substitutions items at all times no substitutions should be made, or if only one gallon is available only the dried milk products should be removed from the ration.

Question: Should old canes on raspherry and dewberry fields be destroyed?

Answer: All canes in the rasp-berry field that have fruited should be cut out and burned as soon as the harvest is over. This prevents the spread of any disease to the new canes. With dewberries the old canes should be cut off even with the ground as soon as the picking season is over. Where the Lucretia variety of dewberries is produced commercially, all canes, both old and new, are usually cut immediately after harv-est. With the Young variety, it is advisable to cut only the old fruit-

Question: How can I keep my cream cool and pure between collections?

Answer: After the milk is strained and separated the cream should be placed in a can and the can submerged in cold water so that all the cream is under water. can submerged in cold water so that all the cream is under water. Stir the cream occasionally to hasten the cooling. A concrete cooling tank placed where the water from a spring will pass through the tank is ideal, but where this cannot be secured, a serviceable tank may be made from a barrel. Change the water in such a tank at least three times a day. Do not add warm cream to that already cooled.
