CHANGES

Consumer goods, especially personal and household effects, will show marked changes. Living habits and standards must be revised for the duration. Only in a broad general fashion do house-holders and civilians now know what's ahead for them. To the casual shopper, most department store and other retail shelves appear comfortably filled. Watch out, however, for scarcities when replacements become necessary. Substitutes and simpler standardized products will, however, be available and serve the purpose of countless present products.

This entire column could be devoted to lists of everyday items due for changes. In addition to the few already mentioned, there may be noted table silver, linens and blankets, kitchen utensils, personal clothing, furniture, tools, laundry necessities, electrical and mechanical appliances, dyes, medical and pharmaceutical sup-plies, building supplies, sporting goods and various foodstuffs. En-glish famaliles have discovered how well they can get along on how little. It has made them healthier and given them a di-rect part in their country's war effort. Surely we can do as well.
