**Keep a Good Laxative always in your home**

Among the necessities of home is a good, reliable laxative. Don't be without one! Do your best to prevent constipation. Don't neglect it when you feel any of its disagreeable symptoms coming on. "We have used Doan's Black-Draught for 21 years and have found it a very useful medicine that every family ought to have in their home," writes Mrs. Perry Black of Dalton, Ga. "I have Black-Draught for rheumatism, constipation and other ills where a good laxative or purgative is needed. I have always found Black-Draught give good results."

**BLACK-DRAUGHT**

## Self Help At Louisburg College

(Special to TIMES)  
Louisburg College, Sept. 21.—Pioneering in the field of education among the smaller colleges in this State since it is the first of the smaller institutions to do so, Louisburg College is this year adding a department of industrial arts to its curriculum. The course is being inaugurated as a result of the feeling on the part of Dr. A. D. Wilcox, President of Louisburg, that college training should be practical as well as theoretical or liberal, and that it should train the hand and the eye as well as the mind and the heart. Registration is proving unusually heavy for a new course. Prof. Tilman Lockard, an honor graduate of the Eastern Illinois Teachers' College with the degree of Bachelor of Education in industrial arts and vocational education, is to head the local new department. He led his class in scholarship and was head of the chapter, one of the largest in the country, of Epsilon Pi Tau, national honorary fraternity in his field.

The general shop aspects of industrial arts education, the latest trend in the field, will be emphasized at Louisburg. This will include units in woodworking, metal work including work in metal spinning, printing and electricity. A companion course, which is being offered in engineering drawing, covers the principles of mechanical, architectural and machine drafting.

Credit earned in industrial arts courses is transferable to North Carolina State College and this institution will accept all the work done here toward its degrees in industrial arts education and in any engineering course.

**Recent Development**  
Industrial arts education is a comparatively recent development in American colleges, and in fact, is so recent that very few Southern colleges, whether small or large, offer such courses in their curricula. Its growth in colleges and high schools has been almost wholly due to the trend toward the practical and the utilitarian in education. Today educators feel that the hand and the eye should be trained along with the mind and the heart.

Industrial arts is further development of what was generally called manual training a quarter of a century ago. Manual training was a term used to describe education of the mind through the hand based on handwork instruction in elementary industrial processes.

Manual arts, the term later used, described such subjects as woodworking, mechanical drawing, printing, bookkeeping, and the like. When taught as a form of general education it had as its chief purpose that of developing within the student manual skill and an appreciation of good design and constructive by the project method.

Industrial arts is the term now most often used to describe what was formerly called manual training and then manual arts. It has been defined by Frederick G. Bonser, late nationally known leader in the field of industrial arts as "a study of the changes made by man in the form of materials to increase their values, and of the problems of life related to these changes."

**Plays Big Role Under Self-Help Plan**  
Under the new self-help plan of the College, industrial work will play an important part. Those students who desire to help pay their expenses through college may do so by doing work of an industrial nature under correct supervision in industrial arts practice. Such work is to be carried on outside the regular class work. Beginning students this year will also have an advantage over students who will register after this year in that they will obtain practical experience in building a shop for industrial arts from the ground up.

Industrial arts is a subject, according to Prof. Lockard, which should be the part of any growing and up-to-date school curriculum.

In his opinion industrial arts meets the requirements of the National Education Association which has enumerated seven cardinal principles of education. These are, command of the fundamental processes of learning, development of ethical character, worthy use of leisure time, worthy home membership, health, citizenship, and social and economic relationships.

"It is essential for the industrial arts to be the part of any

school curriculum," declared Prof. Lockard, "if we are to graduate students fitted for life needs and if we stop to consider that our civilization is an industrial one."

"There is a greater carry over of the practical essentials of living in our civilization from the field of industrial arts education than in any other field of modern education," stated Prof. Lockard.

"As a cultural subject industrial arts is important because it forms the basis of what is known as materialistic culture. The so-called idealistic culture, about which everybody pines, is and has always been a parasite upon the materialistic of which the practical arts support."

"Industrial arts offers a wide range of training in what is known as 'consumer knowledge' which tends to produce more intelligent users and consumers of the world's goods. If we are to become more intelligent consumers, practical arts education is a necessity in some form or another," declared the new instructor.

## SPRING HOPE NEWS

**Mrs. Minerva Jenkins**  
Spring Hope.—Funeral services were conducted Friday afternoon at 3:00 from Peachtree Baptist Church for Mrs. Minerva Ann Jenkins, 79. Interment followed in the family graveyard at the old homeplace nearby.

Mrs. Jenkins died Thursday after a brief illness at the home of her grand-daughter, Mrs. Wade Wester.

She is survived by two brothers, Duncan Parker of Spring Hope, R. F. D., and Charlie Parker of Smithfield. There are six living children, Mrs. Lonnie Winstead, Spring Hope, R. F. D.; Mrs. J. R. Bass, Momeyer; W. M. Jenkins, Momeyer; L. A. Jenkins, Spring Hope, R. F. D.; J. H. Jenkins and Mrs. Alvin Leppala of Spring Hope.

**Mrs. Susan E. Valentine**  
Spring Hope.—Funeral services were held Thursday at 3:00 o'clock from her home in Spring Hope for Mrs. Susan E. Valentine.

73. Mrs. Valentine had been an invalid for over 12 years and would have been 74 in one more day. Dr. W. R. Cullom and Rev. M. F. Hodges officiated with music by the combined church choirs.

At the grave members of the John W. Bryant U. D. C. Chapter placed flowers since the deceased was a former member of that club.

Serving as pallbearers were her nephews: Cecil May, Alfred May, Edgar May, Mallie Taylor all of Spring Hope, T. C. May of Bailey and Charlie Taylor of Middlesex. She is survived by one sister, Mrs. Sallie Mae Wood and one brother, Genatus May, both of Spring Hope. Her children include Edison Valentine, Durham; Mrs. C. J. Hampton, Asheville; Herbert Valentine, Enfield; Bruce Valentine, Pinetops; Itimous Valentine, Nashville; Howard Valentine, Fairmont; Wiley Valentine and Misses Ada Valentine and Fannie Mae Valentine, all of Spring Hope.

Polk County farmers who dug trench silos last year say they will use them this season. Additional farmers are digging silos at present.

The yellow-striped army worm defoliated three plots of cotton on the farm of J. Y. Sawyer of Pamlico County in two weeks and did some damage to the cotton bolls.

Two community buildings and an agricultural building are being constructed in Hertford County by the Works Progress Administration.

# NOTICE!

To my old customers and friends. Since closing the "What-Not" the first of the year I have seen very little of you but this fall I am going to have a little shop in my home at 304 N. Main St. with a new line of dry goods, notions, blankets, blanket rolls, etc., and shall be glad to have you call in any time. I also have too many potted plants to care for this winter and a number of these will be for sale. Come to see me.

## TUBERCULAR HOSPITAL

In Franklin County there are one hundred cases of Tuberculosis. As this is one of the most contagious and infectious diseases, an estimate of the unknown cases would be impossible.

In speeches to the Kiwanis Club and other groups, Drs. H. G. Perry and R. F. Yarborough have pointed out the dire need for isolation of known cases. This can be done in only one way, by confining known active cases in a hospital, thereby, protecting them and their families and the public.

It is an absolute fact that there are numerous cases of active Tuberculosis that are using no precautionary measures whatsoever, that is, on our streets, in our places of business, and particularly in our homes.

A Tubercular Sanitorium would offer us the only opportunity to help those cases that are active and some of them incurable, by giving them proper rest and treatment. The important thing is, it would offer us an opportunity to cure those cases that are not in advanced stage by isolation and proper treatment and prevent the spread of this disease.

It is at the present time impossible to get patients in the State Institution due to lack of space. Therefore, we should have a Tubercular Sanitorium for Franklin County as we are one of the few counties in North Carolina not taking care of T. B. patients.

## Rid Yourself of Kidney Poisons

Do you suffer burning, stony or frequent urination, backache, headache, dizziness, loss of energy, leg pains, swelling and puffiness under the eyes? Are you tired, nervous, and all unwell and don't know what is wrong?  
Then give some thought to your kidneys. Be sure they function properly for functional kidney disorder permits poisons to stay in the blood, and to poison and upset the whole system.  
Use Doan's Pills. Doan's are for the kidneys only. They are recommended the world over. You can get the genuine, time-tested Doan's at any drug store.
