Fast 'n Fancy Fruitcake
For gifts, for snacking, or to serve with pride at your holiday open house, there's nothing quite like rich, moist fruitcake. This recipe fits the busy season's schedule nicely, too, because it starts with Date Bread Mix. With a few quick additions you'll have a loaf or individual fruitcakes as full of goodies as a Christmas stocking.

Date Fruitcake
1 package Date Bread Mix
1 cup chopped-pecans
1 1/2 cups chopped candied fruit
1/2 cup raisins

Prepare Date Bread Mix adding candied fruit, pecans and raisins with the dry mix. Bake at 350 degrees for 65 to 70 minutes. Glaze with warm corn syrup and garnish with candied fruit. Cool thoroughly before slicing.
MINIATURE FRUITCAKES: Bake in 24 paper-lined or greased muffin cups for 30 to 35 minutes.

Health And Beauty
Many homemakers are faced with the problem that their hands look older than they are. It is quite natural for hands to look older than other parts of the body, they are exposed to so many more washings.
All these washings - quite often in harsh soaps, rob the natural oils. Special care must be taken to restore the oils and moisture loss.
You can go a long way toward restoring the lost oils, by using lotions and creams with emollient ingredients. Most modern handcreams are moisturized. This helps to plump up the flesh of bony hands and smoothe the skin surface.
Take care to wear gloves to protect your hands these cold winter days. Use hand-cream several times each day - after each exposure to water.
There are several handcreams on the market that contain a make up to hide unsightly spots on the hands that often come with age.
Most foot troubles have their foundation in childhood and are the result of poorly fitted or outgrown shoes. Don't wait for your child to tell you his feet hurt.
Shoes should be checked every month. Up to the age of 12, it is possible for a child's foot size to change every three months.
The construction of a shoe is next in importance to the fit. We like leather shoes best, for they provide the resilient support required by growing feet. Leather also has the advantage of breathing with the foot and allowing foot perspiration to be evaporated.
Never use hand-me-down shoes. No two children have identical feet, even though their sizes may be the same.
Consult your physician if your child shows any sign of flat feet, toeing in or toeing out, or knocked knees.
You can rely on your local shoe retailer to fit your child's shoes, if no foot problems are evident.
