HEALTH DEPARTMENT

Dr. R. F. Yarborough, County Health Officer

There has been a case of typhoid fever reported in Louisburg. This is the first case in Louisburg in a number of years, and from investigation I feel this case was contracted in another County as the result of swimming in a polluted pool. Practically all ponds and streams in Franklin County are polluted and swimming in them is dangerous. I advise against swimming in such waters.

Everyone who has not been vaccinated recently against typhoid should either go to their family physician and be vaccinated or come to the Health Office where vaccination will be given free.

We must get ours.' 'Some neighborhood must lead the way out of that suicidal swirl. Why not yours? Why not start Federal Economy County Committee Number One? 'When such committees tell Washington to save, believe me it will.'"—William Hard.

Many more men start up the ladder than you think. But in so many cases when they reach the third or fourth round they get "nigger rich" and conclude they're ready to quit work.
