Judge—Are you positive the defendant was drunk?

Officer (growing)—No doubt, Judge—Why are you so certain?

Officer—Well, I saw him put a penny in the patrol box on Fourth Street, then look up at the clock on the Presbyterian Church and shout: 'Gawd, I've lost fourteen pounds.'

It seems that the greater public discontent, the less brains an orator needs to win a following.

Radio Noise To Be Eliminated

R. C. Beck, Chairman of the Light & Water Committee, informs the TIMES that the Board of Commissioners desiring to render its customers better radio service, has purchased an expensive instrument, especially built to locate radio interference.

Customers are requested to call the Light Dept., making complaint of any noise. Prompt service will be rendered to locate the noise and there will be no charge for this service.

Mr. Benson, a Radio Interference Engineer has been working the town for two weeks with his own equipment. Has located many sources of interference and made some repairs, which has made night reception much better.

While Mr. Benson is working with the permission of the Mayor and Board of Commissioners, he is not hired by the Town or in any way connected with the Town. He is working entirely on his own, making what he can from repair work that he may do.

DORCAS CLASS

Mrs. Frank Harrington and Lincoln were joint hostesses to the Dorcas class of Louisburg Baptist Church, Friday night of last week.

About twenty-five members and guests were present and all enjoyed a very pleasant evening. After the class business was disposed of, the meeting was turned over to the entertainment committee who amused the crowd with stunts, readings, etc., after which delicious refreshments were served.

The only thing about the movie hero that we envy is his ability to keep a shirt clean through all adversity.
