## TOTAL PERFORMANCE:

**YOU'LL KNOW WHY FORD SWEEPED THE FIRST FIVE PLACES AT DAYTONA...WHEN YOUR '63 FORD IS STILL GOING STRONG YEAR AFTER YEAR**

Daytona's big, banked oval puts unbelievable stresses and strains on engines, steering gears and frames. The Fords that won at Daytona took all the punishment this famous track could dish out over 500 miles of grueling competition without missing a beat.

In this toughest of all stock car events, mechanical failures claimed over fifty per cent of the starting field. But of twelve Fords entered, nine went the distance. Ford took six of the first ten places.

Five-hundred-mile events like Daytona are a public demonstration of toughness, reliability and sheer engineering excellence that are part of the new generation of Fords. A test like this can't be duplicated on anybody's testing grounds—it's run right out in the open. Any car can enter. But only the car that has the best total combination of strength, balance, precision

control and road-clinging suspension can win... that's what we mean by total performance.

Visit your Ford Dealer before you buy any other new car. Here's what you'll find: a new kind of total-car durability, a new kind of handling ability, a suspension that is startlingly smooth yet sticks to the road like tar. If you haven't driven one lately, you can't really know what a new Ford is like. Remember, it's built by Ford. It's built for performance... total performance!
