Lumpkin Appointed Chairman

Raleigh, Sept. 30.—With the appointment yesterday of W. L. Lumpkin, Louisburg, as chairman of the Labor Mobilization Board for Franklin County, Governor J. M. Broughton served definite notice on local loafers that they must find gainful employment within the next few days or be charged guilty of a misdemeanor and subject to punishment by a prison sentence, a fine, or both a fine and a prison sentence.

Governor Broughton named the following as members of the Board to assist the chairman in putting all idlers of this county to work: Mrs. C. T. Dean, Rout 4, Louisburg; Mrs. J. S. Collie, Route 4, Louisburg; H. W. Tant, Route 1, Spring Hope; J. M. Stallings, Route 2, Zebulon; Mrs. J. W. Perry, Route 3, Zebulon; S. V. Hill, Route 1, Youngsville; F. H. Watson, Route 1, Franklinton; W. A. Rowland, Route 1, Kittrell; M. E. Watkins, R. F. D. Louisburg; John Edwards, Route 2, Louisburg; Tom Wilson, Route 3, Louisburg; H. S. Pearce, Franklinton; John Odom, Franklinton; Arthur Hall, Youngsville; T. W. Moss, Youngsville; Professor Geo. Pollard, Louisburg; Bill Boyce, Louisburg; and Mrs. J. F. Mitchner, Louisburg.

In announcing the appointments, Governor Broughton made it clear that this Board's first duty will be that of reporting to the local representative of the U. S. Employment Service the names and addresses of all able-bodied men in this county between 18 and 55 years of age who are not gainfully employed as much as 35 hours per week.

"If the unemployed person refuses to accept employment provided him by the service, or refuses any other gainful job offered him, without cause or excuse, this refusal will constitute a clear-cut violation of the North Carolina Emergency War Powers Proclamation Number Four and this person will be guilty of a misdemeanor," declared Governor Broughton.

The Governor added that the committee will give the law en-

forcement officers the names and addresses of all persons refusing to accept work or to continue any employment accepted by them. Upon receipt of this information, the officers have the authority to issue warrants against these men who have refused work and the Governor recommends that they be "speedily brought to trial in courts of competent jurisdiction."

Woods Fire Cost High
An average of more than 30 million acres—with damage of nearly 45 million dollars—are burned in the United States forests annually. The loss is especially serious in wartime, when wood is a critical material.

Too-ter—They say that the man Hazel is to marry has money to burn.

Umph—Well, he's met his match.

WAR LOAN DRIVE REPORT

Fires Destroy Capital

When woods fires devastate the South's forests they destroy trees valuable for production of forest products, protection of watersheds, food and shelter for wildlife, recreational opportunities, regulation of stream flow, control of erosion, windbreaks, aesthetic value, and as a source of labor and industry.

FILLING STATION GETS SIX-MONTH SALES BAN

OPA Order Issued Against James Henry Holmes, of Kittrell, Route 1

A six-month suspension order against James Henry Holmes, operator of a filling station on Kittrell, Route 1, has been issued by Judge Daniel L. Bell, OPA regional hearing commissioner. The order prohibits Holmes from buying, selling, or delivering gasoline during the period from October 11 to April 11, 1944.

Announcement of issuance of the order, imposed because of violations of the gasoline rationing regulations, was announced here by Theodore S. Johnson, Raleigh district director of the OPA.

Johnson said that the order resulted from OPA charges that Holmes (1) had a shortage of 140 gallons of gasoline or coupons; (2) that he registered his station's storage capacity as 390 gallons when his actual storage capacity was 280 gallons; (3) that he delivered gasoline into passenger autos on "TT" ration coupons; (4) that he purchased a passenger auto and accepted and used the 'A' ration of the former owner after the transfer of the car; (5) that he had one 'R' and four 'E' coupons bearing no endorsement in his possession, showing that gasoline had been delivered in exchange for same without the receiver of the gasoline endorsing the ration coupons; and (6) that he transferred 60 gallons of gasoline to a buyer upon agreement that ration coupons would be accepted in exchange subsequently.

Fire Protection Needed

More than 136 million acres of forest lands still lack organized protection against forest fire, the Forest Service reports. This is approximately one-fourth of the total area classed as needing protection. Eighty-six per cent of the total acreage burned last year was on this unprotected area.

A recent survey indicates that the average city housewife wastes more than three-fourths of a pound of food for each individual every day. The highest waste is in perishable fruits and vegetables.

Egg production for August of 1943 was 9 per cent above the same month last year, and the production for the first eight months of the year was 13 per cent above a year ago.

DOING SPLENDID WORK

The Adult sewing class of Mills School under the supervision of Miss Marjorie Gardner, has accomplished quite a number of things, such as working button holes, binding button holes, sewing on buttons, making plaques and learning to read patterns. The members of the class now are making dresses.

We hope to be able to put this valuable information into practice more fully by organizing a sewing club.

MT. GILEAD MEMBERS TO MEET

A called meeting of the members of Mt. Gilead Christian Church will be held Sunday, Oct. 17, at 11:00, for the purpose of calling a pastor for the ensuing year. All members are urged to be present.

Ration points do not have to be given for long tongue of beef, brains and kidneys. These meat items are relatively low in cost, and high in food value and flavor.
